MEMORY map

The future cannot simply be separated from the past. [...] We come to the future only through the past. Especially when that past is still felt in the present. Something needs to be done with it because the path to the future will remain simply blocked. After all, the goal is the future, not the past. [...] It's transforming energy."

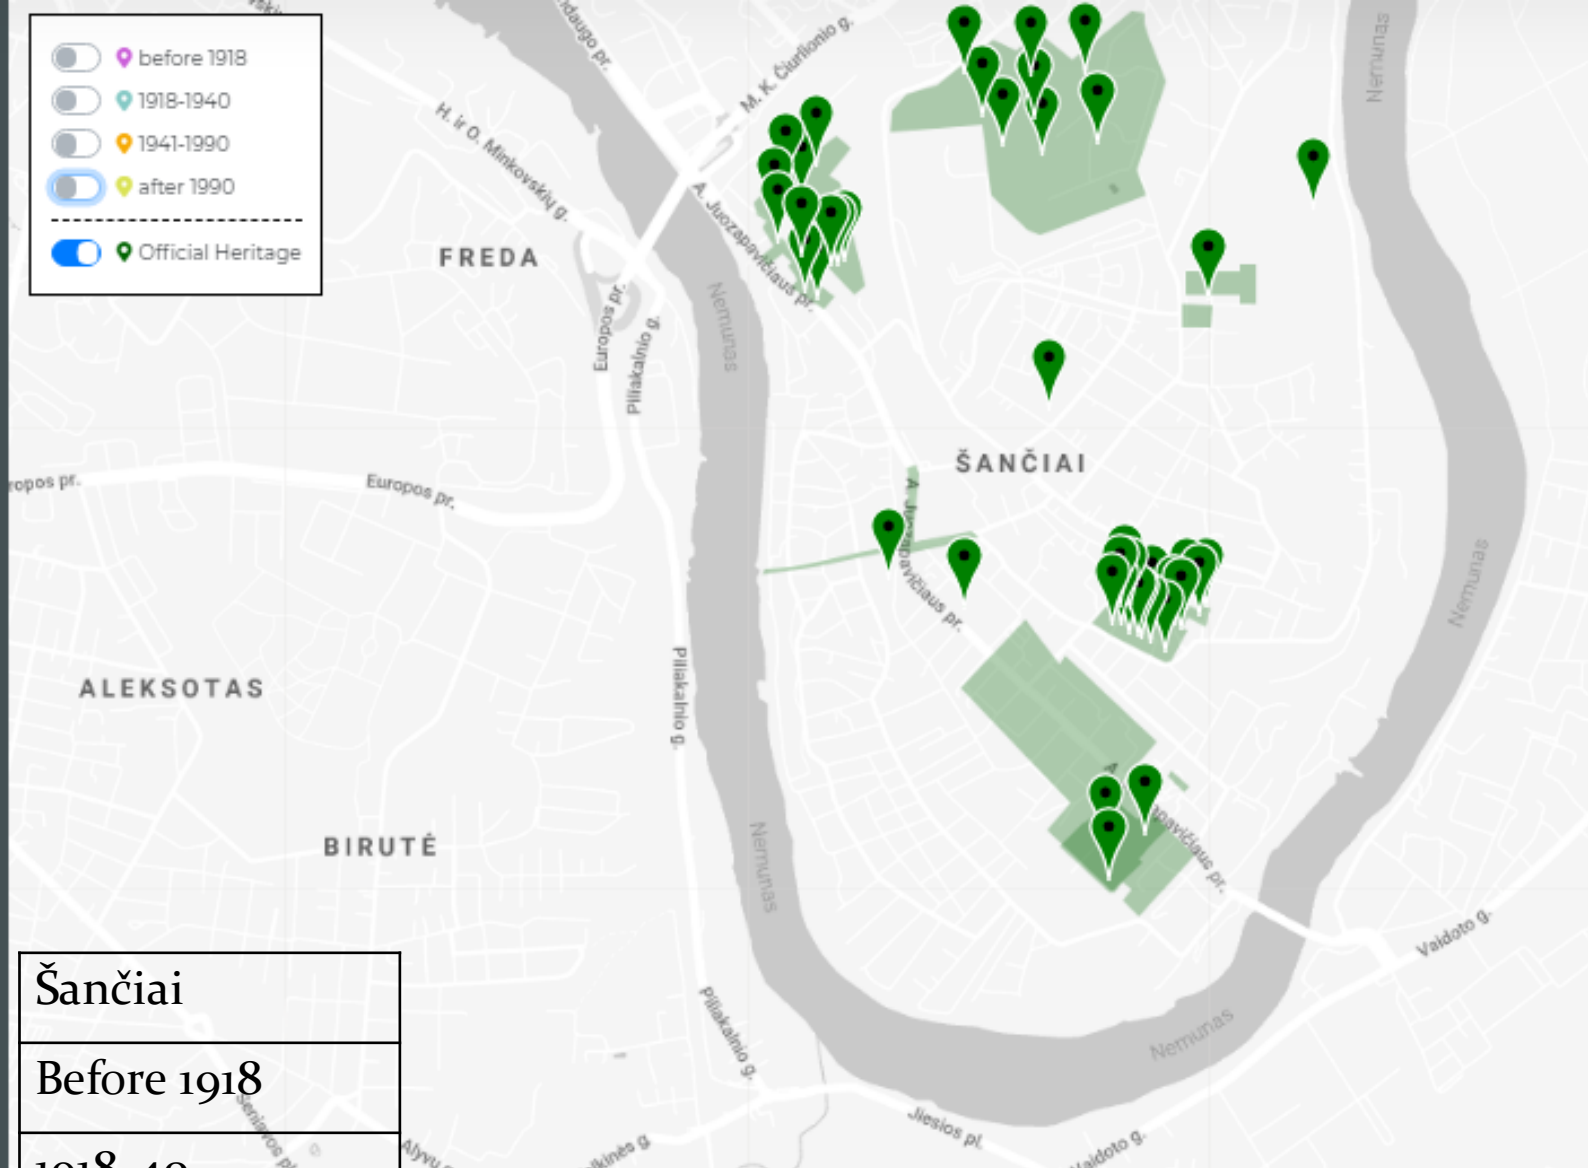

Aleida Assman, researcher of memory culture

The goal of the Šančiai memory map is to collect the values of personal and collective memory and share them with others. We seek to create the history of Šančiai based not only on official policy makers, but also on the memories, experiences, legends, family albums, photos, etc. of each of us. We hope that this map will become a fulcrum for creating a vision of the future of Šančiai and a means to get to know this area better.
