**Logging threats to the Black Tysa River in
Emerald Network site "Marmaroski ta
Chyvchyno-Hryniavski Hory" (UA0000117)
(Ukraine)**

- REPORT BY THE COMPLAINANT -

*Document prepared by
ECOSPHERE*

The situation in the forests of Yasinya State Forestenterprise, which grows in the valley of the river Chorna Tysa, has not changed since my last information (from June 2021). As proof, I am sending official information from the State Ecological Inspectorate in the Zakarpattia region ([Annex](#), translated extract below). An inspection of the forests of the Yasinya State Forestenterprise revealed violations of environmental legislation and estimated the losses at UAH 3,86791.30. Among the forest areas where violations were detected, there are areas in the Chornotyansky forestry, which are located in the valley of the Black Tysa River.

Translated extract from Annex:

"According to the inspection report № 312/06 of 16.09.2021, drawn up as a result of the planned measure of state supervision (control) over compliance with **Yasinya State Forestenterprise** requirements of environmental legislation, damage to forest resources in the amount of 386791.30 UAH. in the following forestries:

... compartment # 9, sub-compartment (plot) # 40; compartment # 14, sub-compartment # 4.1; compartment # 14, sub-compartment # 4; compartment # 1, sub-compartment # 23; compartment # 12, sub-compartment # 37 in **Chornotyansky forestry**".
