# About APWG

APWG is a non-profit worldwide coalition aimed at unifying the global response to cybercrime through development of data resources, data standards, model response systems and protocols for private and public sectors.

 <https://apwg.org> | <https://apwg.eu>

## Research

- eCrime Exchange platform & Reports
- R+D projects
  - TRUESSEC, VIVET, **LOCARD**
- Events
  - Symposium on Electronic Crime Research
  - EU Symposium on Electronic Crime Research

## Education

- Events
  - Symposium on Global Cybersecurity Awareness
- Global online safety awareness campaign: STOP.THINK.CONNECT

LOCARD presents the ultimate solution of accommodating **independent users, jurisdictions, territories and global regulation**, together with **high security** demands.

- 1st May 2019 – 30 April 2022
- 6,843,385.00€
- 19 partners
- H2020-SU-SEC-2018-2019-2020

# The LOCARD Project - Boundaries

## 1- Collection of the Digital Evidence

Research on Blockchain: Studying how to support **scalability** and **efficiency** through strong policy management and smart contracts.

Hyperledger Fabric

## 3- Reporting of the Evidence

Legal-Admissibility:  
 Follows national / international standards, laws and methodologies for the chain of custody

## 2- Identification and Analysis

# Is Blockchain a New Technology?

1991

Stuart  
Haber

Scott  
Stornetta

Proposed a system to prevent timestamps on documents from being modified.

2009

*Satoshi Nakamoto* deployed the first public blockchain when he invented Bitcoin in 2009.

# Smart contracts

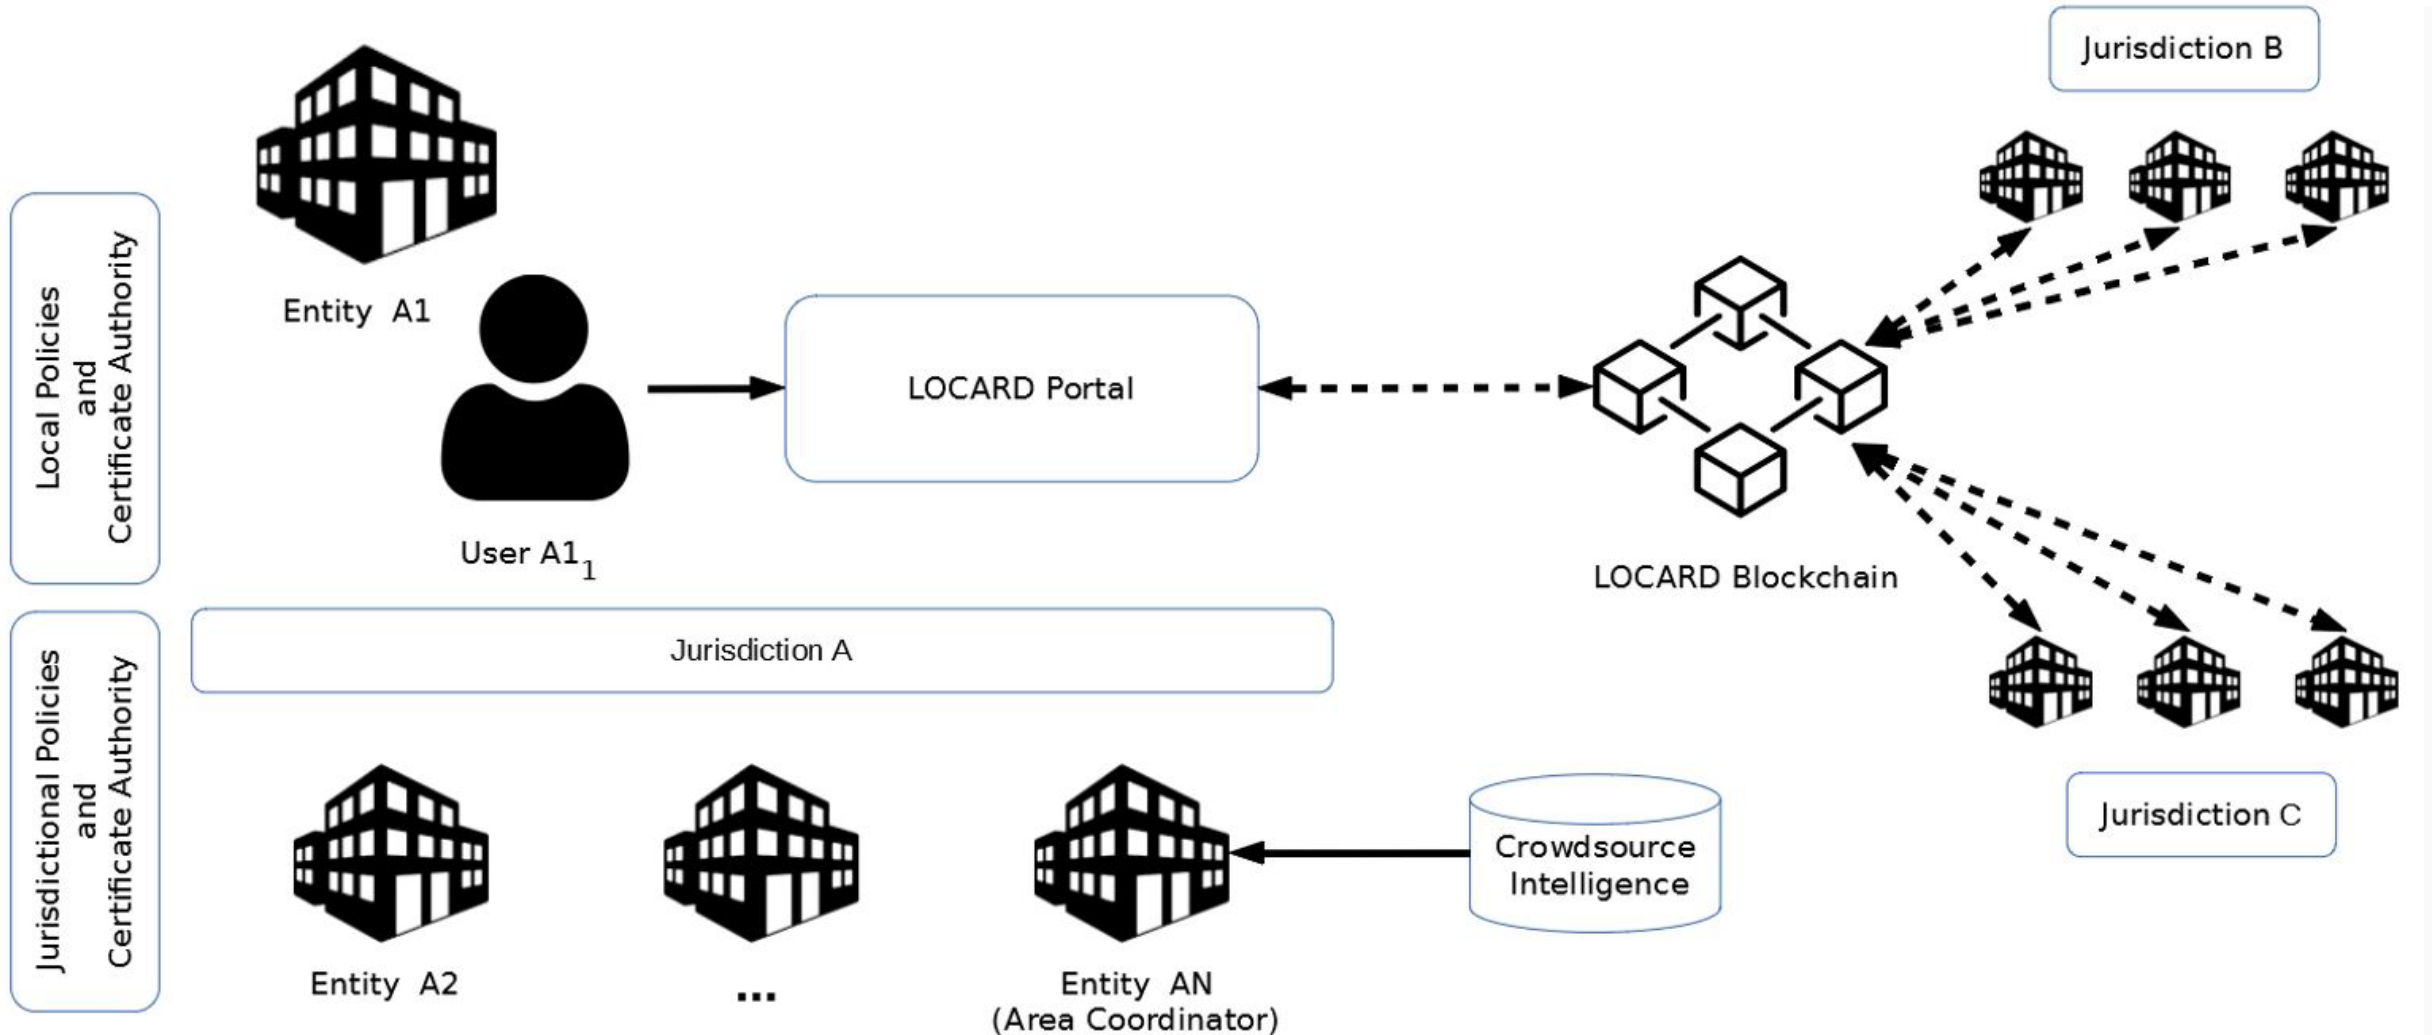

An smart contract is a tiny computer program that is stored **inside a blockchain**. They are like contracts in the real world but completely digital.

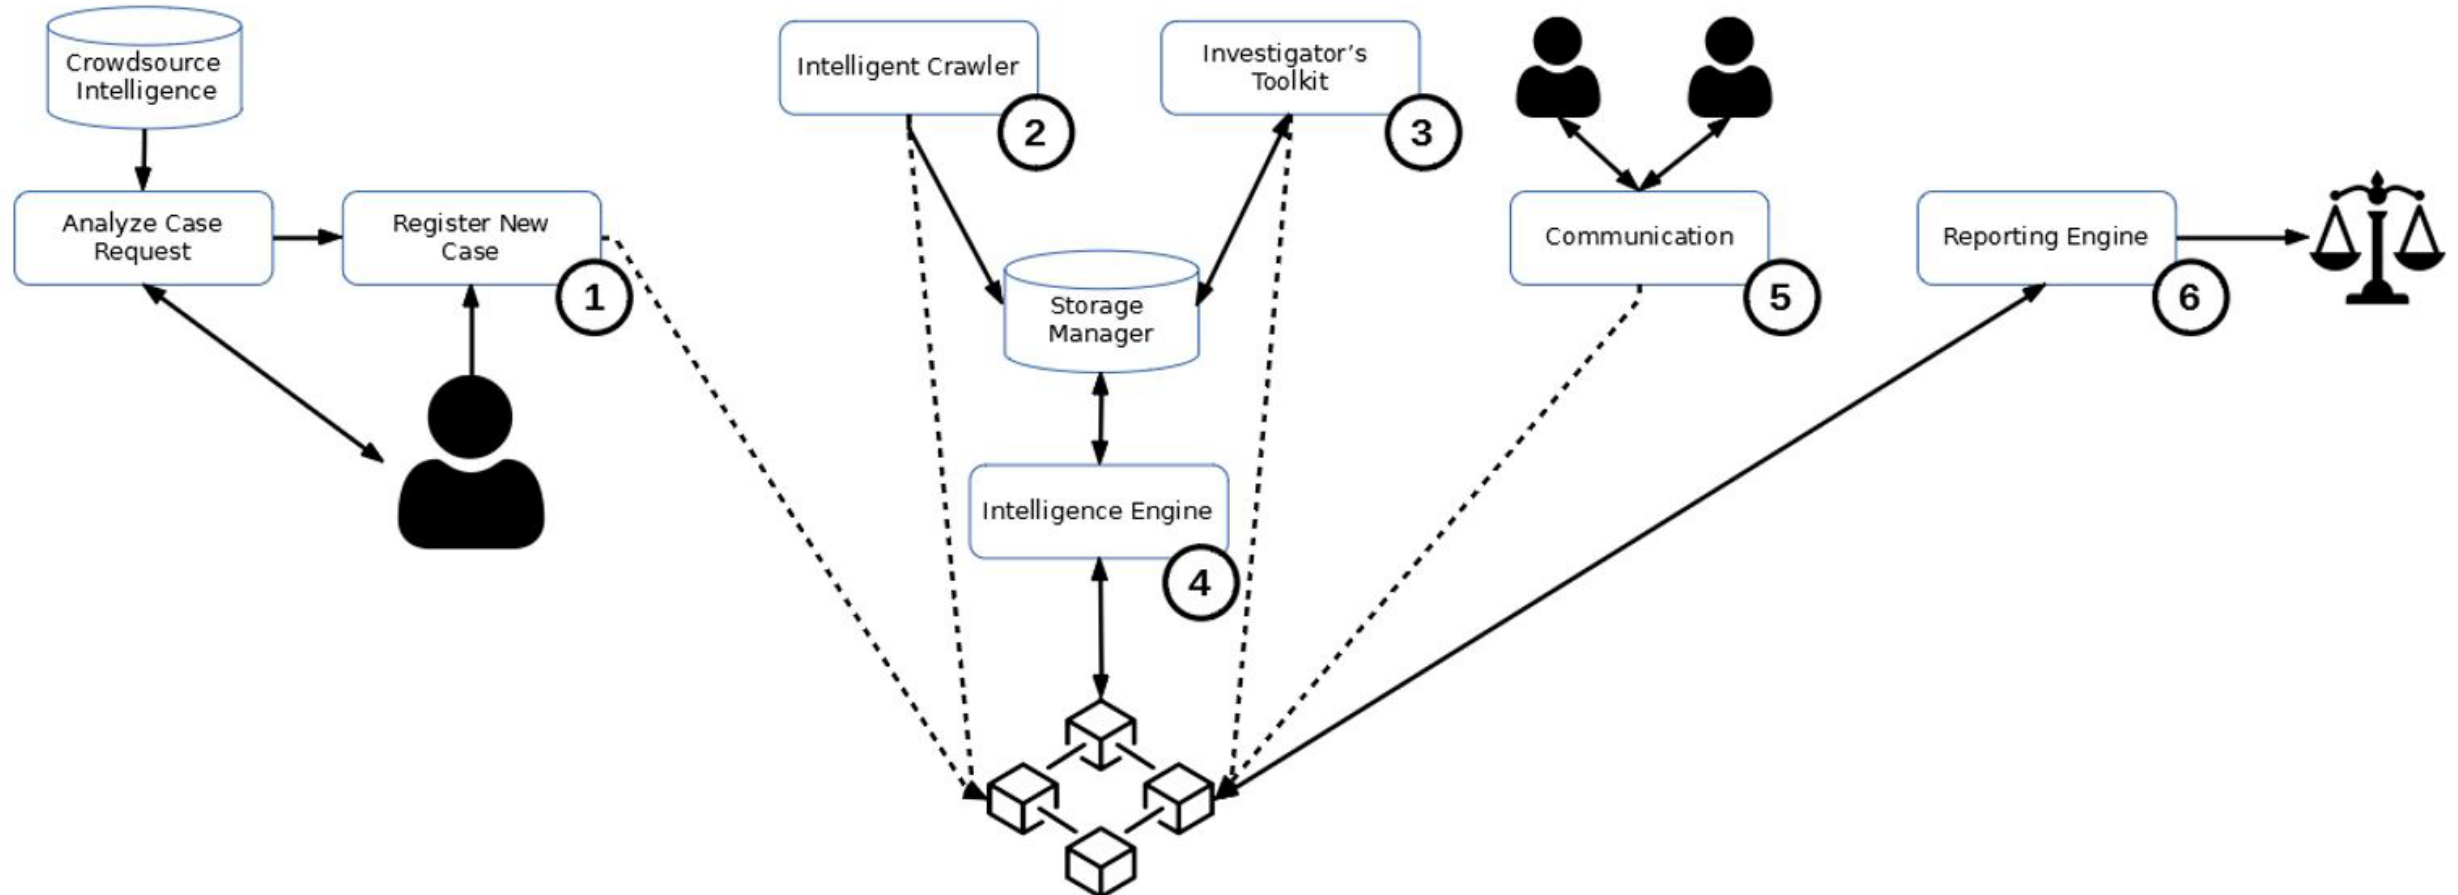

**Immutable:** it can never be changed

**Distributed:** the output of the contract is validated by everyone

# The LOCARD Project - High-level Architecture

# The LOCARD Project - Forensic Flow

# The LOCARD Project - Tools

Device Message  
Hijack Investigation

Spyware

SMS-Based Forge ID

Vulnerable App  
Identification

DNS Data  
Exfiltration

Harward OS

Deviant Behaviour

Use of Machine Learning to detect potential pedophile behaviour in Social Networks.
