

**Question:** internet - does the mentioned locations have an internet connection, or shall the offer include a service fee for internet connection?

**Answer:** The offer should not include a service fee for internet connection.

**Question:** cabling - there is actually no information included in the RFQ about the LAN cable network in the spots where the equipment should be provided

to be able to evaluate we will need at list some minor information like does the rooms where the equipment shall be installed have LAN network cables installed or shall we install the cables

if the cables shall be installed by us then what is the average length ? shall it be installed via plastic tubes or trunkings or any other information about it, also if the length of the cables is more than 100m then a fiber optical cable shall be installed and some F/O to LAN converters must be used

**Answer:** The cables should be installed by the provider. All technical requirements for network installation are reflected in the Appendix I BUSINESS AND TECHNICAL REQUIREMENTS.

**Question:** Software and Server config - for the software I read about zoom and other conferencing systems that should be used, but is there a requirement for paid licenses or free solutions will be used ?

the Server infrasatruecture will be provided by EKENG - is there any requirement from us in terms of server setup or other configuration works, mainly shall the routers be configured by us, will a VPN or other software be used for the network ?

**Answer:** The provider will not deal with the software and server setup.
