## 1. Judicial organisation in Portugal

Under the Portuguese Constitution, there are two set of courts: judicial courts, which have general jurisdiction in civil/commercial and criminal matters and encompass specialised courts, and administrative and tax courts, whose role is to settle disputes arising out of administrative and tax relations. These latter are specialised in this domain only. The ordinary justice administration in Portugal is organised on a three-level structure which includes: 145 first instance courts of general jurisdiction, 5 courts of appeal and the Supreme Court of Justice. The administrative justice which is autonomous, i.e. independent from the civil justice, is organised on a three-level structure which includes: 17 Administrative and Tax courts (first instance), the Central Administrative Court and the Supreme Administrative Court.

### Distribution of general courts in Portugal

According to 2020 data, the distribution between 1st instance and higher instances courts of general jurisdiction in Portugal is 96% - 4% that is different from EU median of 87% - 13% that is the EU calculated tendency.

### Evolution of number of first instance courts in Portugal

	Geographic locations	Legal entities	
		General jurisdiction	Specialised jurisdiction
2012	318	231	102
2013	319	231	102
2014	253	292	248
2015	253	292	248
2016	253	292	245
2017	312	150	411
2018	312	150	411
2019	316	145	435
2020	328	145	436

As regards geographic locations, the recent amendments to the Law of the Organisation of the Judiciary System (Law n.º 19/2019, 19th February) are intended to ensure the reciprocal proximity of justice and citizens in two key segments: criminal jurisdiction and family and minors jurisdiction. These new amendments aim to facilitate people's access to courts and combat the desertification of the interior regions of the country. The difference in the number of geographic locations between 2019 and 2020 is justified by the increase in new buildings.

As regards legal entities, the decrease of the total number of first instance courts of general jurisdiction is accompanied by an increase of certain types of first instance courts. First instance administrative and tax courts have been included in the total (418 judicial courts + 17 administrative/tax courts). First instance courts of general jurisdiction are Courts of general jurisdiction and proximity divisions. Second instance courts of general jurisdiction are 2nd Instance Courts (Tribunal Relação de Lisboa, Coimbra, Porto, Évora e Guimarães). Highest instance courts of general jurisdiction is the Supreme Justice Court.

The differences registered in 2018 resulted from the changes to the judicial organisation (Law n. 40-A/2016, 22 December) in force since January 1, 2017. In January 2017, changes to the judicial organization were put in place and the number of 1st instance courts with general jurisdiction decreased due to the increase of specialised courts.

Distribution of first instance general jurisdiction and specialised courts

The distribution between number of general jurisdiction courts and specialised courts of 25,0% - 75,0% is quite different from the EU median (distribution tendency in EU: 75,5% - 24,5%).

«Internet related disputes»: only for Internet domain system (DNS) issues, which are under the jurisdiction of the Intellectual Property Court; for all other Internet related issues, general jurisdiction courts are competent. It should be noted that internet related disputes were not included in the number of specialised courts for previous cycles.

According to 2020 data, the absolute gross salary of a judge at the begining of a career in Portugal of 48 055€ is around the EU median when compared to the EU median of 51 946€. As a ratio with the annual average salary of the country, the salary for a judge at the begining of career is: 2,66 compared with EU median of : 2,02.

It should be noted that the net annual salary depends on various factors: personal tax situation; other personal revenues. It would not be accurate to provide a number under this category.

The increase of salaries resulted from the revision of the statute of judges and prosecutors. It is noteworthy that the Source of data is the Directorate-General for the Administration of Justice and the High Council for the Judiciary.

### 3. Legal aid and court fees in Portugal

In Portugal, legal aid includes:

- Coverage of court fees: 
- Exemption from court fees: 

It should be stressed that in Portugal, legal aid includes:

- Total or partial exemption from court fees and other charges relating to the proceedings;
- Deferment of payment of court fees and other charges relating to the proceedings;
- Appointment and payment of the legal representative's fees, or alternatively, payment of fees to the legal representative chosen by the applicant.

In Portugal, legal aid is available for :

- > Representation in court:
  - Criminal cases 
  - Other than criminal cases 
- > Legal advice, ADR and other legal services:
  - Criminal cases 
  - Other than criminal cases 
- > Fees related to enforcement of judicial decisions as fees for enforcement agents (Q18) 
- > Other costs than above (Q19) 

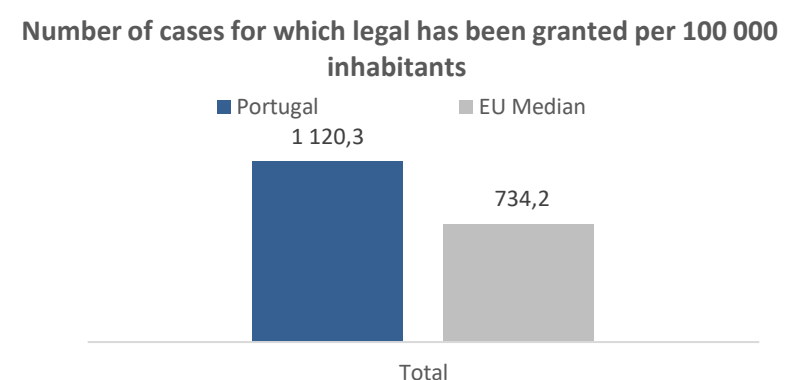

The Portuguese law foresees the total or partial exemption from court fees and other expenses related to the case, such as fees for the enforcement of judicial decisions.

Legal aid may also include fees of technical advisors or experts, costs of other legal professionals (notaries) and travel costs. In addition, all applications, certificates and any other documents requested for legal protection purposes are exempt from taxes, fees and charges.

#### Number of cases for which legal aid has been granted

Absolute number (in 2020)	Total	Cases brought to court	Cases not brought to court
<b>Total</b>	115 349	113 642	1 707
<b>In criminal cases</b>	NA	NA	NA
<b>In other than criminal cases</b>	NA	NA	NA

<b>Total</b>	1 120,3	734,2
<b>In criminal cases</b>	NA	330,9
<b>In other than criminal cases</b>	NA	402,7

It should be pointed out that the reduction in the number of total legal aid cases may be the result of the measures taken during the COVID pandemic: on the one hand, the suspension of court deadlines and the expiry and prescription periods, and on the other hand, the reduction of conflicts as a result of the confinements. In any case, it should be emphasized that this is merely a perception, since there are no tools to perform a sociological analysis of the requests.

#### Timeframes of the procedure for granting legal aid (in relation to the duration from the initial legal aid request to the final approval of the legal aid request)

- Maximum duration prescribed in law/regulations: 30
- Actual average duration: 100

In Portugal, the maximum duration of the procedure for granting legal aid is 30 days (article 25 (1) of Law No. 34/2009, of 29 of July). Regarding the actual average duration, it should be noted that in the context of the COVID-19 Pandemic, procedural deadlines were suspended, which has influenced the duration of the procedural timeframes.

#### 4. Performance of courts in Portugal

• **Efficiency indicators**

- Clearance Rate (CR) and Disposition Time (DT)

The Clearance Rate shows the capacity of a judicial system to deal with the incoming cases. A Clearance Rate of 100% and higher does not generate backlog.

The Disposition Time determines the estimated number of days necessary for a pending case to be solved in a court.

**First instance Total of other than criminal cases**

Total number on "other than criminal cases" is not available because the new regime for the enforcement action in Portugal foreseen by the new Code of civil Procedure that entered into force in 2013 is not implemented.

It is noteworthy that before 2015, data concerning the total of “other than criminal law cases” did not include administrative law cases. Since 2015, administrative law cases are included in the total which explains the significant increase of cases.

**First instance Civil (and commercial) litigious cases**

- Incoming, resolved and pending cases

The number of incoming cases in 2020 in Portugal (2,47 per 100 inhabitants) is significantly above EU median (1,56 per 100 inhabitants).

The number of resolved cases in 2020 in Portugal (2,42 per 100 inhabitants) is significantly above EU median (1,50 per 100 inhabitants).

The number of pending cases at the end of 2020 in Portugal (1,85 per 100 inhabitants) is significantly above EU median (1,05 per 100 inhabitants).

- Clearance Rate and Disposition Time

Civil (and commercial) litigious cases	CR (%)	DT (days)
2012	97,7%	369
2013	103,2%	386
2014	NA	NA
2015	116,3%	315

2018	109,2%	229
2019	105,0%	200
2020	97,8%	280

With a Clearance Rate calculated at 97,8% in 2020, Portugal seems to face some difficulties to deal with its civil and commercial litigious cases.

Between 2019 and 2020, the Clearance Rate has decreased by -7,2 points.

In 2020, the civil and commercial litigious cases are solved in approximately 280 days, which is somewhat above EU median of 221 days.

The analysis of the 2019 - 2020 period reveals a 39,7% increase of the Disposition Time.

In Portugal, there are 33 923 civil and commercial litigious cases older than 2 years. This is 17,8% of the total number of pending cases at the end of the year

“Civil (and commercial) litigious cases”, includes the case-flow of civil justice, labour justice and juvenile justice. It does not include civil and labour enforcement cases

The decrease in the number of Civil (and commercial) litigious cases reflects the effects of the Covid 19 pandemic and the consequent lockdown, that had an impact on the functioning of the courts, considering that in certain periods face-to-face services have been interrupted or conditioned.

First instance Administrative cases

◦ Incoming, resolved and pending cases

The number of incoming cases in 2020 in Portugal (0,20 per 100 inhabitants) is somewhat below EU median (0,30 per 100 inhabitants).

The number of resolved cases in 2020 in Portugal (0,25 per 100 inhabitants) is slightly below EU median (0,26 per 100 inhabitants).

The number of pending cases at the end of 2020 in Portugal (0,59 per 100 inhabitants) is well above EU median (0,21 per 100 inhabitants).

◦ Clearance Rate and Disposition Time

2014	NA	NA
2015	79,8%	989
2016	111,5%	911
2017	105,0%	988
2018	111,0%	928
2019	106,2%	846
2020	126,1%	847

With a Clearance Rate calculated at 126,1% in 2020, Portugal seems to be well able to deal with its administrative cases.

Between 2019 and 2020, the Clearance Rate has increased for 20,0 points.

In 2020, the administrative cases are solved in approximately 847 days, which is well above EU median of 388 days.

The analysis of the 2019 - 2020 period reveals a 0,2% increase of the Disposition Time.

The number of administrative law cases older than 2 years is not available.

“Administrative law cases” includes administrative and tax cases. In respect of tax cases, the following information has been communicated: Pending cases on 1 January: 44 542, Incoming cases: 44 329, Resolved cases: 48 704, Pending cases on 31 December : 40 167.

In fact, in 2020 there were 68 467 incoming administrative cases and 73 880 resolved cases. However, of these totals, only 20 731 incoming cases and 26 144 resolved cases corresponded to real movements of the beginning and end of cases. The remaining 47 736 cases refer to cases that were internally transferred between units, namely due to the establishment of specialised courts in September 2020 (which are not independent legal entities), or that were subject to changes in the subject matter. Considering that in 2020 the number of cases transferred between organizational units was very high in the first instance administrative and tax courts, for this cycle only the numbers of cases opened and closed are indicated, without including transferred cases. In previous editions, the figures included transferred cases, which could impair the comparative reading.

Insolvency cases

◦ Clearance Rate and Disposition Time

Insolvency cases	CR (%)	DT (days)

2013	100,0%	79

2018	102,5%	53
2019	101,2%	47
2020	99,2%	59

The Clearance Rate was calculated at 99,2% in 2020 for insolvency cases, Portugal seems to face some difficulties to deal with its insolvency cases.

Between 2019 and 2020, the Clearance Rate has decreased by -2,0 points.

In 2020, insolvency cases are solved in a approximately 59 days, which is significantly below the EU median of 281 days.

The analysis of the 2019 - 2020 period reveals a 26,1% increase of the Disposition Time.

Since 2007, statistical data concerning pending cases in 1st instance judicial courts are collected through the courts information systems. Being dynamic systems, allowing regular corrections and up-dating, the data collection may lead to oscillation data from previous years resulting in variations in pending cases.

The number of pending insolvency cases as of January 1, 2020 has decreased compared to the number of cases pending as of January 1, 2018, as the number of cases completed in 2018 and 2019 was relatively higher than the number of cases entered in those years.

• First instance Criminal Law Cases

The number of total incoming criminal cases in 2020 in Portugal (0,62 per 100 inhabitants) is significantly below EU median (1,60 per 100 inhabitants).

The number of total resolved criminal cases in 2020 in Portugal (0,58 per 100 inhabitants) is significantly below EU median (1,48 per 100 inhabitants).

The number of total pending criminal cases at the end of 2020 in Portugal (0,44 per 100 inhabitants) is slightly below EU median (0,46 per 100 inhabitants).

◦ Clearance Rate and Disposition Time

Total criminal law cases	CR (%)	DT (days)
Total	93,5%	280
Severe criminal cases	93,0%	317
Misdemeanour and/or minor cases	89,5%	196
Other cases	99,5%	80

With the Clearance Rate calculated at 93,5% in 2020 for total criminal cases, Portugal seems to encounter difficulties in dealing with its total criminal cases.

In 2020, criminal law cases were solved in approximately 280 days, which is well above EU median of 139 days.

Total criminal law cases: the number of resolved cases between 2018 and 2020 is justified by the decrease in court activity in the year 2020 due to the Covid-19 pandemic situation.

Misdemeanour and / or minor criminal cases: the decrease in the number of incoming and resolved cases between 2018 and 2020 is justified by the decrease in court activity in the year 2020 due to the Covid-19 pandemic situation. Still, the number of cases pending on January 1, 2020 reduced compared to the number of cases pending on January 1, 2018, since the number of cases completed from 2018 to 2019 was relatively higher than the number of cases entered in those years. It is noteworthy that misdemeanour cases are never brought to high instance courts.

Other criminal cases: the increase in the number of pending cases older than 2 years in 2020 compared to 2018 may be related to reduced court activity in the year 2020 due to the Covid-19 pandemic situation.

Overall efficiency by instance and by case matter

	CR (%)			DT (days)		
	1st instance	2nd instance	Supreme Court	1st instance	2nd instance	Supreme Court
Civil and commercial litigious cases	97,8%	107,6%	89,2%	280	99	126
Administrative cases	126,1%	92,4%	120,5%	847	877	291
Total criminal law cases	93,5%	101,3%	98,2%	280	142	67

Concerning the first instance and the Supreme Court, the Clearance rate is above the 100% threshold only in respect of administrative cases. As regard second instance, the Clearance rate is below the 100% threshold only for administrative cases.

As to the Disposition Time indicator, in civil cases, the Portuguese value is above the EU median only for first instance (the EU median being 221 days). As regards administrative cases, this indicator is beyond the EU median at all instances. In criminal law cases, the Portuguese value is below the EU median only with regard to last instance (the EU median being 120 days). As a matter of fact, at second instance level in Portugal, the length of administrative proceedings is quite longer compared to the length of civil and criminal proceedings which Disposition Time indicators are respectively 99 days (the European median being of 177 days) and 142 days (the European median being of 101 days).

As regards administrative cases: the increase in the number of cases completed between 2018 and 2019 may be justified by the increase in the number of judicial magistrates working in these courts. Even so, despite this increase in cases completed, there was an increase in the number of cases pending on January 1, 2020 compared to the number of cases pending on January 1, 2018, considering that the number of cases completed from 2018 to 2019 was still relatively lower than the number of cases entered in those years.

As regard second instance criminal cases, when courts handle appeal cases, it is not possible to separate appeals that had in their origin a criminal case or a misdemeanor case.

In respect of the Supreme Court of Justice, it should be noted that there was an increase in the number of cases pending from 2018 to 2020, considering that the number of cases that ended from 2018 to 2020 was relatively lower than the number of cases brought in those years. The rise in the number of pending cases in the year 2020 is also partly explained by the decrease in court activity in the year 2020 due to the Covid-19 pandemic situation.

5. Public prosecution services in Portugal

• Role and powers of the public prosecutor

In the criminal procedure, the public prosecutor in Portugal has the following 10 out of 11 possible roles and powers:

To conduct or supervise police investigation	✓	To appeal	✓
To conduct investigations	✓	To supervise the enforcement procedure	✓
When necessary, to request investigation measures from the judge	✓	To discontinue a case without needing a decision by a judge	✓
To charge	✓	To end the case by imposing or negotiating a penalty or measure without requiring a judicial decision	✗
To present the case in the court	✓	Other significant powers	✓
To propose a sentence to the judge	✓		

The Public Prosecution Service is the organ responsible for the penal action, intervening in all procedural stages in compliance with the principle of lawfulness. It is of its competence to receive denunciations/complaints/penal notifications and decide on their follow up; to lead the stage of inquest; to deduce accusation and to support it in trial; to present appeals; to promote the enforcement of the applied sentences.

As to the possibility to close a case without a judicial decision, the management of the inquest is of its sole responsibility (the intervention of the judge, at this stage, is exceptional and is limited to certain actions concerning the rights, freedoms and guaranties of citizens). The case should be filed in the presence of enough proof that the crime was not committed nor the defendant has committed it, that the procedure is legally admissible (namely due to the prescription of the penal procedure), or in the cases where it was not possible to obtain enough evidence that the crime occurred or of who committed it. However, the decision to file is liable of being verified judicially whenever the defendant or the assistant request the opening of the stage of finding of facts (optional), which falls under the jurisdiction of the judge.

As for the impossibility of the Public Prosecution to close the case, without a court decision, due to the imposition of a penal measure, once the investigation has ended and once enough evidence has been collected as to the fact that a crime has been committed and as to who was the perpetrator, there are alternative mechanisms to the deduction of the accusation. Namely, the Public Prosecution Service may decide on the temporary suspension of the case (conditioned to the fulfillment by the defendant of several payment orders) but this always depends on the agreement of the defendant, of the assistant (in case there is one) and of the judge.

The category "other significant powers" encompasses arrests of suspects in situations of flagrante crime and conduct of house and office searches.

The public prosecutor also has a role in civil, administrative and insolvency cases.

- In general, it is particularly incumbent on the Public Prosecution Service (PPS):
- (i) to represent the State, the Autonomous Regions and the local authorities (at their request), minors, adults with incapacity/accompanied adults (persons under “guardianship”/ accompanying measures) and those whose whereabouts are unknown;
  - (ii) to defend the collective and diffuse interests in the cases falling within the law (such as public health, environment and cultural heritage);
  - (iii) to uphold the independence of the courts within its powers and to insure that the jurisdictional duties are carried out pursuant to the Constitution and the laws applying thereto;
  - (iv) to promote the enforcement of court decisions within its powers.

Its intervention is subordinated to the defense of the public interest, whether it acts in representation or based on its powers and own initiative.

In the civil area, the PPS intervenes actively in domains such as: proceedings regarding diffuse interests; claims and/or enforcement proceedings concerning civil non-contractual liability issues deriving from unlawful or lawful acts; proceedings in case of estate in abeyance; proceedings regarding the legality of statutes of non-profit legal persons; proceedings for nullity of horizontal property incorporation deeds; debt recovery proceedings.

In the area of family and children, the PPS intervenes in cases where the maternity and/or paternity of the minor is not established, being responsible for instructing unofficial investigation proceedings, proposing judicial actions and monitoring them in court.

In the field of civil measures, PPS proposes, on behalf of minors, actions to regulate the exercise of parental responsibilities, to amend regulations already established, in addition to deducting incidents of non-compliance in cases of non-compliance with the provisions regarding residence, maintenance or contacts/visits, among others. It also has an important role on adoption procedures.

The current system for the protection of children and young people in danger gives the PPS the power to monitor and supervise the activities of protection commissions, assess the legality and adequacy of their decisions and promote adequate judicial procedures.

In terms of educational protection, when a minor aged between 12 and 16 years practices a fact qualified by law as a crime, it is the responsibility of the PPS to initiate the investigation phase and direct it and, in the end, the case if justified, request the opening of the jurisdictional phase.

In insolvency proceedings, the PPS represents the State and the workers (regardless of their socioeconomic status and nationality and as an alternative to a lawyer). In the labour area, in addition to the representation of workers, it is also the responsibility of the PPS to control the legality of the constitution and statutes of trade union and employer associations and workers' committees.

With regard to administrative cases, the PPS represents the State in cases where property and non-property interests are at stake (e.g public health, environment, town and territorial planning).

It should be pointed out that the data indicated in the category "number of processed cases" corresponds to the total number of criminal cases at the investigation stage that have been closed.

The Public Prosecutor's Office closes the inquiry as soon as it has gathered sufficient evidence that no crime has been committed, that the defendant has not committed it or that the procedure is legally inadmissible.

The Public Prosecutor's Office also closes the inquiry if it has not been possible to obtain sufficient evidence that a crime has been committed or who the perpetrators were.

Besides, since the registration is not mandatory, there are also some mediators that are not registered and may practice court-related mediation.

The details of the calculation are given in Annex 5 - IT calculations

The result by area may be summarized in these graphics, where each field has been evaluated from 0 to 4 points.

*Note: index is modified based on the available questions. This cycle the recalculation was made for the last three cycles to be able to follow the development.*

ICT tools assessment from 2018 to 2020

#### Comments on voice recording tools

Concerning the voice recognition feature, there was a pilot projetct ongoing in the previous evaluation cycle, but it still wasn't implemented. Portugal is currently working to implement tools for Automatic Speech Recognition.

#### Comments on CMS

In the previous cycle (2019 data) some SIEJ (BI) implementation may have been considered. However, regarding the Courts there is no BI involved, but rather an extraction process, defined by protocol with the Directorate-General of Justice Policy.

#### Comments on measurment tools on workload

There is no specific general management tool to access the workload of non-judge staff/non prosecutor staff. The information is collected directly from the case management system and then it is organized by the General Directorate of Administration of Justice/Ministry of Justice.

#### Comments on communication tools

For the moment, in Portugal it is not foreseen to expand electronic communication to judicial experts.

## 8. Systems for measuring and evaluating the performance of courts and public prosecution services in Portugal

In Portugal, quality standards are determined for the judicial system at national level (e.g. quality systems for the judiciary and/or judicial quality policies). Specialised personnel within the public prosecution services is entrusted with implementation of these national level quality standards.

Law on the organisation of the judicial system (Law 62/2013 of 26 August) sets out that the High Council for the Judiciary and the Prosecutor-General, in liaison with the member of Government responsible for the justice, establish, within their respective competences, the strategic objectives for first instance courts for a three-year period. These entities are also responsible for setting, every year, the strategic objectives of first instance courts for the following judicial year.

Taking into account the results obtained in the previous year and the strategic objectives formulated for the subsequently year, the president of the court and the public prosecutor coordinator, after hearing the judiciary administrator, articulate proposals for the procedural objectives for each court. This system, very recent, is currently being implemented, subject to improvements, and only covers civil and commercial cases.

In respect of quality standards determined for the judicial system at national level, for instance, the Prosecutor General's Directives and Instructions define good practices of functional performance at national level and their compliance may be viewed an indicator of the quality of the work developed (example, Directive 5/2019, on acting in cases of domestic violence (<https://dre.pt/home/-/dre/126870404/details/maximized> - text in Portuguese).

In addition to Directives and Instructions, the performance assessment system for prosecutors is based on quality criteria/performance parameters, as a rule, uniformly applied at national level.

As regards specialised personnel entrusted with implementation of these national level quality standards, the High Council of the Public Prosecution Service has “inspectors” (“inspctores”) who assess the quality of the work carried out by the prosecutors, applying national quality criteria or standards.

### • Systems for measuring and evaluating courts' performance

A regular monitoring system of court activities is in place concerning:

Number of pending cases	✓	Appeal ratio	✗

Productivity of judges and court staff	✓	Disposition time	✓
Satisfaction of court staff	✗	Other	✗

In 2020, the option "satisfaction of users" has been included because one of the tasks of the president judge of the court is to monitor and evaluate the activity of the court, in particular the quality of the justice service provided to citizens, taking into account particular complaints or responses to satisfaction questionnaires (article 94 of Law 62/2013, 26th August, on the judicial organization).

In Portugal, there is a system to regularly evaluate the court performance based primarily on defined indicators and the frequency of the reporting is annual.

It should be mentioned that besides an annual report, there are also a trimestral and semestral statistics to evaluate judge's performance. Furthermore, regarding the Administrative and Tax Courts, the reports are semestral.

Performance and quality indicators are defined for the activity of each court.

The following indicators are used:

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the courts)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✗
Number of resolved cases	✓	Number of appeals	✗
Number of pending cases	✓	Appeal ratio	✗
Backlogs	✓	Clearance rate	✓
Productivity of judges and court staff	✓	Disposition time	✓
Satisfaction of court staff	✗	Other	✗

The evaluation of the courts' activities is used for the later allocation of means in the courts.

• Systems for measuring and evaluating public prosecution services' performance

A regular monitoring system of public prosecution services activities is in place concerning:

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the public prosecution)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✗
Number of resolved cases	✓	Clearance rate	✓
Number of pending cases	✓	Disposition time	✓
Backlogs	✓	Percentage of convictions and acquittals	✓
Productivity of prosecutors and prosecution staff	✓	Other	✗
Satisfaction of prosecution staff	✗		

For this cycle, the clearance rate and disposition time indicators were included because one of the tasks of the public prosecutor coordinator is to monitor and evaluate the activity of the public prosecutors services, including the efficiency of procedures (Article 101 of Law 62/2013, 26th August on judicial organization).

In Portugal, there is a system to evaluate regularly the activity of each public prosecution service and the frequency of the reporting is annual.

Performance and quality indicators are defined for the activity of each public prosecution service.

The following indicators are used:

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the public prosecutors)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✗
Number of resolved cases	✓	Clearance rate	✓
Number of pending cases	✓	Disposition time	✗
Backlogs	✓	Percentage of convictions and acquittals	✓
Productivity of prosecutors and prosecution staff	✓	Other	✗
Satisfaction of prosecution staff	✗		

The evaluation of the public prosecution services' activities is used for the later allocation of means in the public prosecution services.
