1.1.B. The Ministry of Culture is responsible for forming and implementing cultural policy and cooperation with other ministries, as well as for the field of cultural heritage protection in Slovenia, including all sector regulations and financial management of state budget, intended for protection interventions. The Ministry has also established other bodies that operate under its jurisdiction, namely the Directorate for Cultural Heritage and two other institutions, the Archives of the Republic of Slovenia and the Culture and Media Inspectorate. The Directorate is the core office for cultural heritage which is responsible for preparing and implementing the protection policy for movable, immovable and intangible heritage on the state level. It is responsible for allocation subsidies from the state budget and European structural funds, which are intended for financing programmes and projects in the field of

cultural heritage.

The Ministry of Infrastructure and Spatial Planning was established in 2012 by the reorganisation of the Ministry of Environment and Spatial Planning and the Ministry of Agriculture. The Ministry's concern is directed towards tasks that directly or indirectly affect the conservation of immovable cultural heritage: protection of national, regional and local recognition of space, architecture and landscape; renovation of historic settlements; limitation of dispersed construction and protecting non-built-up sites; guaranteeing the development of modern architecture.

The Institute for the Protection of Cultural Heritage of Slovenia is a centralised public institution, established by the Government after the merger of regional institutions in 1999. Within the scope of public services, this Institute implements numerous expert (theoretical, practical) and administrative tasks in the field of conservation of immovable, movable and living cultural heritage. The Institute comprises of the management body, Office for Cultural Heritage (with seven regional units, distributed all over Slovenia), and the Conservation Centre (with Restoration Centre and Preventive Archaeological Centre).

The Government of the Republic of Slovenia is responsible for nationally significant monuments listing and allocation of financial funds for cultural monuments of governmental ownership.

Municipalities list locally significant monuments, they decide on the manner of heritage protection in spatial planning process, they allocate financial funds for direct restoration interventions and manage cultural heritage that is owned by the municipality.

1.1.C. International cooperation:

MOC: International projects: European Heritage Label, Cultural Heritage and Global Change: a new Challenge for Europe, Ljubljana Process II: Rehabilitating our Common Heritage.

IPCH: International projects: CARARE, PArSJad, REVITAS, Shared Culture, CULTH:EX, Develop effective methodologies for elucidating the structure of melanins, Cradles of European Culture (CEC), LINKED HERITAGE (Coordination of Standards and Technologies for the enrichment of Europeana), SYDDARTA (SYstem for Digitalization and Diagnosis in ART Application, HEROMAT (Protection of Cultural Heritage Objects with Multifunctional Advanced Materials), InterArch Steiermark, Forte Cultura (Capitalising of fortified cultural heritage for sustainable development and competitiveness of cities and regions), Living Landscape.

International organisations and associations: UNESCO (World Heritage Centre, Regional office in Venice), IUCN, COE, ICOM, ICOMOS, ICCROM, Regional Centre for Intangible Cultural Heritage (Sofija), Council of Ministers of Culture of South-East Europe, EAC.

▼ 1.2 Commentary

Commentary (click to collaps)

Integrated Approach

1.2.A. Slovenia has a well organised network of expert member organisations that are active in the field of cultural heritage protection. Addresses and short presentation of most significant organisations:

The Slovenian Association of Conservators

was established in 1971, before that year the Slovenian branch unit was a part of the Yugoslav Association of Conservators. Today, the Association has more than 150 members who are active or retired conservators. The main objectives of the Association are emphasising the significance of conservation vocation, advanced education of conservators, presenting conservation profession to the public, organisation of activities that promote the awareness on the significance of preserving natural values and cultural heritage.

The Slovenian Association of Restorers

was established in 1993. It has approximately 300 members, 150 of them are active members. The main objectives of the Association are similar to the objectives of the Association of Conservators; however, they are more restoration-conservation oriented.

ICOMOS / SI Association

was established in 1993 and has 47 members. The main objectives of the Association is the cooperation and integration of experts in the field of conservation, collection and valuation of cultural heritage, spreading information on conservation and related techniques and methodologies, cooperation with ICOMOS and its members.

Other experts that are involved in the protection of cultural heritage are incorporated in individual associations (of archaeologists, historians, ethnologists, art historians and landscape architects) which partially exercise their objectives that are significant for promoting and emphasising the significance of heritage conservation.

The tasks of architecture societies that are active within the scope of an umbrella association, do not include special cultural heritage protection and conservation tasks, however, their interest in research and popularisation of built heritage of the 20th Century is increasing.

▼ 1.3.A Private organisations whose activities are relevant to the cultural heritage sector and to which some responsibility in..

Name of organisation:	Arhej d.o.o.

▼ 1.3 Commentary

Commentary (click to collaps)

Integrated Approach

1.3.A. Construction activity is organised within *Združenja gradbeništva in industrije gradbenega materiala* (the Association of Construction and Building Material Industry), which is a member of *Zbornice gradbeništva in industrije gradbenega materiala Slovenije* (the Slovenian Chamber of Commerce and Industry). * Construction industry and constructors are not associated in any organisation which would be specialised for heritage conservation.

Private companies in the field of restoration are mostly active in restoration of paintings, statues, furniture and other movable heritage, including the restoration of decorative elements on built heritage. Slovenia's Restorers Association has only 10 members that are private entrepreneurs.

▼ 1.4 Commentary

Commentary (click to collaps)

Integrated Approach

1. 4. A. Voluntary initiatives in general and not only in the field of heritage conservation are considered in *Zakon o društvih (Act on Societies)*¹, and partially by the legislation in the field of institutions.

The new *Zakon o varstvu kulturne dediščine (Cultural Heritage Protection Act)*² enables NGOs in the field of cultural heritage conservation to actively resolve protection issues, and to actively operate in the processes of protection strategy preparation and other protection tasks.

1.4.B. Voluntary initiatives are very much involved in decision making on local levels, especially with regards to interventions in space and conservation as well as restoration of cultural heritage. They are an active member of the local community and expert protection office, since they cooperate in all protection procedures.

▼ 1.6 Commentary

Commentary (click to collaps)

Integrated Approach

1. 6. A. Restorers with finished secondary education usually attend "in-service training" in the form of special courses, seminars and workshops, organised by the Institute for the Protection of Cultural Heritage of Slovenia, museums and archives.

In 1993, a programme for acquiring expert knowledge in the field of built heritage was adopted. It is performed as a three- or four-year secondary school programme.

Programmes, which enable the acquisition of vocations construction technician, master of masonry, carpenter, stonemason and stove-maker/ceramist, are offered at the Secondary

School of Civil Engineering, Land Surveying and Economics in Ljubljana. The Secondary Vocational and Professional School in Maribor offers a programme, which enables the acquisition of knowledge in the field of carving, joining and furniture joinery. Another programme for acquiring expert knowledge in the field of stonecutting was adopted in Sežana.

In 2003, the Ministry of Culture in cooperation with the *Center za poklicno izobraževanje (Institute for Vocational Education and Training)*¹, the Institute for the Protection of Cultural Heritage of Slovenia – Restoration Centre, Secondary School of Civil Engineering, Land Surveying and Economics together prepared vocational standards and catalogues of vocational standards for the acquisition of national vocational qualification for the area of seven vocations of restoration workers. The acquisition of national vocational qualification with a certificate is enabled for adults in order to prove their qualification regardless of the fact, how the knowledge was acquired.

All experts that are public officials in the field of heritage or who work in restoration and conservation of cultural heritage, and experts that work in the field of heritage documentation, have to pass a proficiency examination, organised by the Cultural Heritage Directorate. Passed proficiency examination is also the condition for implementing the mentioned work "on the market", however, not in the form of mandatory licences, but such examination can be required at an issue of consensus for a specific intervention in heritage.
