**National policies and international co-operation
for the implementation of the European Landscape Convention**

Introduction

Adopted in Strasbourg by the Committee of Ministers of the Council of Europe on 19 July 2000, the [European Landscape Convention](#) (ETS 176) was opened for signature by the Organisation's Member States in Florence on 20 October of that year. As the first international treaty devoted exclusively to all aspects of landscape, it addresses the Council of Europe's key challenges in the areas of human rights, democracy and the rule of law.

The Council of Europe Member States signatories to the Convention have declared themselves "concerned to achieve sustainable development based on a balanced and harmonious relationship between social needs, economic activity and the environment". The Convention is therefore the first international treaty devoted to sustainable development, with the cultural dimension a particularly relevant factor. Although each citizen must, of course, contribute to preserving the quality of the landscape, it is the authorities that are responsible for establishing the general framework that enables that quality to be assured. The Convention accordingly lays down the general legal principles that must guide the adoption of national landscape policies and the establishment of international co-operation in this area.

The Convention provides that existing competent Committees of Experts of the Council of Europe, set up under its Statute, are designated by the Committee of Ministers of the Council of Europe, to monitor its implementation. The Work Programme of the Convention adopted by the Council of Europe conferences on the European Landscape Convention and the Steering Committee for Culture, Heritage and Landscape (CDCPP) is implemented by the Secretariat General of the Council of Europe which transmits a report on the work carried out, and on the operation of the Convention, to the Committee of Ministers.

The Committee of Ministers of the Council of Europe has adopted the following basic texts, for the implementation of the Convention:

www.coe.int/en/web/landscape/reference-texts.

- Recommendation CM/Rec(2008)3 on the guidelines for the implementation of the European Landscape Convention;
- Resolution CM/Res(2008)3 on the rules governing the Landscape Award of the Council of Europe;
- Recommendation CM/Rec(2013)4 on the European Landscape Convention Information System of the Council of Europe and its glossary;
- Recommendation CM/Rec(2014)8 on promoting landscape awareness through education;
- Recommendation CM/Rec(2015)7 on pedagogical material for landscape education at primary level;
- Recommendation CM/Rec(2015)8 on the implementation of Article 9 of the European Landscape Convention on Transfrontier Landscapes;
- Resolution CM/Res(2017)18 on the Landscape Award Alliance of the Council of Europe;
- Recommendation CM/Rec(2017)7 on the contribution of the European Landscape Convention to the exercise of human rights and democracy with a view to sustainable development;

- Recommendation CM/Rec(2019)7 on Landscape integration in policies relating to rural territories in agricultural and forestry, energy and demographic transition;
- Recommendation CM/Rec(2019)8 on Landscape and democracy: public participation.

The Convention and the basic texts concerning its implementation contribute to promoting definition and legal recognition of the landscape, ensuring that the landscape dimension is taken into account in national and international policies, and developing international co-operation.

– frame landscape policies in the long term, so that they take into account the common surroundings for present and future generations;
– develop landscape policies throughout the entire territory, so that people can enjoy their surroundings in dignity and without discrimination;
– ensure that landscape policies respond to the ideal of living together, especially in culturally diverse societies;
– take into account the landscape issue in the actions taken to promote good governance and democratic citizenship, notably through awareness-raising, training and education;
– apply the principles of human rights and democracy in landscape policies;
– guarantee the right to participation by the general public, local and regional authorities, and other relevant parties including non-governmental organisations, with an interest in the definition, implementation and monitoring of landscape policies;
