1. Judicial organisation in Slovenia (2021 data)

In 2021 in Slovenia, the number of courts considered as legal entities is 66. Namely, there are 60 courts of general jurisdiction and 6 specialised courts.

Among the 60 legal entities of general jurisdiction, 44 Local courts and 11 District courts act at first instance, while 4 Higher courts constitute the second instance courts of general jurisdiction. The Supreme Court is the highest instance court of general jurisdiction, as well as in respect of specialised courts.

Among the 6 legal entities of specialised jurisdiction, 5 are of first instance while the Higher Labour and Social Court constitutes the sole higher specialised court.

In terms of geographic locations, there are 70 courts of first instance encompassing the 55 first instance courts of general jurisdiction (44 Local courts and 11 District courts) and the first instance specialised courts (4 labour courts and social court + 7 branch offices of labour and social courts + 1 administrative court + 3 branch offices of the Administrative court). The number of all courts as geographic locations is 76, including the 70 first instance courts, the 4 Higher courts of general jurisdiction, the Higher Labour and Social Court, and the Supreme Court.

Professional judges

Evolution of the number of professional judges since 2012 (Q46)

Number of professional judges	Absolute Number	Per 100 000 inhabitants	
	Slovenia	Slovenia	EU Median
2012	970	47,1	19,2
2013	951	46,1	19,4
2014	924	44,8	19,2

2019	873	41,7	24,5
2020	875	41,5	23,9
2021	860	40,8	24,1

According to 2021 data, the total number of professional judges sitting in courts (all instances) in Slovenia is 860, which is -1,7% less than in previous cycle.

More precisely, in Slovenia, there are 40,81 professional judges per 100 000 inhabitants (this figure is above the EU median of 24,1 judges per 100 000 inhabitants) and about 4,02 non-judge staff per judge.

There has been a small increase compared with previous cycle when this ratio was at 3,92 non-judge staff per judge.

Absolute number of professional judges by instance and gender

Professional judges 2021	Total	Distribution by instance	Male	Female	% Male	% Female
1st instance	694	80,7%	126	568	18,2%	81,8%
2nd instance	136	15,8%	28	108	20,6%	79,4%
Supreme court	30	3,5%	19	11	63,3%	36,7%
Total	860		173	687	20,1%	79,9%

In this cycle, the total number of Female professional judges (all instances) is 687, which represents 79,9% of the total number of judges.

The total number of judges is distributed among the different judicial instances in the following way: 694 are sitting in first instance courts (of which 568 are Female); 136 are sitting in second instance courts (of which 108 are Female) and 30 are sitting in Supreme Court (of which 11 are Female).

Compared with the EU distribution of professional judges per instance, the trend in Slovenia is similar. However, we can notice that the predomination of first instance judges is more pronounced, second instance judges are less numerous, and third instance judges are slightly fewer.

As regards the methodology of presentation of data in respect of the number of judges, it should be noticed that the provided total number of judges corresponds to the number of de facto occupied judicial posts performing their functions. Some judges are assigned to other duties (e.g. to the Judicial Council, Ministry of Justice, Supreme court) and are not included in the reported numbers. The information on actual presence (excluding the maternity or sick leave, but including the annual leave) is also available.

At the end of 2021, 880 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 860 professional judges sit in courts (perform judicial function), since the rest of the judges (20 judges - difference to the total of 880 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The number of judges in the Slovenian judicial system in 2021 was 802,84 according to actual presence calculations.

It is worth highlighting that until 2021, approximately 30 judges at the administrative court (first instance court) and approximately 50 higher judges at local and district courts (first instance courts) were reported as second-instance judges (according to their rank: higher judge); from 2021 they are reported according to their court (first-instance judges).

As regards the distribution male/female, it has to be specified that female judges do not have the majority only at the level of the Supreme Court.

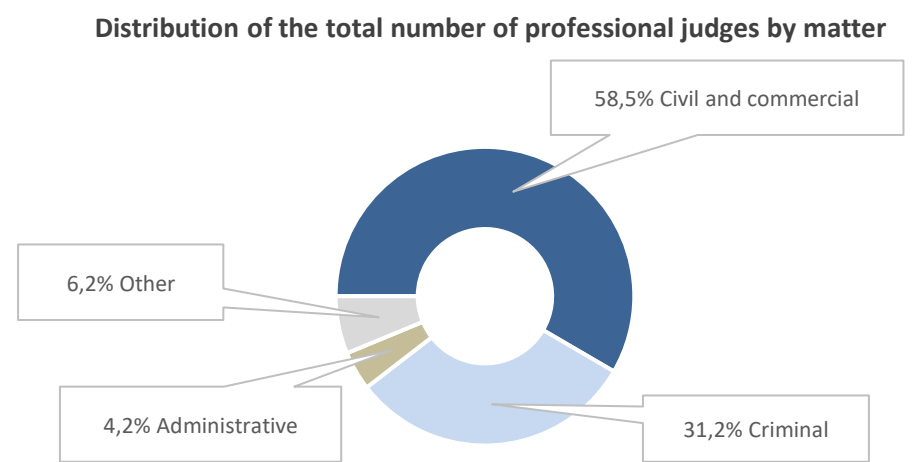

Absolute number of professional judges by instance and matter

2nd instance	129	84	36	NAP	9
Supreme court	29	15	6	7	2
Total	802	469	250	34	50

In Slovenia, the distribution of judges by categories of cases is possible as presented in the graph below.

Distribution of professional judges by instance and matter

Distribution of Professional judges by instance and matter 2021	Civil and commercial	Criminal	Administrative	Other
1st instance	57,5%	32,3%	4,2%	6,1%
2nd instance	65,1%	27,9%	NAP	7,0%
Supreme court	51,7%	20,7%	24,1%	6,9%
Total	58,5%	31,2%	4,2%	6,2%

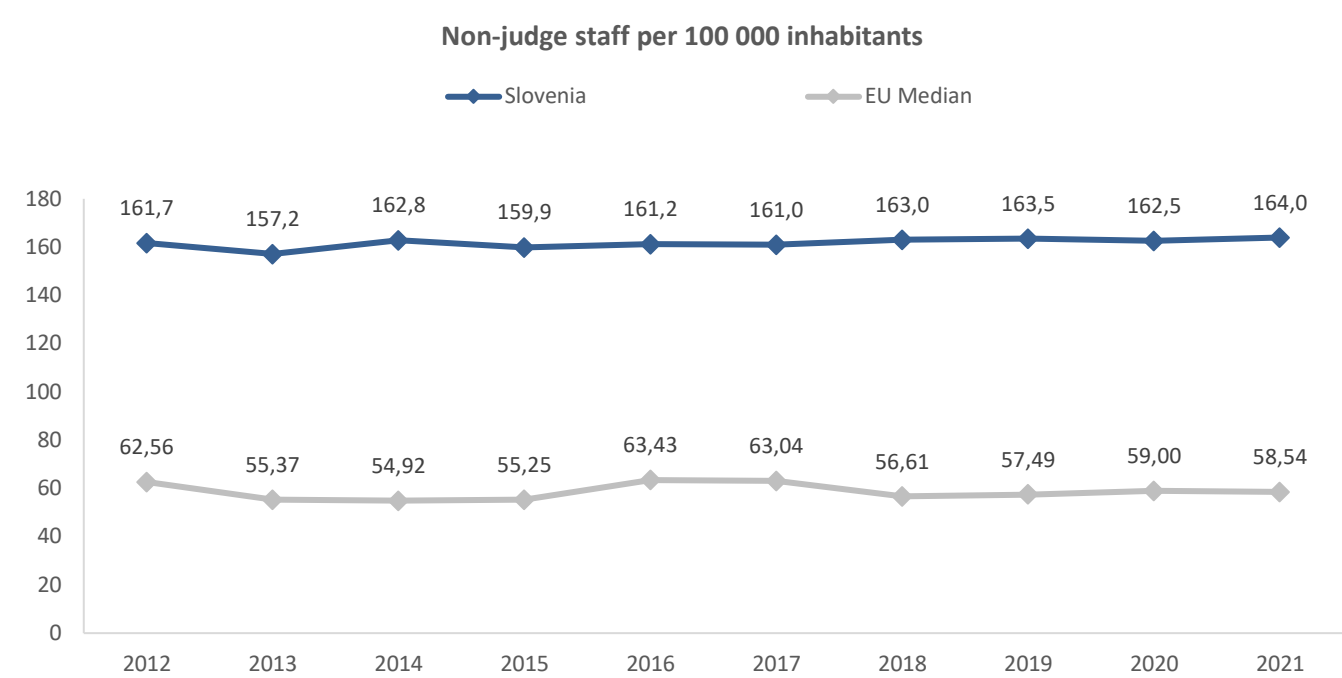

In 2021, the data on judges classified by legal fields was collected for the first time (by approximating the time an individual judge is working on a certain type of case). Since the methodology of reporting is yet to be revised and elaborated, we can only report approximate numbers. The distinction to Civil and/or Commercial/Criminal/Administrative/Other judges is roughly the same as for the number of cases.

The category "Other" includes judges involved in the court management. Judges involved in court management are partially or entirely relieved from adjudicating cases.

As already mentioned, data are reported as actual presence (not FTE).

Non-judge staff

Number of non-judge staff	Absolute Number	Per 100 000 inhabitants

2020	3 427	162,5	59,0
2021	3 455	164,0	58,5

In 2021, Slovenia has 3 455 non-judge staff (of which 3 027 are Female). The total number of non-judge staff in comparison with the previous cycle reveals an increase of 0,8%.

In 2021, the number of non-judge staff per 100 000 inhabitants has increased (from 162,5 in 2020 to 164,0 in 2021).

During the same period, the number of judges per 100 000 inhabitants evolved from 41,5 judges per 100 000 inhabitants in 2020 to 40,8 in 2021.

Number of non-judge staff by category in 2021	Absolute number	in %
Total	3 455

Non-judge staff assisting the judge	1 119	32,4%
Staff in charge of administrative tasks	1 680	48,6%
Technical staff	187	5,4%
Other	NAP	NAP

In this cycle, the non-judge staff is broken down as follows:

- 469 Rechtspfleger (or similar bodies) with judicial or quasi-judicial tasks having autonomous competence and whose decisions could be subject to appeal (among which 430 are Female);
- 1 119 non-judge staff whose task is to assist the judges such as registrars (of which 966 are Female);
- 1 680 staff in charge of different administrative tasks and of the court management (of which 1 544 are Female);
- 187 technical staff (of which 87 are Female);

- The definitions of categories are as follows:
1. “Rechtspfleger” category includes only the staff (judicial assistants and judicial advisers) with autonomous competence to adopt final decisions (decisions on the merits of the case), set explicitly in procedural laws - currently the Claim Enforcement and Security Act, the Financial Operations, Insolvency Proceedings and Compulsory Windingup Act, the Court Register of Legal Entities Act and the Land Register Act.
 2. “Non-judge staff” category includes staff, whose tasks are generally set by the Courts Act. These are judicial assistants (filing applications and statements by parties for the record and, by order of a judge, perform less demanding tasks related to preparation for trial proceedings or other procedural acts, making calculations of costs, preparing drafts of decisions and performing other tasks in judicial proceedings under the orders of a judge), judicial advisers (performing work connected with the examination of parties, witnesses and experts (outside the main hearings), performing more complex preparatory work for hearings, reporting at panel meetings, drafting decisions, conducting hearings under the guidance of a judge and performing other work by order of a judge) and judicial trainees (typically do not perform significant amount of work as their role is to learn; however they can participate in hearings and drafting of court decisions in some cases).
 3. All the other staff, not mentioned above and not corresponding to 4. “Technical staff” is included in 3. “Administrative staff”. The latter includes, along with the court management staff, the office support staff, whose tasks are not specifically set by the law and include case registering, administrative case preparation, court fees, typing and/or recording of court sessions etc.

Approximately 3% of all court staff (115 persons) are judicial trainees (reported under “2. Non-judge (judicial staff”).

Supreme court	12	6,0%	6	6	50,0%	50,0%
Total	201		62	139	30,8%	69,2%

In this cycle, the total number of Female prosecutors (all instances) is 139, which represents 69,2% of the total number of prosecutors.

The total number of prosecutors is distributed among the different judicial instances in the following way: 144 in first instance (of which 104 are Female); 45 are in second instance (of which 29 are Female) and 12 in final instance (of which 6 are Female).

As regards the methodology of presentation of data in respect of the number of prosecutors, it should be noticed that the information is in form of gross data. For 2021 data, the FTE format is observed. The above data do not include six State prosecutors who perform other duties (assigned to The Council of State Prosecutors, appointed to Eurojust, the European Public Prosecutor and the European Delegate Prosecutor).

As regards the distribution of the number of prosecutors among the different judicial instances, Slovenia presents some peculiarities which should be mentioned. Namely, the Slovenian state prosecutors perform their function in 13 organizational units – prosecution offices. There are 11 District State Prosecutor’s Offices and one Specialized State Prosecutor’s Office of the Republic of Slovenia, where local, district and senior state prosecutors are positioned. At the Office of the Prosecutor General of the Republic of Slovenia supreme state prosecutors and the State Prosecutor General perform their functions. Some state prosecutors of lower ranks are assigned to the office perform demanding professional tasks.

There are no higher state prosecutor’s offices as the proceedings at the courts of appeal are governed by the district prosecutor’s offices. According to the State Prosecution Service Act prosecutors with the rank of at least local state prosecutor may represent a case at local courts, prosecutors with the rank of at least district state prosecutor may represent a case at district courts, prosecutors with the rank of at least senior state prosecutor may represent a case before higher courts and only supreme state prosecutors may represent a case at the Supreme Court. Local state prosecutors may also appear at district courts, if authorized by the head of state prosecutor’s office for certain categories of matters, for a particular matter, for certain categories of procedural acts or for a particular procedural act. Local and district prosecutors may in their cases appear along with a senior prosecutor at courts of appeal, if authorized by the head of an appellate division of the state prosecutor’s office for a particular case. Senior and supreme state prosecutors are competent to represent a case at before first instance courts.

Local and district prosecutors are reported as prosecutors at first instance level, senior prosecutors as prosecutors at second instance level and supreme prosecutors as prosecutors at Supreme Court level, without regard to the court instance where they perform their function, or that they are assigned to another institution for a limited period of time (e.g for the administration of State Prosecutorial Council).

The number of posts of state prosecutors is set by the Government's Regulation. However the actual number of state prosecutors is lower than the number set by regulation due to different factors.

As regards the distribution male/female, it has to be specified that female prosecutors have the majority at first and second instance level and are equal in number to those of male prosecutors at Supreme Court level.

In 2021, there are 1 856 lawyers, which is 1,2% more than in 2020.

Slovenia has 88,1 lawyers per 100 000 inhabitants, which is below the EU median of 122,4 lawyers per 100 000 inhabitants.

There are 880 female lawyers which is 47% of the total.

Salaries of professional judges and prosecutors at beginning of a career and at the highest instance

Salaries of professional judges and prosecutors	Average gross annual salary in €	Average net annual salary in €	Ratio with national average annual gross salary	
	Slovenia		Slovenia	EU median
First instance professional judge at the beginning of his/her career	32 628€	20 568€	1,4	1,9
Judge of the Supreme Court or the Highest Appellate Court	63 660€	36 984€	2,7	4,1
Public prosecutor at the beginning of his/her career	32 628€	20 568€	1,4	1,7
Public prosecutor of the Supreme Court or the Highest Appellate Instance	63 660€	36 984€	2,7	3,4

According to 2021 data, the absolute gross salary of a judge at the beginning of his/her career in Slovenia of 32 628€ is below the EU median of 52 534€. As a ratio with the annual average salary of the country, the salary for a judge at the beginning of his/her career is 1,38 which is also below the EU median of 1,91.

The basic salary for judges and prosecutors is regulated by law, as well as promotion. The salary of the prosecutor is determined on the same basis, with the same supplements and in the same way as the salary of the judge. All employees in the country (including judges and public prosecutors) are also entitled to the supplement for the period of employment. As the calculation of the average pay would be too complicated, we report figures calculated from above criteria. All figures reported include the supplement for the period of employment.

Judge/prosecutor at the beginning of the career: starting salary for local court judge and for local state prosecutor (without promotion), including the supplement for the period of employment (5 years) - approximately 1-2% of the reported amount.

Judge/Prosecutor at the highest instance: starting salary of a supreme court judge and supreme state prosecutor – counselor (not president of the Supreme Court or State Prosecutor General) including the supplement for the period of employment (44 years) - approximately 15% of the reported amount.

3. Legal aid and court fees in Slovenia (2021 data)

In Slovenia, legal aid is available for :

- > Representation in court:
- Criminal cases

◦ Other than criminal cases
- > Legal advice, ADR and other legal services:
- Criminal cases

◦ Other than criminal cases
- > Fees related to enforcement of judicial decisions as fees for enforcement agents (Q18)
- > Other costs than above (Q19)

The Free Legal Aid Act (FLAA) prescribes that legal aid shall mean the right of the eligible person to the entire or partial provision of funds necessary to cover the costs of legal assistance and the right to exemption of payment of the costs of the judicial proceeding. Further on the law defines that legal aid may be approved for legal advice, legal representation and other legal services, for all forms of judicial protection before all courts of general jurisdiction and specialised courts based in the Republic of Slovenia, before the Constitutional Court of the Republic of Slovenia, and before all authorities, institutions or persons in the Republic of Slovenia authorised for out-of-court settlement, as well as in the form of exemption from payment of the costs of the judicial proceeding.

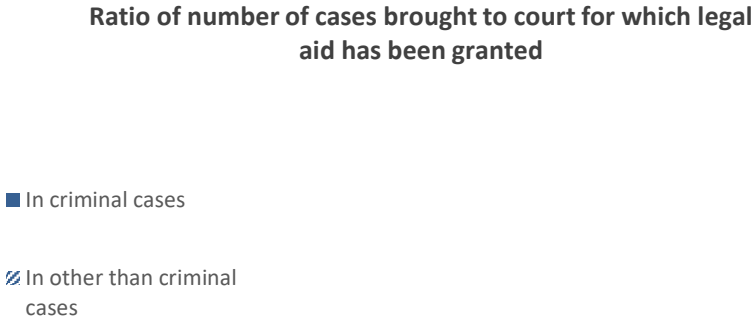

The law specifically lists the costs that can be covered by the approved legal aid: for legal advice; for the formulation, verification and certification of documents on legal relations, facts and statements; for legal advice and representation in cases of out-of-court settlement; for legal advice and representation before courts in the first and second instances; for legal advice and representation involving extraordinary appeals; for legal advice and representation involving constitutional action; for legal advice and representation before international courts; for legal advice and representation involving the filing of a petition for the assessment of constitutionality; in the form of exemption from payment of the costs of the judicial or extrajudicial proceeding.

Legal aid may also be granted in the form of an exemption from payment of the costs of proceedings before courts, particularly in the form of an exemption from payment of: costs of experts, witnesses, interpreters, servicing orders and translations, costs of external operations of the court or other authority in the Republic of Slovenia, and other justified costs; security deposits for the costs or of the costs, of the implementation of the proceeding (advance payments); costs of public documents and receipts required for the proceeding before a court; other costs of the proceeding. The legal aid system does not cover the costs of the proceeding and actual expenditure of and remuneration for the person representing the opposing party.

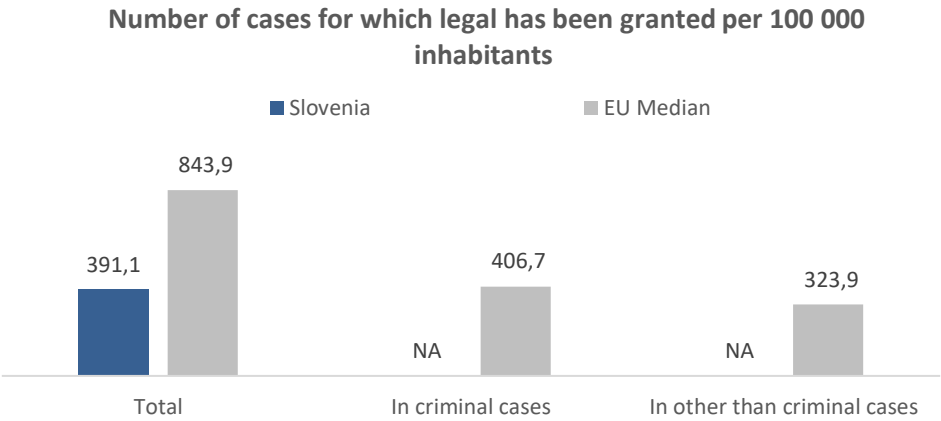

In the proceeding of enforcement of judicial decisions the exemption from court fees (according to the Court Fees Act) and legal aid in the form of legal advice, legal representation and the exemption from payment of the procedural costs (the Free Legal Aid Act) is possible.

Number of cases for which legal aid has been granted

Number of cases for which legal aid has been granted Absolute number (in 2021)	Total	Cases brought to court	Cases not brought to court
Total	8 241	7 507	734
In criminal cases	NA	NA	NA
In other than criminal cases	NA	NA	NA

Number of cases for which legal aid has been granted Per 100 000 inhabitants (in 2021)	Slovenia	EU Median
Total	391,1	843,9
In criminal cases	NA	406,7
In other than criminal cases	NA	323,9

The reported values use the categorisation by forms of legal aid granted. In a single legal aid case, the request can be granted for multiple forms of legal aid, therefore the reported numbers can be higher than the number of resolved legal aid cases. Data on the number of resolved legal cases are not reported, since one or more forms of legal aid can be granted in a single resolved case, making impossible the distinction to “cases brought to court” or “cases not brought to court”.

Cases brought to court include: 1) legal advice and representation before courts at first and second instance and 2) involving extraordinary appeals.

Cases not brought to court include: 1) legal advice and representation in cases of out-of-court settlement; 2) formulation, verification and certification of documents on legal relations, facts and statements.

The following forms of legal aid are not included in the figures: 1) legal advice and representation involving constitutional action; 2) legal advice and representation at international courts; 3) legal advice and representation involving the filing of a petition for the assessment of constitutionality and 4) exemption from payment of costs of judicial or extrajudicial proceedings.

Timeframes of the procedure for granting legal aid (in relation to the duration from the initial legal aid request to the final approval of the legal aid request)

- Maximum duration prescribed in law/regulations: NAP
- Actual average duration: 30

If the applicant would miss the deadline or would loose a right in the time it takes to process the application for free legal aid, the court can approve an "urgent" free legal aid, without taking in regard the material criteria for eligibility (however, the lack of merits is still checked). The material criteria are subsequently checked at a later time.

4. Performance of courts in Slovenia (2021 data)

• Efficiency indicators

◦ Clearance Rate (CR) and Disposition Time (DT)

The Clearance Rate shows the capacity of a judicial system to deal with the incoming cases. A Clearance Rate of 100% and higher does not generate backlog.

The Disposition Time determines the estimated number of days necessary for a pending case to be solved in a court.

Clearance Rate by instance and by matter in 2021 (%)

DispositionTime by instance and by matter in 2021 (days)

In 2021, criminal law cases appear to be the fastest in Slovenia, more specifically in the second instance, which is similar to the trend observed in the EU for the reference year. At the same time, first instance administrative law cases are the longest in Slovenia, as it appears also in the EU, but well above the EU median. However, in all matters, the total length of proceedings in Slovenia is below EU median, especially for civil cases but also administrative cases.

A breakdown of the analysis by instances reveals that, in all matters, the length of proceedings is a concern in Slovenia only at first instance. Moreover, in civil and criminal matters, the Disposition Time evolved positively between 2020 and 2021. Conversely, it increased for first instance administrative cases due a decrease in the number of resolved cases.

At first instance, the Clearance rate indicator is satisfactory for civil litigious and criminal law cases, while for administrative law cases, courts seem to be less efficient, with a Clearance Rate below the 100% threshold. In the second instance, courts also seem to be less efficient in civil and criminal matters with a Clearance Rate below the 100% threshold. At third instance, courts seem to be able to deal with cases, especially for administrative and criminal law cases, and the Disposition Time is considerably below the EU median values.

In 2020, the functioning of first instance courts was limited due to Covid-19 restrictions (and the number of resolved cases at first instance courts decreased). As second instance courts deal with the majority of cases without hearing of parties, their functioning was not affected that much. The number of appeals coming from first instance decreased, which resulted in the decrease of pending cases at second instance courts at the beginning of 2021.

The decrease in the number of second instance resolved cases is due to two factors: impact of Covid-19 pandemic, namely the higher number of judges and court staff on sick leave or quarantined (compared to 2020), and more general human resources issues (retirement of judges, prolonged sick leaves etc.).

With a Clearance Rate calculated at 100,6% in 2021, Slovenia seems to be able to deal with its first instance total criminal law cases.

Between 2020 and 2021, the Clearance Rate has increased by 4,6 points.

In 2021, first instance total criminal law cases are solved in approximately 158 days, which is slightly above EU median of 134 days.

The analysis of the 2020 - 2021 period reveals a -4,3% decrease of the Disposition Time.

The figures in the table include the following cases:

- Severe criminal cases: criminal cases at local and district courts, criminal cases against juveniles at district courts.
- Misdemeanour cases: minor offences in regular court procedure – request for judicial protection, minor offences in regular court procedure – accusation proposals, cancellation of validity of the driver’s licence according to the legal limit of punitive points
- Other cases: criminal investigations at district courts, criminal cases against juveniles in preparatory proceedings, execution of the sanction of prison, execution of criminal sanctions of foreign courts, criminal investigation actions at local and district courts, various criminal matters at local and district courts, cases of the out-of-hearing senate, clemency procedures at local and district courts, legal aid in criminal matters, international legal aid in criminal matters, cases of decisions to permit interventions within human rights and freedoms, legal aid in minor offences, international legal aid in minor offences, search of premises, setting a task for the good of the community or the local community, various cases in minor offences, compliance detention.

Regarding criminal investigations at district courts: Slovenia has a system where the state public prosecutor can request a (first instance) court to perform a criminal investigation (or individual investigatory acts). When this procedure at court is finished, the case is returned to the state prosecutor, who can decide whether to dismiss a case or file an accusatory act at the (same) court. When the accusatory act is filed, a criminal trial (i.e. deliberating on the responsibility and sanctioning of the offender) begins.

Due to the COVID- 19 epidemic, there were no educational events with physical participation, but rather virtual ones. For the aforementioned type of events there were no registration fees, or they were lower, compared to participation fees for events with physical participation. Due to the COVID-19 epidemic, the public prosecution's own educational event - Educational Prosecutor's Days, which represents the largest cost of the state prosecutor's office in the field of education, was held virtually.

3.4. Cases brought to court	8 408	▼ -7,9%	0,40	0,52	
4. Pending cases on 31 Dec. ref. year	289 273	▲ 2,8%	13,73	0,87	

* Please note that these figures include traffic offence cases.

Methodology used - statistical data are kept on the accused, accused or convicted persons, and the data is related to the main crime per defendant (methodology as used in the Joint Annual Report on the Work of State Prosecutor's Offices). Data also include unfinished criminal complaints against unknown perpetrators (on average, between 27,000 and 60,000 complaints a year against unknown perpetrators). These are included in statistical data as unresolved cases until they are completed (for example, statute of limitations and no legal signs of a crime).

In 2021, the reporting changed to include cases of discontinued criminal complaints against unknown offenders due to the expiration of statute of limitations in the category (3) Processed cases (previously excluded).

Pending cases on 1 Jan. ref. year include transferred criminal complaints: against known perpetrators (11.951) and against unknown perpetrators (269.260).

Incoming cases include criminal denunciations: against known offenders (24.658) and against unknown offenders (27.199). Between 2020 and 2021, incoming cases decreased by 16%, for the following reasons: a) Covid-19 pandemics, especially limit of movement of population and related police control, b) changes in the registration of the number of criminal offences in police registers and c) increase in merging of different cases in one case at the Police and state prosecution level, compared to the previous year.

Processed cases include processed cases against known offenders (24.658) and discontinued criminal complaints against unknown offenders due to the expiration of statute of limitations (29.140).

Cases discontinued during the reference year include dismissed criminal complaints: against known perpetrators (14.260) and against unknown perpetrators (29.140).

Cases discontinued due to the lack of an established offence or a specific legal situation include: a) discontinued criminal complaints against known perpetrators due to the lack of procedural or material preconditions (10.022), b) cases discontinued (rejected) due to withdrawal of the motion of the injured party (2.000) and c) cases discontinued due to expiration of the statute of limitation: 75 (total 12.097 cases) and discontinued criminal complaints against unknown perpetrators due to the expiration of statute of limitations (29.140). Between 2020 and 2021, this type of cases increased by 17%, mainly due to a higher number of cases against unknown offenders, due to the expiration of statute of limitations, which is beyond the control of state prosecution. The number of discontinued cases against known offenders did not change significantly.

Between 2020 and 2021, cases discontinued by the public prosecutor for reasons of opportunity decreased by 22%. The number of cases remains comparable (despite the decrease in last year) and cannot be considered unusual, due to the structure of processed cases with the majority of offences against property and within it low value cases.

In 2021, cases concluded by a penalty or a measure imposed or negotiated by the public prosecutor increased by 23% due to partial relief of preventive measures, related to Covid-19 pandemics.

Pending cases on 31 Dec. ref. year include unresolved criminal complaints: against known offenders (11.709) and against known offenders (277.564).

6. Existence and use of alternative dispute resolution in Slovenia (2021 data)

Number of mediators

Mediators	Absolute Number	Per 100 000 inhabitants	
	Slovenia	Slovenia	EU Median
2012	347	16,9	9,5
2013	341	16,5	9,6
2014	311	15,1	8,9
2015	292	14,1	9,8

2019	267	12,7	14,3
2020	258	12,2	14,4
2021	245	11,6	16,2

In 2021, there are 245 accredited or registered mediators who practise court related mediation which represents 11,6 accredited or registered mediators per 100 000 inhabitants.

The variation between 2020 and 2021 is about -5,0%.

The procedures for listing (and un-listing) individual mediators are led by individual courts.

Number of court related mediations

Under category “Civil and commercial cases”, all mediation cases at local and district courts are reported (including family cases and consumer cases).

The number of finished mediations and settlement decreased from 2019 to 2020 (by 22% and 26% respectively; due to the impact of Covid-19 pandemics) and increased in 2021 (by 23% and 33% respectively). The number of mediations and settlements in 2021, compared to 2019, stayed roughly the same.

7. ICT tools of courts in Slovenia (2021 data)

The ICT questions

The answers to the ICT questions in 2021 can be summarised to :

Assistance tools	Civil and/or commercial	Criminal	Administrative
Writing assistance tools	Yes	100%	100%
Simple dictation tools	Yes	in all courts	in all courts
Multiple speakers recording tools		in all courts	in all courts
Voice recognition feature		No	No

The writing assistance tools are included in the case management systems, provided by the Project management Service at the Supreme Court. The templates (including pre-written texts) are verified by the judges.

All courts are equipped by voice recording tools, maintained by courts.

Financial management tools	Deployment rate	Data consolidated at national level	System communicating with other ministries

8. Systems for measuring and evaluating the performance of courts and public prosecution services in Slovenia (2021 data)

In Slovenia, quality standards are determined for the judicial system at national level (e.g. quality systems for the judiciary and/or judicial quality policies). Specialised personnel within the courts and the public prosecution services is entrusted with implementation of these national level quality standards.

The Office for Court Management Development at the Supreme Court promotes the improvement in leadership and management of courts and the increase in effectiveness and efficiency. It is responsible for the preparation of different reports and analysis regarding work of courts and the promotion of best practices.

The Department for the Organization and Development of Management of the Supreme State Prosecutor's Office of the Republic of Slovenia is responsible for monitoring the implementation of the Prosecution Policy and the Criteria for the Success of Prosecution of State Prosecutor's Offices.

The Supreme Court's Data warehouse, containing all court cases, as well as financial data and human resources data was implemented in 2011. The data are collected based on CEPEJ Guidelines on Judicial statistics (GOJUST). A special office at the Supreme Court with specialised knowledge was introduced in order to monitor the quality and define quality policies on the level of entire judiciary and individual courts. Quality standards based on SATURN guidelines are taken into account in several predefined BI system reports.

The important role in the determination of quality standards is played by the Supreme Court's „Opening of the judicial year“ document, in which a set of priorities is determined. The priorities are subsequently monitored throughout the judicial year by automated BI tools and customised analysis at the Supreme Court.

The 2013 amendment to the Courts Act provides that the Supreme Court shall adopt the Criteria for quality of work for courts for the next (judicial) year, based on its Yearly report on efficiency and effectiveness of courts. Since 2015, the Supreme Court has been adopting the timeframes for different types of procedures as well as for different procedural phases for next year (as a part of the Criteria for quality of work).

As for public prosecution, the criteria for quality of work are defined in the Prosecution Policy (adopted by the Prosecutor General), while the quantitative aspects of work are defined in the Criteria for evaluating the performance of the state prosecutor's offices adopted by the State Prosecutorial Council.

Systems for measuring and evaluating courts' performance

A regular monitoring system of court activities is in place concerning:

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the courts)	✓
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✓
Number of resolved cases	✓	Number of appeals	✓
Number of pending cases	✓	Appeal ratio	✓
Backlogs	✓	Clearance rate	✓
Productivity of judges and court staff	✓	Disposition time	✓
Satisfaction of court staff	✓	Other	✗

In Slovenia, there is a regular monitoring system in a form of collecting data on court statistics. Court statistics are collected and published four times a year by the Ministry of Justice. They include the data on the number of judges and court staff, number of incoming, resolved and pending cases, age of unresolved cases, length of proceedings, average time to resolve a case, type of decision, court backlogs, legal remedies and time to issue a court decision.

Besides that, the data on court activities are automatically on national level, thus statistical analysis are made possible. All courts have access to a wide range of special reports, generated in the Court management information system. Reports include detailed information on court activities (for example length of specific phases of a court proceeding, top 20 oldest cases in certain area of law, etc.), human resources, court performance indicators (the critical indicators are marked red for unsatisfactory performance and green when meeting the standards) that provide guidance to presidents and directors of courts. The business intelligence system that creates priority reports derives the data from the Data warehouse of the Supreme Court. The same source is used for Court statistics publications by the Ministry of Justice. Each court is able to access the above mentioned reports at any moment, while some data are quarterly collected and published on national level (as prescribed by the Court rules).

The satisfaction surveys are performed and results published bi-annually.

In Slovenia, there is a system to regularly evaluate the court performance based primarily on defined indicators and the frequency of the reporting is annual.

Performance and quality indicators are defined for the activity of each court.

The following indicators are used:

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the courts)	✓
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✓
Number of resolved cases	✓	Number of appeals	✓
Number of pending cases	✓	Appeal ratio	✓
Backlogs	✓	Clearance rate	✓
Productivity of judges and court staff	✓	Disposition time	✓
Satisfaction of court staff	✓	Other	✗

The Annual work programme consists of the assessment of the expected number of incoming cases, timeframes for typical procedural acts and solving cases and the plan of operating results. The latter includes the expected number of resolved cases and criteria of efficiency (resolved cases to staff ratio), effectiveness (expected time to resolution) and economy (budgetary funds to solved cases ratio) (the Courts Act, art. 71.b).

The number of complaints is monitored as a performance indicator, however it is not directly considered as a measure of quality of work.

The data on satisfaction of court staff and users is collected bi-annually by the Supreme court and is taken into account by the Judicial Council when deciding on the nomination of court presidents. Consequently, the results of the aforementioned surveys have been included in the opinion of the President of the Supreme Court on the candidacy of court presidents, as well as on the data on work of courts for the purpose of assessment of judicial service for court presidents.

The evaluation of the courts' activities is used for the later allocation of means in the courts.

In 2021, the Judicial Council started taking into account the results of the satisfaction surveys of court staff and court users (performed bi-annually by the Supreme court) when deciding on the nomination of court presidents. Consequently, the results of the aforementioned surveys have been included in the opinion of the President of the Supreme Court on the candidacy of court presidents, as well as on the data on work of courts for the purpose of assessment of judicial service for court presidents. We consider that the aforementioned decision of the Judicial Council is the legal ground to include the satisfaction surveys amongst defined indicators.

A regular monitoring system of public prosecution services activities is in place concerning:

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the public prosecution)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✗
Number of resolved cases	✓	Clearance rate	✓
Number of pending cases	✓	Disposition time	✓
Backlogs	✓	Percentage of convictions and acquittals	✓
Productivity of prosecutors and prosecution staff	✓	Other	✓
Satisfaction of prosecution staff	✗		

The BI tools that use data gathered in information system of the State Prosecutor's Office provide the heads of prosecution offices with up-to-date overview of the performance of state prosecutors and the functioning of the office. Heads can customize the level and content of information presented to them for the purpose of making quantitative data supported decisions on allocation of work among prosecutors, control of the case-flow.

"Other": percentage of different types of decisions, value of proceeds of crime under freezing order, pronounced criminal sanctions etc.

In Slovenia, there is a system to evaluate regularly the activity of each public prosecution service and the reporting is more frequent than annual.

The quantitative indicators are defined in the Criteria for evaluating the performance of the state prosecutor's offices adopted by the State Prosecutorial Council. General guidelines for the work of state prosecutors and priority fields of prosecution are defined in a Prosecution Policy by prosecutor general. Heads of offices implement both criteria in their Annual Work Program. Twice a year the prosecutor general, the State Prosecutorial Council and the Minister discuss the performance of state prosecutor's offices at joint meetings held with the heads of state prosecutor's offices and adopt and/or coordinate the measures required for implementation of annual work programmes. An evaluation of attained goals set in the adopted Annual Work Programme, Criteria and Prosecution Policy are an integral part of Annual Report of each prosecution office. The prosecutor general compiles Joint Annual Report on the work of the whole state prosecutor offices. The Minister and State Prosecutorial Council may submit their opinion to this report.

Performance and quality indicators are defined for the activity of each public prosecution service.

The following indicators are used:

Number of incoming cases	✗	Satisfaction of users (regarding the services delivered by the public prosecutors)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✗
Number of resolved cases	✓	Clearance rate	✓
Number of pending cases	✓	Disposition time	✓
Backlogs	✓	Percentage of convictions and acquittals	✓
Productivity of prosecutors and prosecution staff	✓	Other	✓
Satisfaction of prosecution staff	✗		

The State Prosecutorial Council adopts the Criteria for evaluating the performance of the state prosecutor's offices on the proposal of the State Prosecutor General. The criteria define indicators and their target values for the appraisal of the work efficiency and realization of prosecution policy.

The criteria for the success of the prosecution of public prosecutors determine the following indicators: the number of unresolved cases at the end of the period, clearance rate, expected solution time, time criteria for typical process actions, (from the initiative of the police to the submission of a proposal to carry out urgent investigative actions, from the receipt to the rejection of the criminal complaint, from the receipt of the criminal complaint to the submission of a request for investigation or a proposal for individual investigative actions, from the receipt of the criminal complaint (without investigation) to the filing of the indictment, from the end of the investigation or individual investigative actions until the filing of the indictment, from the receipt of the complaint to the decision of the public prosecutor on the postponed prosecution and settlement, efficiency indicator, cost-effectiveness indicator, proportions of prosecution decisions, shares of rejected complaints according to individual reasons, shares of decisions alternative to criminal prosecution, share of penal orders, share of convictions, shares of imposed criminal sanctions.

The evaluation of the public prosecution services' activities is used for the later allocation of means in the public prosecution services.
