Prosecutors General of the Council of Europe

15 minutes on international waste trade

Rob de Rijck

National coordinating prosecutor for environmental crime in The Netherlands

Vice-President of the European Network of Prosecutors for the Environment ENPE

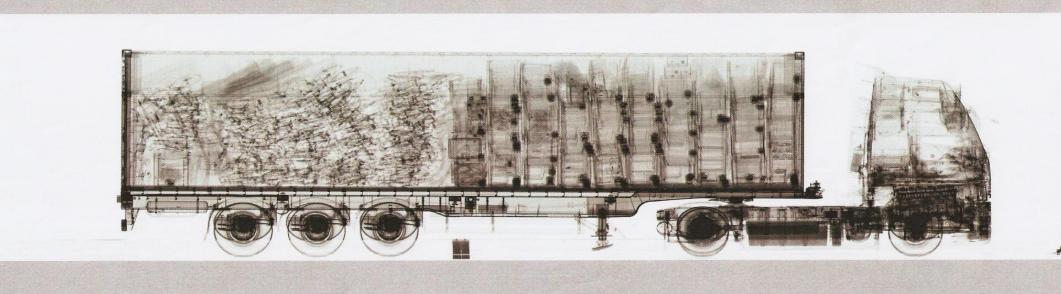

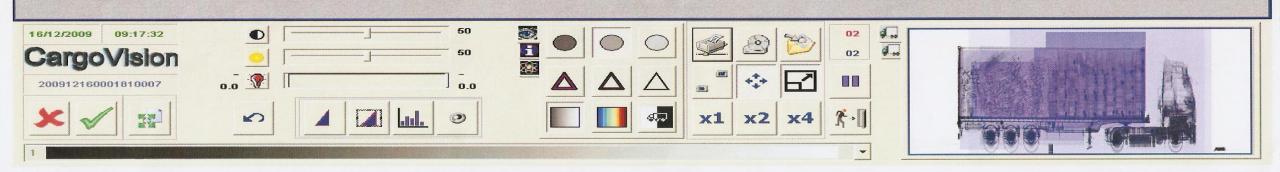

0.22

Three fundamentals of waste

Every human activity produces waste.

Waste, if left untreated where it originates, will lead to suffocation. Generation of waste always requires transportation and disposal or treatment.

It is profitable not to transport and treat waste as environmentally required. A waste holder profits through externalizing costs to society, the planet and future generations.

International waste trade in figures, 2018

Global trade in waste: 182 million tonnes

EU generation of waste: 2400 million tonnes

Waste transport within the EU: 67 million tonnes

EU export to third countries: **32.7 million tonnes** (≈ 1.9 million containers)

EU import from third countries: 16 million tonnes

International waste trade in figures

IMPEL suspects one fifth of all transports to be non-compliant.

Criminological literature tends to estimate the degree of fraud in whatever field at 10 %.

If so, in 2018 3 – 7 million tonnes of waste were exported from the EU in infringement of the rules.

Environmental risks:

Dumping

Environmental risks:

Irresponsible recovery

Relevant bodies of law

01

1989

Basel Convention on transboundary movements of hazardous wastes

03

2006

EU Waste Shipment Regulation

02

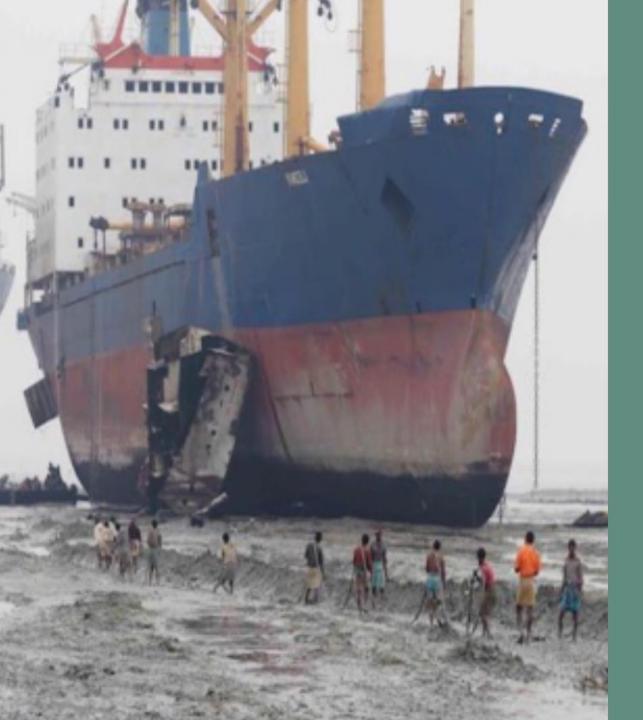

2001

OECD Decision on transboundary movements of wastes for recovery

04

2008

EU Directive on the protection of the environment through criminal law (Ecocrime Directive)

TWO SPECIFIC ELEMENTS REGARDING CRIMINAL LAW

01

The Basel Convention obliges its Parties to treat illegal shipments of hazardous wastes as a criminal offence

02

The EU Ecocrime Directive obliges Member States to criminalize shipments violating the EU Waste Shipment Regulation
