In the neighbourhood of the community in Medvec, there are no green parks and public spaces with facilities where people can sit and relax. Considering that this village has over 500 inhabitants, where the composition is also middle-aged and elderly, there is a need for green spaces. Also, the pandemic has left its consequences and a large number has caught Covid-19, and this has affected the lives of citizens such as their wellbeing and mental health. Therefore, the arrangement of this park and green spaces would be very beneficial for the citizens of this area and would have a positive, much-needed impact on the health and wellbeing of the community, especially after the Covid-19 pandemic.

The cleaning of these basements will help clean up the environment and maintain better health in the community, as well as ensuring the non-spread of any epidemic that may come from the basements of collective housing. Still in Adem Voca neighbourhood, there is only a small number of garbage bins in the community. As a result, there is a lot of waste spread around the area causing a harmful environment. Garbage bins are therefore very much needed and will enable the neighbourhood to remain free from the waste collected in bulk.
