CONVENTION ON THE CONSERVATION OF EUROPEAN WILDLIFE AND NATURAL HABITATS

Standing Committee

38th meeting Strasbourg, 27-30 November 2018

Management of protected areas from climate change perspective

QUESTIONNAIRE FOR BERN CONVENTION CONTRACTING PARTIES AND PARTNERS

Document prepared by Mr Otars Opermanis

QUESTIONNAIRE ON MANAGEMENT OF PROTECTED AREAS FROM CLIMATE CHANGE PERSPECTIVE

Addressed to Bern Convention Contracting Parties and Partners

Introduction

In the past decade the effects of Climate Change on biodiversity have been increasingly recognised by the Bern Convention. During this period, several recommendations¹ to Contracting Parties have been endorsed by the Standing Committee to the Bern Convention. Thousands of highly relevant scientific papers and many books have been published. Several of them cover the whole European territory (i.e. climatic atlases such as for birds and butterflies), thus this information is very informative for all European countries, including those outside the European Union. Based on this existing and constantly improving knowledge, many international and national guidelines have been prepared by various governmental and non-governmental institutions.

A special issue is the role of **protected areas** in adapting biodiversity ad its conservation to Climate Change. In the European context, the most relevant and up-to-date guidance to policy makers and site managers is given in the 2013 "Guidelines on Climate Change and Natura 2000". Although this guideline is primarily dedicated to European Union's Natura 2000 network of protected areas, all principles are also applicable to the Emerald Network of sites in the non-EU countries.

Yet, it has been observed that Climate Change adaptation/mitigation measures linked to the management of protected areas have been implemented at different scales with various success in different Contracting Parties to the Bern Convention³. Thus the aim of this questionnaire is to reveal and take stock of particular needs of Contracting Parties for tackling Climate Change in the context of the **management of protected areas**, particularly Emerald Network sites. Based on the answers received from the Contracting Parties to this questionnaire, the Bern Convention Secretariat will assess the needs of Contracting Parties and identify appropriate responses which will provide orientations on how to help countries integrate Climate Change in protected areas management frameworks in a more systematic way.

The questionnaire is addressed to Focal Points to the Bern Convention in all its 51 Contracting Parties. As a minimum one response (i.e. filled questionnaire, representing the institution of the Focal Point) from each country should be returned, but Focal Points are free to distribute this questionnaire further to other institutions if they may have an active position with regards to the subject of Climate Change and protected areas.

This questionnaire does not cover issues related to the constitution of Natura 2000 or the Emerald Network, where the elements of mitigation and adaptation to climate change are embedded in the methodology⁴ of setting-up these networks, namely adressing site size and connectivity between sites (even across country borders) which is discussed in the Biogeographical evaluation seminars or bilateral meetings on network sufficiency for both EU and non-EU countries. But it is assumed that more sites, or adjustments to site boundaries (both under the Natura 2000 or the Emerald networks) in future would be necessary to face Climate change challenges.

| Part I. General indicative self-assessment of progress in the implementation of CC adaptation / mitigation measures linked with protected areas | | |
|---|---|------------|
| | provide score from 0 (no CC related issues were addressed) to 5 (ideal situation both in quality) in the grey area corresponding to each question. | antity and |
| I-1_A | Is the awareness about CC and acceptance that it is unavoidable sufficient/appropriate in your institution? | 5 |
| I-1_B | Are conservation objectives for protected areas developed so as to take into account the species, habitat types and ecosystems which are most likely to be affected by CC? | 0 |
| I-1_C | Are there adequate pro-active conservation measures in place for PAs which take into account CC aspects? | 0 |
| I-1_D | Is the success of conservation measures monitored, and are monitoring results publicly available and taken into account in reviewing conservation objectives and management techniques? | 0 |
| Additiona | al comments if appropriate: | |
| | | |

| Additional questions | | |
|-------------------------------------|--|-----|
| I-1_E | Please provide an indicative coverage of sites (in %) of PA network in your country which have operative management plans in place that are systematically reviewed based on monitoring data: | 47% |
| I-1_F | Are there species and/or habitats or protected areas for which CC effects have been already documented in your country? Please provide a list with comments as appropriate. This is a free text. Where appropriate, please add also links to any relevant publication or web-resource (preferably in English): | NO |
| Additional comments if appropriate: | | |

| 1. Please indicate (by ticking X in the corresponding box) the problems/obstacles in reaching sufficient awareness of CC in your institution. Select one or more of offered options, or describe in your own words: II-1_A | Part II. Specific account of problems and obstacles encountered in the implementation of Climate Change adaptation/mitigation measures linked with the management of protected areas | | |
|--|--|---|-------------|
| II-1_B | | | |
| II-1_C | II-1_A | None | |
| III-1_D There are no documented observations of negative trends of wild species and habitats in your country which can be attributed to CC III-1_E Other, please specify: Cother, please specify: Cother, please specify: Cother, please specify: Cother, please specify: Cother, please specify: Cother, please specify: Cother, please specify: Cother, please indicate (by ticking X in the corresponding box) any obstacles in setting appropriate conservation objectives for protected areas taking into account CC. Select one or more of offered options, or describe in your own words: III-2_A | II-1_B | | \boxtimes |
| II-1_B in your country which can be attributed to CC II-1_E Other, please specify: | II-1_C | | |
| Additional comments if appropriate: 2. Please indicate (by ticking X in the corresponding box) any obstacles in setting appropriate conservation objectives for protected areas taking into account CC.
