<http://cfplm.educand.ad/>

### DESCRIPTION

The Andorran Education System (SEA) is **implementing a strategic plan to improve the VET programmes with the aim to develop educational innovation**. The plan seeks to reinforce civic and human values of VET learners.

In this sense, the implementation of this strategic plan aims at:

- Ensuring **access and equal opportunities** to vocational education and training programmes.
- Developing **civic responsibility** among learners.
- Promoting **tolerance and respect for human rights, as competences for democratic culture to be learnt**.

The Andorran Education System recognises that **inclusion and equal opportunities** are not only social goals but also **essential components of a culture of democracy in education**.
