

Question	Answer
<p>Based on our readings, the Tender requirement:</p> <p>"Moreover, based on the findings of these analyses, the provider shall produce recommendations for optimization of the IT infrastructure of the SFMS and shall present them to the beneficiary institution"</p> <p>cannot be fulfilled according to the submitted tender documentation, because generally accepted concept of the IT infrastructure is way wider than the scope of the project. Please confirm that the above-mentioned requirement to submit recommendations for optimization of the IT infrastructure of the SFMS are strictly limited to the Central Data Warehouse software requirements and requirements to the IT applications that interact with the Central Data Warehouse.</p>	<p>The specific provision in the Terms of Reference of the Act of Engagement should be understood in conjunction with the sentence by which it is followed, so that jointly they read:</p> <p><i>"Moreover, based on the findings of these analysis, the provider shall produce recommendations for optimization of the IT infrastructure of the SFMS and shall present them to the beneficiary institution. These recommendations shall refer, but not be limited to: the database structure of the central data storage facility, the functioning of the central data repository, and the relevant technologies and applications used by the SFMS, as well as the technologies and software for data analysis"</i></p> <p>A detailed list of deliverables to be produced this procurement procedure is provided under the heading "Deliverables" in the Terms of Reference section of the Act of Engagement that has been published with the Tender File.</p>
