1. Presentation of the functioning of the judicial system in Germany

The court system in Germany has a federal structure. The administration of justice is entrusted to federal courts and the courts of the 16 federal states (Landers). The ordinary jurisdiction consists of the civil and criminal jurisdictions. The specialised courts are the Administrative courts, the Finance courts, the Labour courts and the Social courts. In addition, there is the constitutional jurisdiction, which consists of the Federal Constitutional Court and the Constitutional courts of the Landers.

Percentage of first instance specialised courts

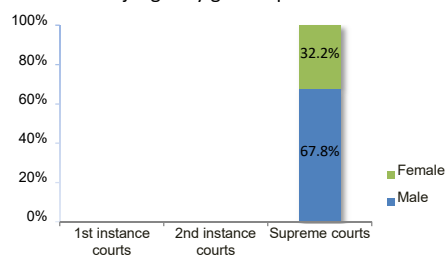

It is noteworthy that depending on the value at dispute, commercial cases are dealt with at Local or Regional Courts, on application in a chamber established at the Regional Court for commercial cases. There are no separate commercial courts. Likewise, there are no independent rent and tenancies courts, enforcement courts or courts for insurance cases. Depending on the caseload, special panels of judges are established for this purpose at the Local and Regional Courts. Family cases are dealt with at first instance in special departments of the Local Courts. The Federal Armed Forces do not have any military courts of their own; its members are subject to civil jurisdiction. The category "other" covers 18 Finance Courts.

2nd instance courts	19.8%	NA	NA
Supreme courts	2.2%	67.8%	32.2%

Distribution of professional judges by instance

The total number of professional judges (all instances) is NA by gender and this analysis is only possible for the judges of the Supreme court.

The total number of judges is distributed among the different judicial instances in the following way: 16 042 are sitting in first instance courts ; 4 071 are sitting in second instance courts and 457 are sitting in Supreme Court (among which 147 are female).

As regards the methodology of presentation of data in respect of the number of judges, it should be noticed that Germany has a very precise calculation for the number of judges on all instances presented in FTE. On the other side this sophisticated calculation does not provide same data by gender which is the drawback of this source. The data for the Supreme court is based on a biannual survey and it is not available each year. However this data is possible to provide by gender.

As regards the distribution of the number of judges among the different judicial instances, German distribution by instances is very close to EU median values except for Supreme court where is half of it.

In Germany, training of judges requirements are broken down as follows:

- Initial training:
- General in-service training:
- In-service training for specialised judicial functions:
- In-service training for management functions of the court:
- In-service training for the use of computer facilities in courts:
- In-service training on ethics:

All in-service training in Germany are not compulsory. Because judicial independence is interpreted very widely in Germany, it is not possible to enforce detailed rules in that regard.

Number of training courses organised is not available for Germany neither for total nor for any of the categories.

2019	54,434	8,771	28,464	6,844	2,089	8,266

In Germany, in this cycle there are 54 434 non-judge staff (among which NA females). Comparison with previous cycle reveals an increase of 0,7%.

In this cycle, the non-judge staff is broken down as follows:

- 8 771 Rechtspfleger (or similar bodies) with judicial or quasi-judicial tasks having autonomous competence and whose
- 28 464 non-judge staff whose task is to assist the judges such as registrars (among which NA are women);
- 6 844 staff in charge of different administrative tasks and of the court management (among which NA are women);
- 2 089 technical staff (among which NA are women);
- 8 266 other (among which NA are women);

In the light of the data relevant for the judges, it is possible to notice that in 2019 the number of non-judge staff per 100 000 inhabitants has increased (from 65,1 in 2018 to 65,5 in 2019).

During the same period, the number of judges per 100 000 inhabitants evolves from 24,5 judges per 100 000 inhabitants in 2018 to 24,7 in 2019.

Figures for the Federal Courts are not included.

These figures denote the number of staff (full-time equivalent) who are:

- granted unpaid leave for training/further-training purposes,
- released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
- employed in a special facility,
- employed as reception/security staff,
- employed by the court switchboard,
- motorpool staff,
- cleaners and other non-salaried personnel

The federal average was calculated unweighted since no information on annual net salary is available since it depends on the personal circumstances of judges and public prosecutors. The annual salaries of the Federal Länder were added and divided by the number of Länder, regardless of how many judges and prosecutors work in the respective Federal Land (the corresponding data are not known).

3. Access to justice

◦ Legal aid

The total annual approved public budget to legal aid is 747 653 492 € (9,0 € per capita).
 The total annual implemented public budget to legal aid is 647 481 494 € (7,8 € per capita).
 The distribution of the total annual approved public budget allocated to legal aid is as follows:

	<u>Approved</u>	<u>Implemented</u>
- In criminal law cases:	NA	NA
- In other than criminal law cases:	NA	NA
◦ Annual public budget allocated to legal aid for cases brought to court:	NA	NA
- In criminal law cases:	NA	NA
- In other than criminal law cases:	NA	NA
◦ Annual public budget allocated to legal aid for cases not brought to court:	NA	NA
- In criminal law cases:	NA	NA
- In other than criminal law cases:	NA	NA

It is noteworthy that all data concerning the budget should be construed in the light of the federal State structure of Germany. Accordingly, variations for which no particular explanation has been notified are often due to the fact that for the different evaluation cycles a different number of Lander provided a reply. Owing to this peculiarity, the information remains most of the time incomplete. The figures include the federal budget as well as the budgets indicated by the respondent Landers.

In Germany, legal aid is available for :

	Criminal cases	Other than criminal cases
◦ Representation in court:	✓	✓
◦ Legal advice, ADR and other legal services:	✓	✓
◦ for fees related to enforcement of judicial decisions as fees for enforcement agents. (Q18):	✓	
◦ Other costs than above. (Q19):	✓	

With regard to criminal cases: There is a kind of legal aid for legal representation. Under specific conditions the law provides for the so called "necessary defense". This implies mandatory legal representation, which is initially financed by the State.

In principle in civil matters, legal aid in compulsory enforcement is granted for the entire enforcement proceeding and not for individual enforcement measures.

If granted, legal aid covers all of the costs of the legal dispute. The approval of legal aid includes the costs for the taking of evidence (e.g. witnesses, experts), as well as travel expenses of the recipient to attend a court hearing if personal attendance at the hearing is necessary. Expenditure for the preparation of the proceedings (e.g. expert witnesses, interpreters) may be refundable as necessary expenditure of the appointed solicitor.

In criminal cases:

Accused individuals are free to choose their lawyers in the frame of legal aid system.

Victims are free to choose their lawyers in the frame of legal aid system.

◦ Court fees

Litigants have to pay taxes to start a proceeding in other than criminal matters.

In civil matters, the court is to serve the statement of claim to the respondent party only after the fee covering the proceedings in general has been paid. Thus, any proceedings fundamentally will become pending by service of the statement of claim only after such payment has been received. Where the demand for relief is expanded, no court action is to be taken prior to payment of the fee for the proceedings; this rule also applies before the courts of appeals (section 12 (1) of the German Law on the Costs of Court Proceedings).

There are exceptions in place for counterclaims, for European small claims procedures (ESCP), for disputes about inventions made by an employee inasmuch as the courts have exclusive competence for patent disputes, and for actions for retrial of a case pursuant to section 580 number 8 of the Code of Civil Procedure. This applies to a counterclaim in light of its close ties to a court dispute already pending; in all other regards, particular reasons are given that relate to the proceedings. Further exceptions have been provided for if a petitioner has been granted legal aid for the costs of the proceedings, if the petitioner is entitled to a release from the obligation to pay fees, or if legitimate interests are given for bringing an action or defending against an action, but the petitioner is unable to make the advance payment or if the delay caused to the proceedings by the obligation to pay the fees in advance would result in damages that it is impossible to compensate, or only with difficulty.

◦ Methodology of calculation of court fees

In criminal matters, fees related to the proceedings will arise in an amount stipulated by law, while the amounts of fees charged in other court proceedings will be primarily oriented by the amount in dispute or the transaction value.

Amount of court fees to commence an action for 3000€ debt recovery is 324€

3. Efficiency and quality of the judicial system

• Court performance

- Clearance Rate (CR) and Disposition Time (DT)

The Clearance Rate shows the capacity of a judicial system to deal with the incoming cases. A Clearance Rate of 100% and higher does not generate backlog.

The Disposition Time determines the estimated number of days necessary for a pending case to be solved in a court.

First instance cases

- Total other than criminal cases

Data for this category of cases is not available for Germany.

- Civil (and commercial) litigious cases

The number of incoming cases in 2019 in Germany (1,54 per 100 inhabitants) as well as the number of resolved cases (1,52 per 100 inhabitants) is below the EU median (1,92 and 1,73 per 100 inhabitants respectively).

The number of pending cases at the end of 2019 in Germany (0,91 per 100 inhabitants) is also below the EU median (1,10 per 100 inhabitants).

With a Clearance Rate calculated at 98,9% in 2019, Germany seems close to 100% objective in dealing with its civil and commercial litigious cases. Between 2018 and 2019, the Clearance Rate has increased for 1,6 points.

In 2019, the civil and commercial litigious cases are solved in approximately 217 days, which is slightly above the EU median of 213 days.

Analysis of the 2018 - 2019 period reveals a -1,4% decrease of the Disposition Time.

The number of civil and commercial litigious cases older than 2 years is not available

◦ Administrative cases

The number of incoming cases in 2019 in Germany (0,82 per 100 inhabitants) and the number of resolved cases (0,89 per 100 inhabitants) are both well above the EU median (0,25 and 0,31 per 100 inhabitants).

The number of pending cases at the end of 2019 in Germany (0,97 per 100 inhabitants) is also well above the EU median (0,19 per 100 inhabitants).

With a Clearance Rate calculated at 109,0% in 2019, Germany seems to make extra effort to deal with its administrative cases after three years of lower clearance rate than 100%.

Between 2018 and 2019, the Clearance Rate has increased for 11,8 points and consequently lead to a -8,8% decrease of the Disposition Time in the same period.

In 2019, the administrative cases are solved in approximately 397 days, which is above the EU median of 284 days.

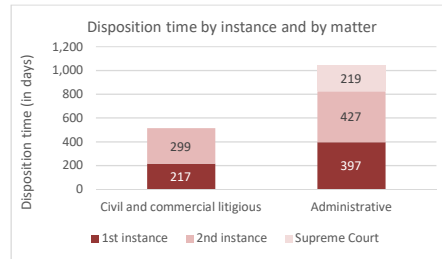

The number of administrative law cases older than 2 years is not available

◦ Insolvency

The data on insolvency cases is not available and efficiency indicators cannot be calculated.

Overall efficiency by instance and by case matter

	CR (%)			DT (days)		
	1st instance	2nd instance	Supreme Court	1st instance	2nd instance	Supreme Court
Civil and commercial litigious	99%	85%	NA	217	299	NA
Administrative	109%	98%	103%	397	427	219

From the available data it seems the administrative cases on second instance are longest in Germany as it is on EU level. For this category the DT is 427 days that is much higher than EU median of 329 days. With 217 days shortest in Germany seems are civil and commercial litigious cases on first instance that is on the same level as EU median with 213 days. Supreme court instance for civil cases is not available.

•Alternative dispute resolutions

The judicial system in Germany provides court related mediation.

The court related mediation system in Germany does not provide mandatory court related mediation.

The number of accredited or registered mediators who practise court related mediation is not applicable to Germany.

The number of court related mediation cases is also not available.

• Systems for measuring and evaluating the court performance

In 2019, individual courts are not required to prepare an activity report.

A regular monitoring system of court activities is in place concerning:

- number of incoming cases
- length of proceedings (timeframes)
- number of resolved cases
- number of pending cases
- backlogs
- costs of the judicial procedures
- number of appeals
- appeal ratio
- clearance rate
- disposition time
- other (please specify):

At the level of the Federal Government, statistics on proceedings encompass the number of incoming cases, the type of proceeding, the form of conclusion, and the time needed for conclusion. Moreover, information regarding other characteristics is also collected (legal aid in litigation and legal aid for proceedings, value of dispute, subject area, remedies, etc.) All of this information can be correlated to one another upon evaluation. The regular evaluations can be found in the publications of the Federal Statistical Office. Data regarding the business overviews usually does not contain – in that it involves manual statistics – additional information beyond the business workload, particularly as regards the duration of proceedings.

Some of the Länder did mention a monitoring system concerning other court activities such as statistics on the nature of resolution are kept (e.g. in civil cases: dealt with by contentious judgment/by acknowledgement/by settlement, etc.).

In Germany, there is no system to evaluate regularly the activity of each court.

A system to evaluate regularly the activity of each court (in terms of performance and output) exists and performance and quality indicators are defined at the court level.

- number of incoming cases
- length of proceedings (timeframes)
- number of resolved cases
- number of pending cases

The evaluation of the court activity is not used for the later allocation of means in this court.

Quality standards are not determined for the judicial system.

Since 2012, the reply “No” is provided depending on the answer of the majority of the respondent Landers.

5. ICT and national data collection system

•The ICT tools of courts and for court users

The use of ICT in courts had been evaluated in 2 fields and 5 sub-fields within those fields in :2019 (graphics below):

	points (up to 4)
Administration and management	3.0
Case management systems	4.0
Tools of producing courts activity statistics	2.0
Communication between court and users	2.9
Possibility to submit a case by electronic means	4.0
Possibility to monitor the stages of an online judicial proceeding	0.0
Electronic communication between courts and lawyers	4.0
Videoconferencing with users	3.5

The calculation of this index for each field is an average of the values of the sub-fields included. The calculation of the sub-field depends on each question and the combination of different modalities of the answers.

The details of the calculation are given in Annex 5 - IT calculations

The result by area may be summarized in these graphics, where each field has been evaluated from 0 to 4 points.

Note; Index is modified each cycle depending on the new modalities included in the questionnaire that show more precise details on the ICT situation that can make the index drop even if there is no real change.

Statistical data

In Germany, there is a centralised institution that is responsible for collecting statistical data regarding the functioning of the courts and judiciary.

It is noteworthy that in 1965 the Conference of Justice Ministers established a nationwide committee for judicial statistics. The permanent Chair is held by the Bavarian justice administration department. All of the Land justice administration departments comprise the voting members of the committee. Invited guests are representatives of the Federal Office of Justice, the Federal Statistical Office, and the Land Statistical Offices of Bavaria, Baden-Württemberg, Lower Saxony, and North-Rhine/Westphalia.

The committee is responsible for the introduction and revision of statistics regarding the business of the justice system.

This involves the uniform nationwide coordinated collection of statistical data regarding courts of general jurisdiction, the public prosecution offices, and courts of specialized jurisdiction. The collected statistical data is used for the distribution of business, calculation of personnel requirements, supervision, draft legislation, monitoring efficiency as a result of statutory amendments, and public work. Against this background, it is necessary for the committee to regularly examine the statistics regarding the justice system and conform it to the above-named requirements and current information needs. At the same time this ensures that the collected information can be compared at the federal level. The collection documentation is prepared by the courts and public prosecution offices. The evaluation takes place centrally at each Land Statistical Office. The latter summarizes the significant results of the statistics and publishes them annually. In addition to the collections named above the workload in respect of non-contentious proceedings is encompassed in national reviews of business. The results are collected by each Lander and after that compiled by the Federal Office of Justice at the federal level. All courts and public prosecution offices maintain national personnel data. The effective date for collection of the data is 31 December and the information encompasses the position, gender, and percentage of time for which existing personnel are employed. In addition thereto, the deployment of personnel in the significant business branches of the justice system is collected as an average. The annual results are collected by the Lander justice administration departments. The Federal Office of Justice then creates an overview of the significant results from the Landers overviews.

This institution publish statistics of each court on internet.

Individual courts are not required to prepare an activity report.
