Accelerating support for investment in care policies: ILO Areas of Action

- FF Building knowledge, data and awareness of paid and unpaid care work and their impact on the world of work and changing social norms
- Identifying the care needs of target populations and building the fiscal, regulatory and technical capacity to design, finance and implement inclusive care policies
- Promoting investments in the care economy, through the creation of decent employment in the care economy sectors
- Designing rights-based programmes, through social dialogue, that address representation and decent work deficits among care workers
- Enhancing the capacity of governments, workers' organizations and employers' organizations to develop and contribute to care policy development and implementation

Make a more caring and gender equal world of work a reality for all
