Role of the media self-regulatory mechanisms ONLINE? Disinformation & hate speech

I. Different angle(s)?

1. **Disinformation** vs. hate speech?
2. "Information disorder" adapted
3. **Factchecking, debate & media literacy** vs. journalism?

II. Media self-regulatory mechanism **ONLINE**

1. Press Councils & EU approach?
2. Platforms & code of practise?
3. To be followed

III. **Transparency** to build trust and resilience

I. My angle

The screenshot shows the homepage of Faktabaari. At the top, there's a navigation bar with links to 'FAKTABAARISTA', 'KÄSIKIRJA', 'EDU', 'TAPAHTUMAT', 'EN', and social media icons for Facebook and Twitter. A search bar with the placeholder 'Hae' is also present. Below the navigation, there's a large image of a hand holding a magnifying glass over a yellow background with the word 'Totuuus?' (Truth?). To the right of this image is a video thumbnail showing a man speaking at a podium. The main content area features several news cards:

Tackling online disinformation: a European Approach

Tackling related but also different challenges to ease “confusion”

Hate speech

- Illegal (Europe)
- Can be taken down (definition)
- Example: Someturva and legal cases (AI) www.someturva.fi
- EU level 2016
- EMOTIONS!

Disinformation

- Difficult to regulate (freedom of speech)
- Can be limited = educational challenge

Information disorder framework (+ EU)

Mis-information - false information is shared, but no harm is meant.

Dis-information - verifiably false or misleading information that is created, presented and disseminated for economic gain or to intentionally deceive the public, **and may cause public harm**.

Mal-information - genuine information is shared to cause harm, often by moving information designed to stay private into the public sphere.

NEXT STEPS:

On 16 October, representatives of online platforms and the advertising industry presented individual roadmaps to put the Code in practice. These include tools to make political advertising more transparent, training for political groups and election authorities, the installation of European election centres and cooperation with fact-checkers.

Implementation of the Code of Practice on disinformation in view of the EU elections of Spring 2019

By December 2018, the Commission will report on the progress made. The report will also examine the need for further action to ensure the continuous monitoring and evaluation of the outlined actions.

Fact-checkers transparency principles

The commitments of the code of principles

This code of principles is for organizations that regularly publish nonpartisan reports on the accuracy of statements by public figures, major institutions, and other widely circulated claims of interest to society. It is the result of consultations among fact-checkers from around the world and offers conscientious practitioners principles to aspire to in their everyday work.

The commitments that signatory organizations abide by are:

- 1. A commitment to Nonpartisanship and Fairness**

Signatory organizations fact-check claims using the same standard for every fact check. They do not concentrate their fact-checking on any one side. They follow the same process for every fact check and let the evidence dictate the conclusions. Signatories do not advocate or take policy positions on the issues they fact-check.
- 2. A commitment to Transparency of Sources**

Signatories want their readers to be able to verify findings themselves. Signatories provide all sources in enough detail that readers can replicate their work, except in cases where a source's personal security could be compromised. In such cases, signatories provide as much detail as possible.
- 3. A commitment to Transparency of Funding & Organization**

Signatory organizations are transparent about their funding sources. If they accept funding from other organizations, they ensure that funders have no influence over the conclusions the fact-checkers reach in their reports. Signatory organizations detail the professional background of all key figures in the organization and explain the organizational structure and legal status. Signatories clearly indicate a way for readers to communicate with them.
- 4. A commitment to Transparency of Methodology**

Signatories explain the methodology they use to select, research, write, edit, publish and correct their fact checks. They encourage readers to send claims to fact-check and are transparent on why and how they fact-check.
- 5. A commitment to an Open & Honest Corrections Policy**

Signatories publish their corrections policy and follow it scrupulously. They correct clearly and transparently in line with the corrections policy, seeking so far as possible to ensure that readers see the corrected version.
