Questionnaire for the evaluation of the implementation of the Council of Europe Convention on Action against Trafficking in Human Beings by the Parties

Third evaluation round

Thematic focus: Access to justice and effective remedies for victims of trafficking in human beings

Replies should be sent to: Trafficking@coe.int
**Introduction**

In accordance with Article 38, paragraph 1, of the Convention on Action against Trafficking in Human Beings ("the Convention"), GRETA evaluates the implementation of the Convention following a procedure divided into rounds. At the beginning of each round, GRETA selects the specific provisions on which the evaluation procedure is based.

The first round of monitoring of the Convention provided an overview of its implementation by State Parties. The second evaluation round of the Convention examined the impact of legislative, policy and practical measures on the prevention of trafficking in human beings (THB), the protection of the rights of victims of trafficking, and the prosecution of traffickers, paying particular attention to measures taken to address new trends in human trafficking and the vulnerability of children to trafficking.

GRETA has decided that the third evaluation round of the Convention will focus on trafficking victims’ access to justice and effective remedies, which is essential for victims’ rehabilitation and reinstatement of rights and reflects a victim-centred and human-rights based approach to the fight against human trafficking. A number of provisions of the Convention establishing substantive and procedural obligations are relevant to this topic. Moreover, victims of trafficking, by virtue of their status as victims of human rights violations, are entitled to effective remedies under the European Convention on Human Rights. Access to justice and effective remedies must be guaranteed, in a gender- and age-sensitive manner, to all victims of trafficking subject to the jurisdiction of State Parties, irrespective of their immigration status or presence on the national territory and notwithstanding their capacity or willingness to co-operate in any criminal investigation.

Access to justice and effective remedies is contingent on the fulfilment of a number of preconditions, including prompt and accurate identification of victims of trafficking, the provision of a recovery and reflection period, the availability of material, psychological, medical and legal assistance, regularisation of the victim’s stay, the right to seek and enjoy asylum, and the application of the principle of non-refoulement. These preconditions, corresponding to different provisions of the Convention, have been examined at length during the first and second evaluation rounds of monitoring of the Convention. Consequently, GRETA has decided to ask each State Party for an update on the implementation of GRETA’s previous recommendations on selected topics, through a separate country-specific part of the questionnaire, rather than including once again questions related to the same provisions in the general questionnaire for the third evaluation round.

States Parties are requested to transmit to GRETA a reply to this questionnaire within four months from the date it was sent. The reply to the questionnaire should be submitted in one of the official languages of the Council of Europe (English and French), and preferably also in the original language. Where appropriate, in order to avoid unnecessary repetition, the reply may refer to information contained in the report submitted by the national authorities on measures taken to comply with the Committee of the Parties’ recommendation concerning the implementation of the proposals made in GRETA’s second evaluation report. States Parties should provide links, copies or extracts of relevant legislation, regulations, national action plans and case law mentioned in the reply to the questionnaire, in the original language and, wherever possible, also in one of the official languages of the Council of Europe.

A variety of stakeholders and civil society representatives should be effectively consulted in the preparation of the reply to the questionnaire, to ensure that the information provided is as comprehensive as possible.
