Since 2014, in Italy there are 22 Brand Commercial courts (Tribunali delle imprese) that are legal entities of their own and not just internal court divisions for organizational purpose (such as labour, family etc.).

It is noteworthy that in Italy, some of the specialized first instance courts are not administered and financed by the Ministry of Justice. This is the case for the regional audit commissions, the local tax commissions and military courts. These courts are not taken into consideration for the replies to questions 6, 46 and 52 for none of the exercises.

In respect of the 20 first instance administrative courts (legal entities) and their supreme court, it should be stressed that they have been encompassed within the total under question 43 for the last four exercises, but only since 2014 this approach is reflected in questions 91 and 99 (number of administrative law cases).

Moreover, in Italy specific matters (such as labour, family etc.) are dealt by specific divisions within the same Court. There are also 26 divisions called DDA (Direzioni Distrettuali Antimafia) which deal specifically with mafia and organized crime.

The appeal of some specialized courts (e.g. commercial courts, juvenile courts) are dealt by the general jurisdiction appeal courts. Specific subject matters (e.g labour, insolvency, family, fight against terrorism and organised crime) are dealt by specific divisions within general jurisdiction courts.

The category “other” includes 103 Tax Courts.

Compared with the EU distribution of professional judges per instance, Italy has relatively less judges in the second instance (16,7% vs 23,98%). This is probalby also due to the fact that there are no administrative courts and judges of second instance.

As regards the methodology of presentation of data in respect of the number of judges, it should be noticed that the judges belonging to the specialized first instance courts that are not administered and financed by the Ministry of Justice (regional audit commissions, local tax commissions and military courts) are not counted under this question. As regards the distribution of the number of judges among the different judicial instances, as already mentionned, in Italy there is not a second instance for administrative cases, therefore, there are no second instance administrative judges.

- 378 technical staff (of which 151 are Female);
- 2 496 other (of which 974 are Female);

The category “other non-judge staff” encompasses assistants, receptionists, porters and other judicial staff. As a general remark, it should be stressed that the high percentage of “other non-judge staff” in Italy is due to a very strict interpretation of the definition of the main categories. The specialized first instance courts that are not administered and financed by the Ministry of Justice (regional audit commissions, local tax commissions and military courts) are not taken into consideration in this question.

In 2021, the number of staff has increased due to the hiring of new personnel through public competition.

According to 2021 data, the absolute gross salary of a judge at the beginning of his/her career in Italy of 57 500€ is somewhat above when compared to the EU median of 52 534€. As a ratio with the annual average salary of the country, the salary for a judge at the beginning of his/her career is: 1,83 compared with EU median of: 1,91.

It is noteworthy that the salaries of judges and public prosecutors do not depend on the position held but rather on the experience (i.e. years of service). That means that the salary of a judge working in the lowest courts can be the same as the salary of a judge working in the Highest Appellate Court.

Number of cases for which legal aid has been granted per 100 000 inhabitants

On the occasion of the 2012 evaluation cycle, it has been explained that the higher number of cases for which legal aid had been granted compared to 2010 was due to the fact that the threshold concerning the income and assets evaluation had been slightly increased. Owing to that, since 2012, Italy is experiencing a positive trend in this respect. Additionally, more and more people are living under the threshold under which legal aid can be granted. These numbers must also be seen in the light of the trend of the incoming cases. In recent years the number of incoming cases has decreased, especially in 2019-2020 due to the pandemic.

• Efficiency indicators

◦ Clearance Rate (CR) and Disposition Time (DT)

The Clearance Rate shows the capacity of a judicial system to deal with the incoming cases. A Clearance Rate of 100% and higher does not generate backlog.

The Disposition Time determines the estimated number of days necessary for a pending case to be solved in a court.

Clearance Rate by instance and by matter in 2021 (%)

DispositionTime by instance and by matter in 2021 (days)

The major issue related to the judicial efficiency in Italy remains the excessive length of proceedings, especially as regards civil and commercial litigious cases, even if, the overall length of proceedings has been constantly decreasing from 2012 to 2018. In 2020, due to the Pandemic situation and the temporary closure of courts, the efficiency of courts mostly weakened over the previous years. In 2021 the Disposition Time decreased in all the categories of cases in the three instances. However, it is still way above the EU Madian. Italy has the highest Disposition Time for criminal cases in second instance and for civil / commercial cases in third instance.

Non-litigious enforcement cases in second instance are not in the competence of the Courts of Appeal. With regard to the administrative cases (which number is provided only since 2014), the appeals are dealt with by the Council of State (Consiglio di Stato) which is a legal-administrative consultative body ensuring the legality of public administration in Italy. The Council has jurisdiction on acts of all administrative authorities, except when these authorities lack discretionary power, in which case the dispute is considered to be one of civil law. Figures referring to the activity of the Council of State are inserted in the frame of question 99 and not question 97.

In third instance, "Other cases" represent residual cases, such as those concerning the competence or jurisdiction of the courts, or those concerning the correction of the so-called material errors committed by the Supreme Court.

As regards criminal cases, in Italy there is no formal definition of "minor criminal cases". For the purposes of this exercise are considered as minor criminal cases those proceedings dealt with by the Justice of Peace Offices which have been appealed (to Tribunal).

In third instance, "Other cases" represent proceedings regarding jurisdiction or competence conflicts, proceedings pending in other countries (rogatory) or procedures regarding the correction of the so-called material errors committed by the Supreme Court.

Most discrepancies between 2020 and 2021 data are due to the fact that in 2020 the activity of the courts was hugely affected by the pandemic.

In 2021, insolvency cases are solved in approximately 97 days, which is significantly below EU median of 299 days.

The analysis of the 2020 - 2021 period reveals a -32,5% decrease of the Disposition Time.

With regard to the insolvency cases, the peculiarity of the Italian system consists in distinguishing between “insolvency applications” and “insolvency cases”. The former category concerns the litigious part of the proceeding where creditors and debtors have different goals (dispute). The latter category concerns the part of the proceeding where the judge has already established the insolvency / bankruptcy of the debtor and the case is all about the management of the assets and proceeds of the debtor. Figures at questions 101 and 102 refer to “insolvency applications” rather than “insolvency cases”.

In 2021, the decrease in the number of incoming employment dismissal cases might be partially explained by the extension of the ban on dismissal which was initially intended to address the covid emergency. Therefore, the decrease in the number of pending cases is the result of the decrease of incoming cases.

2020	39 680 €	0,001 €	0,011 €
2021	74 020 €	0,001 €	0,022 €

Due to the structure of the Italian judicial system, the Ministry of Justice has one single budget which does not distinguish between the budget allocated to courts, the budget allocated to public prosecution services and the one allocated to the administration. However an effort is made in order to provide the most reasonable figure for the budget of the prosecution services. The calculation is carried out taking into account several criteria (e.g. the number of staff allocated to the public prosecution services).

Difference in the implemented budget might be due to spending shifts from one financial year to another.

In general, the budget for training has drastically decreased in 2020 because the majority of the training was provided online rather than in person.

To clarify things, please consider that in 2021 in Italy 267 270 mediation proceedings were initiated. Both parties showed up at the first mediation meeting in 83 256 cases. Please also note that these figures refer to private mediation. For some matter subjects the mediation is mandatory and it is managed by private mediation companies. Please note that the above figures refer to mediation procedures monitored by the Ministry of Justice. In Italy, there is a plethora of different forms of ADR procedures and some are not so widespread. Court-related mediations do exist for both family cases and labour cases but such mediation proceedings are not monitored by the Ministry of Justice. In 2020 the procedures subject to mediation were extended to the disputes related to COVID-19.

Comments on measurement tools on workload

The same tool might potentially be used to assess the workload of both magistrates and their staff. The monitoring of the activity of judges/prosecutors is eventually used to assess their evaluation. The same doesn't apply to court staff.

8. Systems for measuring and evaluating the performance of courts and public prosecution services in Italy (2021 data)

In Italy, quality standards are not determined for the judicial system at the national level.

In Italy there is not a strict quality system as such. However, there is a regular monitoring system in place which tracks the performance of court activities.

Systems for measuring and evaluating courts' performance

A regular monitoring system of court activities is in place concerning:

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the courts)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✗
Number of resolved cases	✓	Number of appeals	✗
Number of pending cases	✓	Appeal ratio	✗
Backlogs	✓	Clearance rate	✓
Productivity of judges and court staff	✓	Disposition time	✓
Satisfaction of court staff	✗	Other	✗

In Italy, there is a system to regularly evaluate the court performance based primarily on defined indicators and the reporting is more frequent than annual.

Performance and quality indicators are defined for the activity of each court.

The following indicators are used:

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the courts)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✗
Number of resolved cases	✓	Number of appeals	✗
Number of pending cases	✓	Appeal ratio	✗
Backlogs	✓	Clearance rate	✓
Productivity of judges and court staff	✗	Disposition time	✓
Satisfaction of court staff	✗	Other	✗

The performance of each court is given by different indicators such as the clearance rate, the variation of backlogs and the age of the proceeding.

The evaluation of the courts' activities is used for the later allocation of means in the courts.

The process of reallocation of human resources is not carried out on a regular basis. On those occasion when the staffing plan is revised, the criteria also include the court activity. In the occasion of the last exercise of this kind, it was introduced the concept of "flexible staffing plan" (some sort of "flying judges"). I.e. a group of judges who are not allocated to a specific court but to the court of appeal that has a broader regional scope. Subsequently these judges may be temporarily allocated to specific tribunals within the region to cope with specific needs arising from those tribunals.

Systems for measuring and evaluating public prosecution services' performance

A regular monitoring system of public prosecution services activities is in place concerning:

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the public prosecution)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✗
Number of resolved cases	✓	Clearance rate	✓
Number of pending cases	✓	Disposition time	✓
Backlogs	✓	Percentage of convictions and acquittals	✓
Productivity of prosecutors and prosecution staff	✓	Other	✗
Satisfaction of prosecution staff	✗		

In Italy, there is a system to evaluate regularly the activity of each public prosecution service and the reporting is more frequent than annual.

Performance and quality indicators are defined for the activity of each public prosecution service.

The following indicators are used:

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the public prosecutors)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✗
Number of resolved cases	✓	Clearance rate	✓
Number of pending cases	✓	Disposition time	✓
Backlogs	✓	Percentage of convictions and acquittals	✗
Productivity of prosecutors and prosecution staff	✗	Other	✗
Satisfaction of prosecution staff	✗		

The evaluation of the public prosecution services' activities is used for the later allocation of means in the public prosecution services.
