Anti-Doping Questionnaire

## Implementation of anti-doping policies in 2020 - Australia

### Implementation 2020 - Questionnaire - Modified 1.0

#### Objective :

In order to implement the requirements of the Article 9 of the Anti-Doping Convention, the online annual questionnaire is ready for collection of data regarding anti-doping policies in 2020.

#### Instruction :

For detailed instructions please select the links to documentation at the top of the page.

In case you face any problems which would prevent you from filling in the questionnaire, please report it to us by e-mail [sport.t-do@coe.int](mailto:sport.t-do@coe.int).

You are kindly requested to fill in, save and post your country's data for 2020 before 1 June 2021.

#### Questions :

##### 1. Number of athletes

Please estimate the number of athletes in the following categories within your country:

##### international-level athletes

Min numeric value allowed : 0

[ 800 ] your comment (optional) .....

☐ Data not available

##### national-level athletes

Min numeric value allowed : 0

[ 1577 ] your comment (optional) .....

☐ Data not available

other athletes (including recreational athletes)

## 25. Disciplinary system

Please describe the disciplinary process for the anti-doping rule violations and application of the T-DO Recommendation on ensuring the independence of hearing panels (bodies) and promoting fair trial in anti-doping cases [T-DO/Rec(2017)01]

<http://rm.coe.int/recommendation-on-ensuring-the-independence-of-hearing-panels-bodies-a/1680735159>

	—	—	—
Has your State established centralised panel/body in charge of all hearing proceedings in anti-doping matters (hearing panel)?	Yes	.	.
Is the hearing panel independent, and operationally independent from sport movement (i.a. national federations, National Olympic Committee, National Paralympic Committee)?	Yes	.	.
Is the hearing panel operationally independent from the government?	Yes	.	.
Is the hearing panel operationally independent from the NADO?	Yes	.	.
Are you aware of T-DO/Rec(2017)01?	Yes	.	.
Is the composition of the hearing panel in line with the requirements outlined in T-DO/Rec(2017)01?	Yes	.	.
Are the rights of access to justice ensured in accordance with T-DO/Rec(2017)01?	.	.	No
Other comments	Yes. Australia has established the National Sports Tribunal, an independent and specialist tribunal for the fair hearing and resolution of sporting disputes. The National Sport Tribunal is the default hearing panel for all anti-doping disputes, unless the Sport Integrity Australia Chief Executive Officer has approved a sporting organisation's anti-doping policy that allows for another forum to hear the dispute. In this situation the Sport Integrity Australia CEO must be satisfied that the alternative tribunal is both operationally and organisationally independent of the sporting organisation.	.	The National Sports Tribunal Chief Executive Officer allocates panel members from a pool of approved panellists for particular matters. Panellists are appointed by the Minister for Sport and must be an expert in a particular field, including sports law, scientific or medical expertise in relation to sport, sports governance or sports administration, dispute resolution, ethics, or investigative practices or techniques.

Anti-Doping Questionnaire

## Implementation of anti-doping policies in 2020 - Belgium

## Implementation 2020 - Questionnaire - Modified 1.0

## Objective :

In order to implement the requirements of the Article 9 of the Anti-Doping Convention, the online annual questionnaire is ready for collection of data regarding anti-doping policies in 2020.

## Instruction :

For detailed instructions please select the links to documentation at the top of the page.

In case you face any problems which would prevent you from filling in the questionnaire, please report it to us by e-mail [sport.t-do@coe.int](mailto:sport.t-do@coe.int).

You are kindly requested to fill in, save and post your country's data for 2020 before 1 June 2021.

## 17. Quality certificate

Is your NADO or part of its procedures certified according to a quality standard (such as ISO or any other quality assurance system)?

( ) Yes, please specify which standard, its scope and validity .....

( ) In progress, please specify .....

( X ) No. Your comment (optional) ADD works according to the principles of the quality management system ISO 9001. ADD has previously been ISO 9001 certified, but opted out of the certificate in 2018. The reason is that in particular the WADA code with associated standards and the entry into force of the Personal Data Regulation in 2018, set specific and relevant requirements for ADD, which are more tailored to ADD's activities than the more generic requirements from ISO 9001. However, ADD is still following the development of ISO 9001 closely and ADD will consider whether any changes to ISO 9001 should be implemented in ADD's quality system.

[ 1 ] in 2020; your comment (optional)ESTCIS Pharmacist Janne Sepp: Abstract World Anti-Doping Agency (WADA) Prohibited List is an international standard that provides the information about substances and methods prohibited and/or limited for use in sports. As this standard is in essence a declarative document, it is complicated to understand all the information there, especially without medical background. Many countries have therefore conducted their own online drug search systems to provide easier access to information about prohibited substances and methods. But these systems are focused specifically on a certain country in two important aspects – language and selection of medicines. As for Estonia, where the prior drug search of Estonian Anti-Doping had finished operating, there was a need for a new up-to-date search system that would provide athletes and support personnel with information about the prohibited status of medications. Therefore, Estonian Center for Integrity in Sports (ESTCIS) in collaboration with Estonian Foundation of Sport Education and Information developed the Estonian medicine search. For development, first a database with the information of all prohibited substances was conducted. The Prohibited List, the listings of Estonian Register of Medicinal Products and World Health Organization ATC index were used to ensure its reliability. Secondly, the data about medicines was provided by Estonian State Agency of Medicines via X-tee, the data exchange layer for information systems, enabling a secure Internet-based data exchange between information systems. Then, the previously described data were harmonized and connected. Finally, by using infotechnological solutions, the online Estonian medicine search for athletes and support personnel was developed. The Estonian medicine search provides information about the prohibited status of all medicinal products marketed in Estonia, as well as direct access to their online package leaflets. Both, the substances and medicinal products, can be searched. We hope that quick access to relevant information about the prohibited status of medications is a valuable tool that can reduce unintentional use of prohibited substances and violation of anti-doping rules. All in all, the developed Estonian medicine search is useful for the whole population, especially for amateur athletes. KEY WORDS: prohibited substance, medicine, medicine search, effective substance

## Implementation of anti-doping policies in 2020 - Finland

### Implementation 2020 - Questionnaire - Modified 1.0

#### Objective :

In order to implement the requirements of the Article 9 of the Anti-Doping Convention, the online annual questionnaire is ready for collection of data regarding anti-doping policies in 2020.

#### Instruction :

For detailed instructions please select the links to documentation at the top of the page.

In case you face any problems which would prevent you from filling in the questionnaire, please report it to us by e-mail [sport.t-do@coe.int](mailto:sport.t-do@coe.int).

You are kindly requested to fill in, save and post your country's data for 2020 before 1 June 2021.

#### Questions :

## 26. Appeals system

Please describe the process for handling anti-doping rule violations appeals

Describe, upload documents or add the link to the relevant content In Romania, the ADRV appeals are regulated via Law no. 227/2006 and more specifically provided for in the Regulations for the organization and functioning of the Appeal Panel.

The Appeal Panel consists of 7 voting members appointed by: the academia (2), the Romanian Olympic and Sports Committee (1) and

the General Secretariat of the Government (4) for a 2-year mandate which can be renewed.

In consideration of the T-DO/Rec (2017) 01 (namely section 2c) "procedural fees should not prevent a person from accessing to the hearing") the fee to file an appeal has been cut down via decision published in the Official Journal of Romania.

At the present time, the Regulations for both panels (Hearing Panel and Appeal Panel) are being re-drafted in outcome to the changes introduced by the 2021 version of the WADA Code. As such, in consideration of the institutional independence requirement established for the appeal panels, the Appeal Panel will be given a new regulatory framework.

## 26. Appeals system

Please describe the process for handling anti-doping rule violations appeals

Describe, upload documents or add the link to the relevant content The sanctioning decisions of the Spanish Agency for Health Protection in Sport (AEPSAD) may be appealed before the Spanish Administrative Body for disputes in Sport (TAD). The time limit for special appeals on doping matters shall be thirty days from the day following notification of the decision. Natural or legal persons

affected by the decision of the AEPSAD shall have the right to appeal to TAD.

TAD is a collegiate body at state level, organically attached to the High Council for Sport, which acts independently of the latter. It is made up of seven independent and irremovable members. In the exercise of their functions, they may not receive any order or instruction from any public authority or any other person.

The decision of TAD may be appealed by the interested parties within two months of the notification of the decision before the contentious-administrative jurisdiction.

## 31. Statistics on doping trafficking

Do law enforcement agencies share data on the seizure of doping substances with the NADO?

☒ Yes, please specify how many seizures have been reported in 2020 Approximate number of seizures made by Guardia Civil, National Police and Customs: 706. This number includes seizures of doping substances, such as anabolic agents, steroids and androgens; diuretics; hormones, insulins and hormone antagonists and modulators; and stimulants generally used in sports competitions. That is, substances that were presumably intended for the purpose of sports doping. However, if we include drugs, narcotics and psychotropic stimulants, such as cocaine, amphetamines, cannabinoids and opiates, which are also included in the WADA Prohibited List, we would be talking about a total of 262321 seizures in 2020. The data are numbers of seizures or interventions, and do not refer to the quantity of

substances.
