

Pat Walshe

Pat is a data protection and privacy professional and the managing director of Privacy Matters Ltd. Pat has over twenty-four years' experience in data protection, privacy, telecommunications, information security, interception and disclosure law, data for development, and mobile identity in addition to regulatory policy in the fixed, mobile and Internet sectors.

Pat is passionate about the role of technology and data and the value, opportunities and benefits they bring to individuals, communities and to society. He is equally passionate about mitigating risks to individuals and communities that can arise through digital connectivity, services and data.

Pat has authored and delivers regulatory capacity-building training on data protection and privacy, and also authored global 'Privacy Design Guidelines for Mobile Application Development'.

Pat has a degree in Social Anthropology and Development and holds data protection and information security audit qualifications. He has served on the International Standard Organisation's Privacy Steering Committee and is a member of the British Computer Society. He was also a member of the UN Global Pulse Privacy Advisory Group on big data, sits on the international advisory board for the Adaptive Security and Privacy project and was a member of an external ethics panel for a leading mobile operator on the use of big data for development. Pat was made a Privacy by Design Ambassador by the Ontario Information and Privacy Commissioner in 2013. He is currently a member of the Advisory Council of Defenddigitalme, an NGO leading on the protection of privacy for children in education in England (<https://defenddigitalme.org>)
