1. Judicial organisation in Sweden (2021 data)

In 2021 in Sweden, the number of courts considered as legal entities is 94. Namely, there are 55 courts of general jurisdiction and 39 specialised courts. Among the 55 legal entities of general jurisdiction, 48 District courts act at first instance and deal with criminal and civil cases and various kinds of other matters such as adoption, administrators, bankruptcy and special representatives. The 6 Courts of appeal act as second instance courts of general jurisdiction, while the Supreme court is the highest instance court of general jurisdiction.

Among the 39 legal entities of specialised jurisdiction, 31 are of first instance, while 8 are higher instance specialised courts (infra).

In terms of geographic locations, there are 99 courts among which 84 are of first instance. In fact, the number of first instance courts of general jurisdiction is 48, but five of these also operate in another location in addition to the main location. Thus, the total of first instance courts as geographic locations is equal to 48+5+31 (first instance specialised courts) = 84.

It should be recalled that the variations observed in 2018 stem from a change in the methodology of presentation of data and are not due to any reform or judicial reorganisation. More precisely, for the 2018-2020 evaluation cycle, the replies have been adjusted to comply with the CEPEJ definitions.

The distribution between first instance general jurisdiction courts and first instance specialised courts is 60,8% - 39,2% (distribution tendency in EU: 72,8% - 27,2%). Thus, the part of the specialised courts in Sweden is above the EU median.

The 12 administrative courts are the courts of first instance that deal with cases involving disputes between individuals/companies and authorities. These courts settle more than 500 different types of cases. Common types of cases are tax cases, social insurance cases, cases under the Social Services Act and cases concerning compulsory care.

The Patent and Market Court deals with issues relating to market law and intellectual property. There is one first-instance Patent and Market Court. Its decisions can be appealed to the Patent and Market Court of Appeal.

Land and Environment courts process cases such as permits for water operations and environmentally hazardous operations, issues of health protection, nature conservation, refuse collection, polluted areas and hazardous waste, environmentally-related damages, and compensation issues, issues of building, demolition and land permits under the Planning and Building Act, site leaseholds, appeals in planning matters, land parcelling, utility easements and expropriation. There are five Land and Environment Courts, which are specialized courts at the District Courts in Nacka, Vänersborg, Växjö, Umeå and Östersund. The Land and Environment Courts' decisions can be appealed to the Land and Environment Court of Appeal in Stockholm.

Migration courts review decisions made by the Swedish Migration Board on matters concerning aliens and citizenship. There are four Migration Courts, they are specialized courts which are part of the Administrative Courts in Malmö, Göteborg , Stockholm and Luleå. The Migration Courts' decisions can be appealed to the Migration Court of Appeal in Stockholm.

Maritime courts deal with cases under the Swedish Maritime Code (1994:1009). There are seven maritime courts, which are part of the District Courts in Luleå, Sundsvall, Stockholm, Kalmar, Malmö, Gothenburg and Karlstad.

Sweden also has 2 special courts, which are completely separated from the general and administrative courts and their organization, meaning that they have a more far-reaching separation from the general and administrative courts. Those are the Labour Court and the Swedish Foreign Intelligence Court. The Labour Court deals with labour disputes, i.e., disputes in the frame of employers and employees' relationships; the Labour Court is normally the first and only instance competent in labour disputes. Nevertheless, some labour disputes are heard first in a district court, after which an appeal may be lodged with the Labour Court as the court of second and final instance. Rent and Tenancy Tribunals are not included because they are not courts, but administrative agencies. These are quasi-judicial bodies which hold similar powers to the courts and make decision on disputes involving rents, tenant-ownerships and leaseholds.

2021	1 240	11,9	24,1

According to 2021 data, the total number of professional judges sitting in courts (all instances) in Sweden is 1 240, which is 3,3% more than in previous cycle.

More precisely, in Sweden, there are 11,86 professional judges per 100 000 inhabitants (this figure is below the EU median of 24,11 judges per 100 000 inhabitants) and about 4,02 non-judge staff per judge.

There is no significant difference compared with previous cycle when this ratio was at 4,16 non-judge staff per judge.

Absolute number of professional judges by instance and gender

Supreme court	31	2,5%	18	13	58,1%	41,9%
Total	1 240		551	689	44,4%	55,6%

In this cycle, the total number of Female professional judges (all instances) is 689, which represents 55,6% of the total number of judges.

The total number of judges is distributed among the different judicial instances in the following way: 833 are sitting in first instance courts (of which 450 are Female); 376 are sitting in second instance courts (of which 226 are Female) and 31 are sitting in Supreme Court (of which 13 are Female).

Compared with the EU distribution of professional judges per instance, the trend in Sweden is similar. However, we can notice that the predomination of first instance judges is less pronounced, second instance judges are more numerous, while third instance judges are fewer.

2020	4 996	48,1	59,0
2021	4 989	47,7	58,5

In 2021, Sweden has 4 989 non-judge staff (of which 3 754 are Female). The total number of non-judge staff in comparison with the previous cycle reveals a decrease of -0,1%.

In 2021, the number of non-judge staff per 100 000 inhabitants has decreased (from 48,1 in 2020 to 47,7 in 2021).

During the same period, the number of judges per 100 000 inhabitants evolved from 11,6 judges per 100 000 inhabitants in 2020 to 11,9 in 2021.

Number of non-judge staff by category in 2021	Absolute number	in %
Total	4 989	
Rechtspfleger	NAP	NAP
Non-judge staff assisting the judge	3 364	67,4%
Staff in charge of administrative tasks	694	13,9%
Technical staff	174	3,5%
Other	757	15,2%

In this cycle, the non-judge staff is broken down as follows:

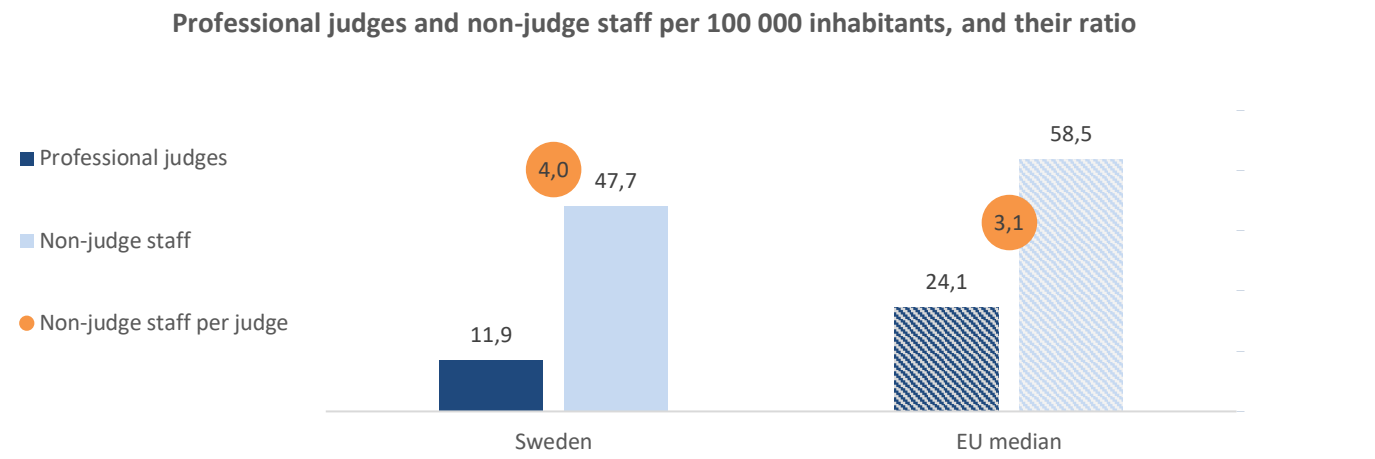

- 3 364 non-judge staff whose task is to assist the judges such as registrars (of which 2 723 are Female);
- 694 staff in charge of different administrative tasks and of the court management (of which 456 are Female);
- 174 technical staff (of which 49 are Female);
- 757 other (of which 526 are Female);

The category "Other non-judge staff" includes junior judges and associate judges in the judicial training program. A junior judge deals with the court's (court of first instance) business in the same way as the permanent judges, but with a smaller workload and with some exceptions as to types of cases handled. An acting associate judge (in a court of appeal) deals with the court's business in the same way as the permanent judges, but with a smaller workload. However, an associate judge is never a presiding judge.

The numbers do not include staff on leave or Swedish National Courts Administration (SNCA) employees. The SNCA is a government agency responsible for the service organisation of courts, namely the overall coordination and joint issues. It has no authority over the courts' judicial business or their verdicts. It also provides support to the courts, rental and tenancy tribunals and the National Legal Aid Authority and the Legal Aid Board. It deals with issues related to staff development, training and information, development of regulations, instructions and guidance. It ensures that operations are conducted in an effective and accessible way for citizens.

As regards the distribution of the number of prosecutors among the different judicial instances, Sweden presents some peculiarities which should be mentioned. Namely, cases at first and second instance level are handled by the same prosecutors. Indeed, all Swedish prosecutors have the mandate to act at first instance as well as second instance level. The total number of prosecutors at first and second instance level is 1121, 336 males and 785 females). However, only the Prosecutor General and specifically appointed prosecutors working in the Office of the Prosecutor General have the mandate to act in the Supreme Court.

In this cycle, the total number of Female prosecutors (all instances) is 793, which represents 70,0% of the total number of prosecutors.

Within the total number of prosecutors 12 intervene at third instance (of which 8 are female).

In 2021, there are 6 436 lawyers, which is 2,9% more than in 2020. There are 2254 female lawyers which is 35% of the total.

Sweden has 61,6 lawyers per 100 000 inhabitants, which is below the EU median of 122,4 lawyers per 100 000 inhabitants.

Salaries of professional judges and prosecutors at beginning of a career and at the highest instance

According to 2021 data, the absolute gross salary of a judge at the beginning of his/her career in Sweden of 79 387€ is more than 50% above when compared to the EU median of 52 534€. As a ratio with the annual average salary of the country, the salary for a judge at the beginning of his/her career is: 1,83 compared with EU median of : 1,90.

The Swedish Prosecution Authority cannot provide net annual salary, since it is not possible to calculate it accurately. More precisely, the net annual salary is not stated as the level of income tax varies depending on the income and domicile.

3. Legal aid and court fees in Sweden (2021 data)

In Sweden, legal aid is available for :

- > Representation in court:
 - Criminal cases ✓
 - Other than criminal cases ✓
- > Legal advice, ADR and other legal services:
 - Criminal cases ✓
 - Other than criminal cases ✓
- > Fees related to enforcement of judicial decisions as fees for enforcement agents (Q18) ✓
- > Other costs than above (Q19) ✓

According to section 19 of the Legal Aid Act, an individual who is granted legal aid does not have to pay fees to the Swedish Enforcement Authority. Put differently, legal aid covers fees related to enforcement of judicial decisions, regardless of the type of case.

In criminal cases, legal aid can be granted for travel expenses and subsistence in respect of the accused person. The later can also be granted legal aid for expenses for witnesses who are not called by the prosecutor. In other than criminal cases, an individual granted with legal aid can have expenses covered for travelling and subsistence, evidence in court, investigation costs to a certain amount (10 000 SEK, approximately 1 000 EUR) and costs for a mediator appointed by the court, or advisor.

Number of cases for which legal aid has been granted

Complete data on number of cases granted with legal aid cannot be provided. The National Legal Aid Authority (NLAA) has granted legal aid in 483 cases in 2021. However, the total number of cases for which legal aid has been granted cannot be properly estimated. This is due to the fact that decisions on granting of legal aid can also be issued by the Swedish courts and the NLAA cannot ensure that the courts have provided accurate data on the numbers of cases for which they have granted legal aid. However, according to the NLAA statistics regarding 2021, a total of 6 321 cases have been closed/settled by the NLAA. 5 814 of these cases have started in the courts, whereas 507 have been initiated directly at the NLAA.

Timeframes of the procedure for granting legal aid (in relation to the duration from the initial legal aid request to the final approval of the legal aid request)

- Maximum duration prescribed in law/regulations: NAP
- Actual average duration: NA

According to the National Legal Aid Authority, when the application was being processed by the NLAA, the median from application to decision was 8 days in 2021.

● **Efficiency indicators**

- Clearance Rate (CR) and Disposition Time (DT)

The Clearance Rate shows the capacity of a judicial system to deal with the incoming cases. A Clearance Rate of 100% and higher does not generate backlog.

The Disposition Time determines the estimated number of days necessary for a pending case to be solved in a court.

Clearance Rate by instance and by matter in 2021 (%)

DispositionTime by instance and by matter in 2021 (days)

Generally speaking, when analysing all instances combined, in 2021, administrative proceedings appear to be the fastest in Sweden. This is in contrast with the trend observed in the EU for the reference year; namely, administrative proceedings appear as the longest, while criminal proceedings seem to be the shortest in the EU. Indeed, in all matters, the total length of proceedings in Sweden is below the respective EU median, especially in administrative, but also civil litigations.

At first instance, the Clearance Rate indicator is satisfactory in all matters, while the Disposition Time indicator is slightly above the EU median only in respect of criminal cases. At second instance, courts also seem to be the less efficient in criminal matters with a Clearance Rate below the 100% threshold and a Disposition Time above the EU median. At third instance, for all matters the Clearance Rate indicator remains below the 100%, but the Disposition Time is considerably below the EU median values.

In 2021, it seems that courts experienced difficulties in terms of efficiency only in respect of second instance criminal cases. Indeed, the number of incoming criminal cases has increased at second instance, as well as the number of pending cases at the end of 2021, due to the fact that the number of criminal cases has increased in first instance during the last few years.

Between 2020 and 2021, the Clearance Rate has increased by 1,1 points.

In 2021, first instance administrative law cases are solved in approximately 102 days, which is significantly below the EU median of 296 days.

The analysis of the 2020 - 2021 period reveals a -4,4% decrease of the Disposition Time.

It is worth mentioning that in Sweden, migration cases are part of the administrative law cases.

The administrative courts (including migration cases) had the highest number ever of cases filed in 2020. During 2021 the number of cases filed was still high but with a seven percent decrease compared to last year. A large number of cases was resolved also in 2021 but slightly lower than in 2020. As in the district courts resolved cases in administrative courts exceeded the number of filed cases and pending cases decreased for the second year in a row. Cases pending older than two years decreased a lot compared to previous year. For the migration cases there was a decline of cases filed from previous year with 14 percent less cases filed, of which asylum cases decreased with 39 %. Resolved migration cases also decreased with 11 % but were higher than the number of cases filed which resulted in a lower number of pending migration cases than last year, a decrease of 20 % of which asylum cases decreased with 34 % (from high numbers).

Clearance Rate (%) and Disposition Time (days) for First Instance Total criminal law cases

With a Clearance Rate calculated at 99,7% in 2021 Sweden seems to be able to deal with its first instance total criminal law cases.

Between 2020 and 2021, the Clearance Rate has increased by 3,7 points.

In 2021, first instance total criminal law cases are solved in approximately 142 days, which is slightly above the EU median of 134 days.

The analysis of the 2020 - 2021 period reveals a -4,9% decrease of the Disposition Time.

It should be recalled that in the Swedish case management system, there are no subcategories of criminal cases such as sevre, minor and other criminal cases. Some misdemeanour criminal cases, resulting in breach-of-regulations fine and summary imposition of fine, are not handled by the courts (but by the Swedish Police Authority/Prosecution Authority). The Swedish National Courts Administration's commission (as regards statistics) from the Government is about describing the operation of the courts and "details" about criminal cases are not needed to fulfill this task. Another authority, the Swedish National Council for Crime Prevention, describes the criminal statistics in Sweden, but only as regards reported cases and cases taken legal proceedings against, not the flow of cases to and from the courts. It is noteworthy that there are two different types of cases in the procedural framework (the Swedish Code of Judicial Procedure), civil cases and criminal cases.

The number of incoming criminal cases increased by two percent at the district court level. This could be related to an increased inflow of cases concerning appointment of a public defender. Another contributing aspect can be the fact that some criminal cases can be processed in a more swift and rapid manner as a result of the implementation of so-called "fast track" procedure for certain types of criminal cases. With the "fast track" project being extended to include more district courts at the beginning of this year, the number of incoming criminal cases might have increased as a consequence of the extended application of the fast track method for the prosecution and processing of criminal cases.

* Please note that these figures include traffic offence cases.

It is worth mentioning that vertical consistency in the table cannot be ensured. In fact, each case (suspicion of crime) usually gets registered only once. A suspicion of crime can, however, be “resolved” more than once. When it is reopened it does not receive a new registration date, as the old one is still valid. So it is not “incoming” again. But the next decision that closes the case generates a new date when the case is considered to be resolved. If these decisions are taken during different years the case is counted as “resolved” twice, but only “incoming” once. As a result, there are usually more resolved cases than incoming, even if the number of pending cases are the same. The most usual examples are: 1) when a summary imposition of a fine is issued, which means that the case is resolved. If the fine is not paid, the case will be reopened followed by a decision to prosecute, resolving the case a second time; 2) when the prosecutor decides that the police shall take over responsibility for the preliminary investigation. If the investigation later on returns from the police to the prosecution agency the case will be reopened and later resolved once again. But as it is the same case it will not receive a new registration date.

In respect of the category “3.1.1 Discontinued by the public prosecutor because the offender could not be identified”, it should be noticed that, on the one hand, the numbers are very small and do not affect the totals considerably and, on the other hand, these types of cases, when they occur, are included in other subcategories”.

8. Systems for measuring and evaluating the performance of courts and public prosecution services in Sweden (2021 data)

In Sweden, quality standards are not determined for the judicial system at the national level.

Systems for measuring and evaluating courts' performance

A regular monitoring system of court activities is in place concerning:

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the courts)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✗
Number of resolved cases	✓	Number of appeals	✓
Number of pending cases	✓	Appeal ratio	✗
Backlogs	✓	Clearance rate	✗
Productivity of judges and court staff	✗	Disposition time	✗
Satisfaction of court staff	✗	Other	✓

The Swedish courts all use the same case management system but with different set-ups. The system is used for all categories of cases. Information is shared when a case is appealed to a higher instance court. In criminal cases the system communicates with the National Police Board and the prosecutors office. The system also provides the statistics system with data on a daily basis.

The statistics are found in ready-made reports and some people who are employed by a court can obtain the information quickly and easily. All courts have access to all available information. The statistics system contains operational statistics, as well as historical data and data which is updated continuously. The statistics database and reports are updated every night.

The statistics are mainly used for analysis and follow-ups for all courts and the National Courts Administration, annual reports to the government, official statistics (annual publication), inquiries from media, authorities and public as well as for allocation of budgetary resources between different courts.

“Other”: Statistics concerning review permits in a superior court (this is often required when you appeal to a superior court); number of incoming cases where there is a demand for a review permit; number of cases that receives a review permit; time to examine if a review permit will be given; Statistics concerning hearings - number and duration of hearings in a case; number of cancelled hearings in a case; Statistics concerning parties - number and type of parties in a case (defendants, witnesses, parties injured, plaintiffs); number of cases with detained persons (in custody) in a criminal case; number of cases including minor offenders (< 18 years old); Statistics concerning various types of decisions - number of times a judicial decision is changed in a superior court.

In Sweden, there is a system to regularly evaluate the court performance based primarily on defined indicators and the reporting is more frequent than annual.

The evaluation is carried out on an annual basis and occasionally when needed.

Performance and quality indicators are defined for the activity of each court.

The following indicators are used:

Number of incoming cases	✗	Satisfaction of users (regarding the services delivered by the courts)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✗
Number of resolved cases	✓	Number of appeals	✗
Number of pending cases	✓	Appeal ratio	✗
Backlogs	✓	Clearance rate	✗
Productivity of judges and court staff	✓	Disposition time	✗
Satisfaction of court staff	✗	Other	✗

The evaluation of the courts' activities is used for the later allocation of means in the courts.

A regular monitoring system of public prosecution services activities is in place concerning:

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the public prosecution)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✓
Number of resolved cases	✓	Clearance rate	✗
Number of pending cases	✓	Disposition time	✗
Backlogs	✗	Percentage of convictions and acquittals	✗
Productivity of prosecutors and prosecution staff	✗	Other	✗
Satisfaction of prosecution staff	✓		

In Sweden, there is a system to evaluate regularly the activity of each public prosecution service and the reporting is more frequent than annual.

More precisely, there is a regular evaluation of the Prosecution Authority, both by internal audit and external through, e.g. meetings between the Prosecutor-General and the Ministry of Justice once a year, and with the Swedish National Audit Office.

Performance and quality indicators are defined for the activity of each public prosecution service.

The following indicators are used:

Number of incoming cases	✗	Satisfaction of users (regarding the services delivered by the public prosecutors)	✗
Length of proceedings (timeframes)	✗	Costs of the judicial procedures	✗
Number of resolved cases	✗	Clearance rate	✗
Number of pending cases	✓	Disposition time	✗
Backlogs	✗	Percentage of convictions and acquittals	✗
Productivity of prosecutors and prosecution staff	✗	Other	✓
Satisfaction of prosecution staff	✗		

"Other": number of individuals and cases prosecuted (including decisions on summary imposition of a fine and waiver of prosecution); case handling time (including investigation time) and decision making time (time from a completed preliminary investigation to decision by a prosecutor); number of cases where prosecutors request confiscation of proceeds of crime. There are of course many more performance indicators, but these are the main ones as specified in SPA:s annual report.

The evaluation of the public prosecution services' activities is used for the later allocation of means in the public prosecution services.
