## Snapshots of social drug research in Europe

Globalisation influences not only legitimate economic sectors, but also affects developments on the illicit drug market and the proportion of those in treatment who are members of minority ethnic populations. In a rapidly changing world, the need for information increases accordingly. Here, then, emerges an important task for science, especially in the light of the European endeavour for evidencebased drug policy. Recent years show an almost exponential increase in the use of online data collection and analysis in social drug research and, in some European countries faster than in others, research ethic committees have come to play an important role in social drug research.

The usual format of the European Society for Social Drug Research's annual book is 8-10 chapters, but this year the choice has been made to incorporate a greater number of short contributions, in the form of 21 'snapshots', written by social scientists working in 11 European countries.

# Snapshots of social drug research in Europe

New developments and current debates in social drug research: an introduction

*Dirk J. Korf*

## Part 1: Drug distribution

A case study of upper-level dealing

*Meropi Tzanetakis*

Low-level drug distribution in Antwerp: a case study

*Eline d'Huyvetter & Tom Decorte*

Social supply among socially integrated drug users

*Christiane Bernard*

Social supply and hard drug markets

*Gary R. Potter & Aleksandra Osiniagova*

## Part 2: Drug use and treatment among minority ethnic populations

Questioning differential drug treatment among nationally diverse populations

*Joanna Tsiganou & Dionyssi Balourdos*

Ethnic- and gender-specific patterns of substance use

*Annemieke Benschop & Alberto Oteo Pérez*

Immigrant drug users in Greece: an empirical study

*Katerina Micha & Natalia Spyropoulou*

Dual devalued identities among immigrant drug users in treatment

*Katerina Iliou & Katerina Tsantila*

## Part 3: Science-policy nexus

The triangle of science, policy and media in the Belgian drug policy debate

*Julie Tieberghien*

The challenge of setting regulations for new psychoactive compounds

*Constantinos Pistos & Chara Spiliopoulou*

Raising the minimum age for coffee shop customers: effect on prevalence

*Marije Wouters*

A case study of social reintegration policy

*Ismini Gourgiotou*

A therapeutic ethos in drug felonies: the genesis of drug courts

*Mette Irmgard Snertingdal*

A study of a Swedish treatment policy reform proposal

*Jessica Storbjörk*

The drug dispositive: reflections on the science-policy nexus

*Alfred Springer*

## Part 4: Research methods

Social supply: methods of data collection

*Marieke Vlaemynck*

The potentialities of online mixed method school-based drug research

*Stefania Kalogeraki*

Self-portraits of reintegration: the use of visual methods in addictions research

*Susana Henrique & Pedro Candeias*

## Part 5: Ethical dilemmas

Willing informants

*Mette Kronbæk*

Research ethics in committees and practice: responding to the challenges

*Aileen O'Gorman*

How honest can you be as a researcher?

*Rafaela de Quadros Rigoni*
