These records represent thousands of packages seized per month. We utilise this reporting to undertake checks to identify any athletes/support people potentially subject to the jurisdiction of the WAD Code. We also use the data to do trend analysis (country of origin, substance, consigner, consignee etc) and provide those insights back to Department of Home Affairs for target development. We also receive ad-hoc reporting through State based Policing and Health regulatory agencies regarding the seizure of doping substances as part of regular law enforcement processes. We are looking to further expand on these relationships through the National Strategy for Information Sharing to identify opportunities to increase the consistency of this reporting and to utilise our analysis of the seizure data above to identify potential targets involved in the trafficking of doping substances to be addressed in collaboration.
