**Management of protected areas  
from climate change perspective**

**QUESTIONNAIRE FOR BERN CONVENTION  
CONTRACTING PARTIES AND PARTNERS**

*Document prepared by  
Mr Otars Opermanis*

## QUESTIONNAIRE ON MANAGEMENT OF PROTECTED AREAS FROM CLIMATE CHANGE PERSPECTIVE

Addressed to Bern Convention Contracting Parties and Partners

### Introduction

In the past decade the effects of Climate Change on biodiversity have been increasingly recognised by the Bern Convention. During this period, several recommendations<sup>1</sup> to Contracting Parties have been endorsed by the Standing Committee to the Bern Convention. Thousands of highly relevant scientific papers and many books have been published. Several of them cover the whole European territory (i.e. climatic atlases such as for birds and butterflies), thus this information is very informative for all European countries, including those outside the European Union. Based on this existing and constantly improving knowledge, many international and national guidelines have been prepared by various governmental and non-governmental institutions.

A special issue is the role of **protected areas** in adapting biodiversity and its conservation to Climate Change. In the European context, the most relevant and up-to-date guidance to policy makers and site managers is given in the 2013 “Guidelines on Climate Change and Natura 2000”<sup>2</sup>. Although this guideline is primarily dedicated to European Union’s Natura 2000 network of protected areas, all principles are also applicable to the Emerald Network of sites in the non-EU countries .

Yet, it has been observed that Climate Change adaptation/mitigation measures linked to the management of protected areas have been implemented at different scales with various success in different Contracting Parties to the Bern Convention<sup>3</sup>. Thus the aim of this questionnaire is to reveal and take stock of particular needs of Contracting Parties for tackling Climate Change in the context of the **management of protected areas**, particularly Emerald Network sites. Based on the answers received from the Contracting Parties to this questionnaire, the Bern Convention Secretariat will assess the needs of Contracting Parties and identify appropriate responses which will provide orientations on how to help countries integrate Climate Change in protected areas management frameworks in a more systematic way.

The questionnaire is addressed to Focal Points to the Bern Convention in all its 51 Contracting Parties. As a minimum one response (i.e. filled questionnaire, representing the institution of the Focal Point) from each country should be returned, but Focal Points are free to distribute this questionnaire further to other institutions if they may have an active position with regards to the subject of Climate Change and protected areas.

This questionnaire does not cover issues related to the constitution of Natura 2000 or the Emerald Network, where the elements of mitigation and adaptation to climate change are embedded in the methodology<sup>4</sup> of setting-up these networks, namely addressing site size and connectivity between sites (even across country borders) which is discussed in the Biogeographical evaluation seminars or bilateral meetings on network sufficiency for both EU and non-EU countries. But it is assumed that more sites, or adjustments to site boundaries (both under the Natura 2000 or the Emerald networks) in future would be necessary to face Climate change challenges.

## CLIMATE CHANGE AND PROTECTED AREAS: QUESTIONNAIRE

Abbreviations: CC=Climate Change, PA=Protected Areas (i.e. Natura 2000 and Emerald Network)

<b>GENERAL INFORMATION</b>			
<b>Country</b>		<b>Compiler</b>	
<b>Date of submission</b>		<b>E-mail</b>	
		<b>Telephone</b>	
		<b>Institution</b>	

**Part I. General indicative self-assessment of progress in the implementation of CC adaptation / mitigation measures linked with protected areas**

1. Please provide score from 0 (no CC related issues were addressed) to 5 (ideal situation both in quantity and quality) in the grey area corresponding to each question.

I-1_A	Is the awareness about CC and acceptance that it is unavoidable sufficient/appropriate in your institution?	insufficient
I-1_B	Are conservation objectives for protected areas developed so as to take into account the species, habitat types and ecosystems which are most likely to be affected by CC?	
I-1_C	Are there adequate pro-active conservation measures in place for PAs which take into account CC aspects?	Some activities undertaken by State Forests Administration – small retention project for instance, as well as works leading to restoration of the improved wetlands localised in Natura 2000 sites and natural reserves.
I-1_D	Is the success of conservation measures monitored, and are monitoring results publicly available and taken into account in reviewing conservation objectives and management techniques?	Not yet.

Additional comments if appropriate:

**Additional questions**

I-1_E	Please provide an indicative coverage of sites (in %) of PA network in your country which have operative management plans in place that are systematically reviewed based on monitoring data:	58,16% of Natura 2000 sites, 66,02% of natural reserves (partly overlapped)
I-1_F	Are there species and/or habitats or protected areas for which CC effects have been already documented in your country? Please provide a list with comments as appropriate. This is a free text. Where appropriate, please add also links to any relevant publication or web-resource (preferably in English):	Not yet. Most of management plans (especially for Natura 2000 sites) entered into force recently
Additional comments if appropriate:		
Management plans of Natura 2000 as well as those for natural reserves are prepared for 5–20 years. During that time the monitoring of species and habitats protected is conducted, and the results obtained provide the background for revision and preparation of new documents.		

## Part II. Specific account of problems and obstacles encountered in the implementation of Climate Change adaptation/mitigation measures linked with the management of protected areas

1. Please indicate (by ticking X in the corresponding box) the problems/obstacles in reaching sufficient awareness of CC in your institution. Select one or more of offered options, or describe in your own words:

II-1_A	None	<input type="checkbox"/>
II-1_B	Lack of information supporting the importance of CC for your country, or lack of knowledge where such information can be found	<input type="checkbox"/>
II-1_C	Information exists but there are difficulties in interpreting the evidence in a meaningful way for your country	<input checked="" type="checkbox"/>
II-1_D	There are no documented observations of negative trends of wild species and habitats in your country which can be attributed to CC	<input type="checkbox"/>
II-1_E	Other, please specify: Lack of systematic and consolidated approach as well as specific climate-change countermeasures for species and habitat types	<input checked="" type="checkbox"/>

Additional comments if appropriate:

There are several papers and reports on climate changes possible impacts on habitats types (mostly) and species in Poland but the proposals for possible solutions are rather general (demand for “integrated strategy of adaptation to climate change”, “support the adaptive processes”, “monitoring of changes”, “new indicators implementation” etc.) . Lack of integrated (adaptive efforts should be an integrated part of active protection principles) and holistic (sensitivity to climate changes criterion included in grant procedures for instant) approach are highlighted among main obstacles.

2. Please indicate (by ticking X in the corresponding box) any obstacles in setting appropriate conservation

objectives for protected areas taking into account CC. Select one or more of offered options, or describe in your own words:		
II-2_A	None	<input type="checkbox"/>
II-2_B	Lack of analytical skills and experience in searching for relevant information and data interpretation	<input checked="" type="checkbox"/>
II-2_C	Poor information on presence of species and habitats in protected areas Lack of up-to-date data	<input checked="" type="checkbox"/>
II-2_D	The procedure for setting conservation objectives for individual species and habitats for each protected area is not established	<input checked="" type="checkbox"/>
II-2_E	Other, please specify:	<input type="checkbox"/>
Additional comments if appropriate:		

3. Please indicate (by ticking X in the corresponding box) why appropriate conservation measures for CC adaptation/mitigation are not either fully or partly implemented. Select one or more of offered options, or describe in your own words:		
II-3_A	None	<input type="checkbox"/>
II-3_B	Lack of knowledge/experience about appropriate management techniques	<input checked="" type="checkbox"/>
II-3_C	Difficulties to act in private land and to involve landowners	<input checked="" type="checkbox"/>
II-3_D	Lack of cross-sectoral cooperation	<input checked="" type="checkbox"/>
II-3_E	Lack of funding	<input checked="" type="checkbox"/>
II-3_F	Other, please specify:	<input type="checkbox"/>

Additional comments if appropriate:

4. Please indicate (by ticking X in the corresponding box) the obstacles/problems in monitoring management results and sharing such information at national and/or international level. Select one or more of offered options, or describe in your own words:

II-4_A	None	<input type="checkbox"/>
II-4_B	Lack of general monitoring scheme for PAs	<input type="checkbox"/>
II-4_C	Lack of sufficiently qualified staff	<input type="checkbox"/>
II-4_D	Information exists but the importance of sharing it is not recognised	<input checked="" type="checkbox"/>
II-4_E	Other, please specify:	<input type="checkbox"/>

Additional comments if appropriate:

### Part III. Ideas and suggestions on how the Bern Convention Secretariat could assist Contracting Parties to improve the implementation of Climate Change adaptation/mitigation measures associated with management of protected areas

1. Please indicate (by ticking X in the corresponding box) possible suggestions for improving awareness of CC in your institution. Select one or more of offered options, or describe in your own words:

III-1_A	Demonstrate (through seminars and study visits) how the experience from Natura 2000 can be transferred to the Emerald Network	<input type="checkbox"/>
III-1_B	Provide positive examples to show that many adaptation/mitigation measures “work in real life” and in some cases do not even require a lot of resources	<input checked="" type="checkbox"/>
III-1_C	Showcase examples of working organisational structures at national level and strategic policy documents supporting the awareness of CC at institutional level	<input checked="" type="checkbox"/>
III-1_D	Other, please specify:	<input type="checkbox"/>

Additional comments if appropriate:

2. Please indicate (by ticking X in the corresponding box) suggestions which could support the setting up of conservation objectives for protected areas taking into account CC. Select one or more of offered options, or describe in your own words:		
III-2_A	Training seminars on practical setting of conservation objectives at site level	<input type="checkbox"/>
III-2_B	Training on how to find, use and interpret data on the vulnerability of ecosystems / species / habitats to CC and how they relate to site- and country-specific contexts	<input checked="" type="checkbox"/>
III-2_C	Other, please specify:	<input type="checkbox"/>
Additional comments if appropriate:		

3. Please indicate (by ticking X in the corresponding box) suggestions which could support the implementation of conservation measures for CC adaptation/mitigation. Select one or more of offered options, or describe in your own words:		
III-3_A	Study tours to sites which already implement conservation measures for CC adaptation/mitigation	<input type="checkbox"/>
III-3_B	Launch of an international knowledge exchange on site management similar to the “new bio-geographical process” in the EU <sup>5</sup> [This also relates to all other points in this section]	<input checked="" type="checkbox"/>
III-3_C	Provide guidance on where to find published materials on adequate management techniques	<input type="checkbox"/>
III-3_D	Other, please specify:	<input type="checkbox"/>
Additional comments if appropriate:		

4. Please indicate (by ticking X in the corresponding box) suggestions which could support the monitoring of management results and the sharing of this information at national and/or international level. Select one or more of offered options, or describe in your own words:		
III-4_A	Seminars aimed to foster the development of monitoring systems of species and habitats	<input type="checkbox"/>
III-4_B	Training on adaptive management planning: how to use monitoring results to review conservation objectives	<input checked="" type="checkbox"/>
III-4_C	Other, please specify:	<input type="checkbox"/>
Additional comments if appropriate:
