This study was funded by the European Union and the Council of Europe. It was conducted by the authors under contract No. 264/2016 (Research projects based on SPACE I and SPACE II) with the Action against Crime Department, Information Society and Action against Crime Directorate, DGI - Directorate General Human Rights and Rule of Law of the Council of Europe, in the framework of EU (PA Grant Agreement) No. JUST/2016/JCOO/AG/COEU. The study also received financial support from the University of Lausanne.

Country-based information on penal institutions and prison populations was collected through questionnaires sent to the prison administrations of the member states of the Council of Europe. The information collected was analysed by the authors of the study.

This publication is divided into four parts across two volumes. Parts 1 to 3 are presented in volume 1; Part 4 is presented in this volume.

Sourcebook of prison statistics

Methodology of the Sourcebook of prison statistics

This volume presents the data received from the prison administrations of the 47 member states of the Council of Europe, as well as the rates, ratios and percentages computed by the authors of this study, which were used to produce the figures included in volume 1 of this publication. The data are presented by country, in alphabetical order. For each prison administration of each country there are two tables. The first presents the absolute numbers, and the second the percentages and rates.

The database used to produce the tables included in this Volume drew primarily on the data received from the prison administrations for each annual SPACE report from 2005 to 2015, and was completed with data from other sources such as Eurostat and the *World Prison Brief*, as well as figures provided by criminologists specialised in prisons, including our much-appreciated colleague Roy Walmsley. That database was updated with the data provided by the national correspondents who participated in this research. For some countries and some indicators, this led to a modification of the whole series, although in most cases only a few years were modified. The cells that contained new or updated data are coloured in green.

Due to the structure of the SPACE reports, which collect stock indicators for one year but flow indicators for the previous one, the series presented in these tables cover the period 2005 to 2015 for stock indicators and 2004 to 2014 for flow indicators. The goal of the research was to establish time series covering these 11 years for all the indicators included in the tables, including those that were incorporated to the SPACE questionnaire after 2005. However, at the end of data collection, some figures were still missing and a few other seemed unreliable because they were too high or too low compared to the data for the rest of the series. In the second case, the unreliable data is highlighted in red. In the first case, when up to three values were missing in the middle of the series, they have been estimated using linear interpolation and they are presented in light blue coloured cells. Linear interpolation was also used to estimate the figure for 2005 when it had not been provided by the country but there were data available for 2006 and 2004 (from the 2004 SPACE I report). Interpolation was not performed when one of the figures included in the formula seemed unreliable. All the new, updated and interpolated figures were introduced in the series of tables that include the absolute numbers, and they were then used to compute the percentages and rates presented in the second series of tables

Table 4. A summarises the codes and colours used to indicate the particularities and sources of the data included in the tables of this Volume.

Table 4.A. Legend of colours and sources used in the tables presented in Part 4

	New or updated data provided by the national correspondents for this study
	Interpolation
	Calculations made by the authors of this study
	Data not asked for in the SPACE survey of that year (relevant item added later to the SPACE questionnaire)
	Missing data
Data in orange – Source: World Prison Brief at www.prisonstudies.org (since 2011)	
Data in red – Data seem unreliable (usually because it is inconsistent with the data provided for the remaining years)	
Additional sources and specific calculations apply to Bulgaria, Greece, Latvia, the Slovak Republic, Slovenia and Spain. They are explained in the notes to the relevant tables.

How many inmates are held in European prisons? Among them, how many are women? How many are foreign citizens? How many are not serving a final sentence? How many people enter prison every year, and how long do they remain there? Are there enough places for all of them? What is the ratio of inmates per member of prison staff? How much do prisons cost?

If you are looking for the data necessary to provide answers to these and many other similar questions, this is the book for you. The Sourcebook of prison statistics compiles absolute numbers for 30 prison-related measures and computes another 30 indicators which can be used for comparative purposes. The sourcebook should be used together with Volume 1 of the Prisons in Europe 2005-2015 collection, which provides the context and methodology used to produce the data presented here.

The Council of Europe is the continent's leading human rights organisation. It comprises 47 member states, including all members of the European Union. All Council of Europe member states have signed up to the European Convention on Human Rights, a treaty designed to protect human rights, democracy and the rule of law. The European Court of Human Rights oversees the implementation of the Convention in the member states.

www.coe.int

The member states of the European Union have decided to link together their know-how, resources and destinies. Together, they have built a zone of stability, democracy and sustainable development whilst maintaining cultural diversity, tolerance and individual freedoms. The European Union is committed to sharing its achievements and its values with countries and peoples beyond its borders.
