## **Introduction**

The European Charter for Regional or Minority Languages was signed by Ukraine on 2 May 1996 and ratified by the Verkhovna Rada of Ukraine on 15 May 2003 under the relevant law (No. 802-IV “On Ratification of the European Charter for Regional or Minority Languages”). On 19 September, 2005, Ukraine submitted a document of accession to this international treaty to the Secretary General of the Council of Europe. The Charter entered into force in Ukraine on 1 January 2006. According to the Law on Ratification of the Charter, Ukraine undertook the following obligations:

“2. The provisions of the Charter apply to the languages of the following national minorities of Ukraine: Belarusian, Bulgarian, Gagauz, Greek, Jewish, Crimean Tatar, Moldavian, German, Polish, Russian, Romanian, Slovak, and Hungarian.

3. Ukraine undertakes obligations in accordance with Parts I, II, IV, and V of the Charter, except for Clause 5 of Article 7 of Part II.

4. With respect to each language to which the provisions of the Charter apply in accordance with Article 2 of this Law, the following clauses and Subclauses of Articles 8–14 of Part III of the Charter shall apply:

a) Subclauses “a (iii)”, “b (iv)”, “c (iv)”, “d (iv)”, “e (iii)”, “f (iii)”, “g”, “h”, and “i” of Clause 1 and Clause 2 of Article 8;

b) Subclauses “a (iii)”, “b (iii)”, “c (iii)” of Clause 1, Subclause “c” of Clause 2 and Clause 3 of Article 9;

c) Subclauses “a”, “c”, “d”, “e”, “f”, “g” of Clause 2, Subclause “c” of Clause 4 of Article 10;

d) Subclauses “a (iii)”, “b (ii)”, “c (ii)”, “d”, “e (i)”, “g” of Clause 1, and Clauses 2 and 3 of Article 11;

e) Subclauses “a”, “b”, “c”, “d”, “f”, “g” of Clause 1, and Clauses 2 and 3 of Article 12;

f) Subclauses “b”, “c” of Clause 1 of Article 13;

e) Subclauses “a” and “b” of Article 14.

5. When applying the provisions of the Charter, measures aimed at the establishment of the Ukrainian language as the state language, its development and functioning in all spheres of public life throughout the territory of Ukraine, are not considered to hinder or pose a threat to the preservation or development of languages, to which, in accordance with Article 2 of this Law the provisions of the Charter apply.”

According to this law, Ukraine undertook to protect the languages of 13 national minorities spoken on its territory.

The fifth periodic report was prepared by the Ministry of Culture and Information Policy of Ukraine in the context of active hostilities related to the full-scale invasion of the Russian Federation. The report is based on information and analytical materials provided by the central executive authorities, regional state administrations and organisations of national minorities, taking into account the suggestions and comments of the public and recommendations provided by the Committee of Experts on the legal basis for the implementation of the European Charter for Regional or Minority Languages.

It should also be taken into consideration that part of the territories of the Donetsk, Dnipropetrovsk, Zaporizhzhia, Luhansk, Mykolaiv, Kharkiv, and Kherson regions and the entire territory of the Autonomous Republic of Crimea and the city of Sevastopol are under temporary occupation or in the zone of hostilities, therefore the full implementation of all the provisions of the European Charter for Regional or Minority Languages in the reporting period is impossible. At the same time, it should be noted that as a result of active hostilities on the territory of Ukraine and the occupation of part of its territory, representatives of national communities were forced to leave for safer regions of Ukraine or other countries.

## **PART I**

### **1. General Provisions**

#### **1.1. Legislation of Ukraine on Languages**

The legislation of Ukraine on languages consists of the Constitution of Ukraine, the Declaration of the Rights of Nationalities of Ukraine, the laws of Ukraine “On the Ratification of the European Charter for Regional or Minority Languages,” “On National Minorities (Communities) of Ukraine,” “On the Indigenous Peoples of Ukraine,” “On the Ratification of the Framework Convention of the Council of Europe on the Protection of National Minorities” and special legislation, which includes: laws of Ukraine “On ensuring the functioning of the Ukrainian language as a state language,” “On citizenship of Ukraine,” “On public associations,” “On education,” “On media,” “On culture,” “On local self-government in Ukraine,” “On Freedom of Conscience and Religious Organisations,” the Civil Code of Ukraine, the Civil Procedure Code of Ukraine, the Family Code of Ukraine, the Administrative Procedure Code of Ukraine, the Criminal Procedure Code of Ukraine, and other legal acts regulating the use of languages, including international treaties, consent to the binding nature of which has been granted by the Verkhovna Rada of Ukraine.

Article 10 of the Constitution of Ukraine establishes that the state language in Ukraine is the Ukrainian language. The state ensures the comprehensive development and functioning of the Ukrainian language in all spheres of public life throughout the territory of Ukraine. In Ukraine, the free development, use and protection of the languages of the national minorities of Ukraine is guaranteed. The state promotes the learning of languages of international communication. The use of languages in Ukraine is guaranteed by the Constitution of Ukraine.

According to Article 11 of the Constitution of Ukraine, the State promotes the consolidation and development of the Ukrainian nation, its historical conscience, traditions and culture, as well as development of the ethnic, cultural, linguistic and religious identity of all the indigenous peoples and national minorities of Ukraine.

On 16 July 2019, the Law of Ukraine “On Ensuring the Functioning of the Ukrainian Language as a State Language” (hereinafter referred to as the “Language Law”) entered into force. It regulates the functioning and use of the Ukrainian language as a state language in the spheres of public life defined by this Law throughout the territory of Ukraine.

At the same time, along with regulating the procedure for the use of the state language in the relevant spheres, the Language Law also defines specific features of the use of the languages of indigenous peoples, national minorities, official languages of the European Union and other languages in those spheres where the state language functions and is a priority one. These are, in particular, such areas as education, public services, health care, activities of state authorities, authorities of the Autonomous Republic of Crimea, local self-government bodies, enterprises, institutions and organisations of state and communal forms of ownership, judiciary, culture, book publishing and book distribution, presentation of information for general information, public events, transcription of names and surnames in accordance with their national tradition in identity documents, etc.

In accordance with Part 3 of Article 2 of the Language Law, the procedure for using the Crimean Tatar language and other languages of indigenous peoples and national minorities in the spheres of public life is determined by the law on the procedure for the implementation of the rights of indigenous peoples and national minorities, taking into account the features defined by this Law.

To implement the relevant provisions, on 1 July 2021, the Verkhovna Rada of Ukraine adopted the Law of Ukraine “On Indigenous Peoples of Ukraine,” which defined the basic rights of representatives of indigenous peoples. In particular, Article 5 of this law specifies that the state guarantees the research, preservation and development of the languages of the indigenous peoples of Ukraine, which are under threat of extinction.

To implement the provisions of the specified Law and to ensure the realisation of the rights of the indigenous peoples of Ukraine, the following documents were adopted:

- Resolution of the Cabinet of Ministers of Ukraine dated 19 August 2022 No. 936 “On approval of the Procedure for establishing the legal status of the representative body of the indigenous people of Ukraine and depriving it of such status;”

- Resolution of the Cabinet of Ministers of Ukraine dated 19 August 2022 No. 1018 “On Approval of the Procedure for Consultations of Executive Authorities with Representative Bodies of Indigenous Peoples of Ukraine.”

Also, on 13 December 2022, the Law of Ukraine “On National Minorities (Communities) of Ukraine” was adopted, which is based on the Constitution of Ukraine, the Declaration of the Rights of Nationalities of Ukraine, takes into account the provisions of the Framework Convention of the Council of Europe on the Protection of National Minorities, the European Charter for Regional or Minority Languages, other international treaties regarding the rights of persons belonging to national minorities (communities) of Ukraine, consent to the binding nature of which has been granted by the Verkhovna Rada of Ukraine.

On 12 June 2023, the Venice Commission published its opinion on the Law of Ukraine “On National Minorities (Communities) of Ukraine.”

The central bodies of the executive power, in cooperation with the people’s deputies of Ukraine and the Cabinet of Ministers of Ukraine, carried out work on the preparation of agreed proposals for making relevant changes to the Law of Ukraine “On National Minorities (Communities) of Ukraine” and on 21 September 2023, the Verkhovna Rada of Ukraine adopted the Law of Ukraine “On Amendments to the Law of Ukraine “On National Minorities (Communities) of Ukraine” regarding some issues of exercising the rights and freedoms of persons belonging to national minorities (communities) of Ukraine” (hereinafter referred to as Law No. 3389-IX). The adopted changes, in particular, provide for state guarantees of free provision of textbooks (in particular, electronic ones) to students of complete general secondary education who belong to national minorities (communities). The possibility of using the languages of national minorities (communities) in the field of advertising, during public, cultural, artistic, entertainment events and shows, emergency assistance provision, providing the

assistance and protection to victims of domestic violence, care in nursing homes for elderly citizens, etc. is also ensured.

On 9 October 2023, the Venice Commission published an opinion on the specified law, which noted Ukraine's positive developments in the field of ensuring the rights and freedoms of national minorities (communities). At the same time, the opinion emphasizes the need to make changes to a number of laws of Ukraine in certain spheres of legal regulation (mostly in the sphere of education and language).

On 8 December 2023, the Verkhovna Rada of Ukraine adopted the Law of Ukraine "On Amendments to Certain Laws of Ukraine Regarding the Consideration of the Expert Assessment of the Council of Europe and its Bodies on the Rights of National Minorities (Communities) in Certain Areas," which underpins Ukraine's European integration aspirations with a balanced approach to the protection of the language rights of national minorities and the Ukrainian language as the state language in certain areas, and the conclusions of the Venice Commission and the recommendations of the European Union regarding legislation on national minorities (communities) are taken into account. This law also stipulates that the Human Rights Commissioner of the Verkhovna Rada of Ukraine, within the limits of the powers granted to them by the Constitution of Ukraine and the Law of Ukraine "On the Human Rights Commissioner of the Verkhovna Rada of Ukraine," exercises parliamentary control over the observance of the right of national minorities (communities) to use languages of national minorities (communities).

At the same time, in the context of the implementation of the language rights of indigenous peoples, on 7 April 2021, the Cabinet of Ministers of Ukraine approved the Concept of the Development of the Crimean Tatar Language (order of the Cabinet of Ministers of Ukraine No. 296-p), the purpose of which is to determine the basic approaches and main directions of the development of the Strategy for the Development of the Crimean Tatar Language for 2022–2032.

On 23 February 2022, by order of the Cabinet of Ministers of Ukraine No. 224-p, the Strategy for the Development of the Crimean Tatar Language for 2022–2032 was agreed upon and the operational plan for its implementation was approved. The purpose

of the Strategy is to create regulatory, institutional, organisational and other conditions for the restoration, preservation and development of the Crimean Tatar language, expanding the scope of its application, realising the language rights of speakers of the Crimean Tatar language, increasing the prestige of the language of the indigenous people as a means of communication, promoting the de-occupation and reintegration of the temporarily occupied territory of the Autonomous Republic of Crimea and the city of Sevastopol after its return to the unified constitutional space of Ukraine.

Resolution No. 19 of the Cabinet of Ministers of Ukraine dated 6 January 2023 established the National Commission on the Crimean Tatar Language, which is a consultative and advisory body of the Cabinet of Ministers of Ukraine and carries out coordination of the actions of central and local executive authorities on issues related to the implementation of the above-mentioned Strategy.

Also, on 28 July 2023, the Cabinet of Ministers of Ukraine adopted Order No. 657-p “Issues of developing the spelling of the Crimean Tatar language,” the project of which was developed jointly with the Mejlis of the Crimean Tatar people, which regulates certain issues regarding the development of spelling based on Latin graphics.

To create conditions for the realisation of the rights and opportunities of persons belonging to the Roma national minority, taking into account the challenges associated with difficult life circumstances and aspirations for full self-realisation in the cultural, social, economic and political life of society, on 28 July 2021 the Cabinet of Ministers of Ukraine approved the “Strategy for promoting the realisation of the rights and opportunities of persons belonging to the Roma national minority in Ukrainian society until 2030.” The eighth goal of the specified Strategy is aimed at studying and supporting Roma culture, art, history, and language, in particular, the task of ensuring the preservation and development of the Roma language, its standardisation and codification, and the creation of a unified dictionary that will combine various dialects of Ukrainian Roma.

Also in cooperation with experts of the Council of Europe, Ukrainian experts in the field of national minorities (communities) of Ukraine, representatives of public

institutions of national minorities (communities) (Romanian, Hungarian, Moldavian, Polish, Bulgarian, Armenian, Georgian, Greek, Jewish, German, Slovak, Czech, Lithuanian, and Estonian, Gagauz, Roma) and representatives of the indigenous peoples of Ukraine developed the Concept of the State targeted national and cultural program “Unity in Diversity” (hereinafter referred to as the “Concept”), which was approved by Order of the Cabinet of Ministers of Ukraine dated 12 May 2023 No. 429- p. The concept specifically defines the tasks regarding the use of the languages of indigenous peoples and national minorities (communities):

- developing a methodology for the use of languages of national minorities (communities), in particular, but not limited to, when providing any topographical information, communication with authorities, including when providing emergency assistance in areas traditionally inhabited by persons belonging to national minorities (communities), or in which such persons make up a significant part of the population;

- supporting the projects and activities aimed at preservation and revitalisation of the languages and cultures of the national minorities (communities) and indigenous peoples of Ukraine that face the threat of extinction;

- monitoring the observance of language rights of national minorities (communities) and indigenous peoples of Ukraine, publishing relevant reports on the official website of the State Service of Ukraine for Ethnopolitics and Freedom of Conscience;

- introducing the grant programme for supporting publication of bilingual books (in the official language and in the language of the national minority (community) or indigenous people of Ukraine);

- a number of other measures aimed at preserving the linguistic diversity of national cultures.

On 26 September 2023, the Cabinet of Ministers of Ukraine adopted Order No. 850-p “On approval of the State target national and cultural program “Unity in Diversity” until 2034” (hereinafter referred to as the “Program”). The Program is aimed at the creation of sustainable institutional conditions at the national and regional levels

to meet the needs and effectively exercise the rights and opportunities of national minorities (communities) and indigenous peoples of Ukraine and at the promotion of enhancement of social sustainability, cohesion and national unity of the Ukrainian society.

The Program includes a separate section aimed at ensuring the language rights of national minorities (communities) and indigenous peoples of Ukraine: “Ensuring the linguistic rights of persons belonging to national minorities (communities) and indigenous peoples of Ukraine, supporting the preservation of the languages of national minorities (communities) and indigenous peoples of Ukraine in accordance with the legislation” which provides for measures to preserve and develop endangered languages.

By Resolution of the Cabinet of Ministers of Ukraine No. 181 dated 9 February 2024, the Cabinet of Ministers of Ukraine approved the “Methodology for the use of languages of national minorities (communities) of Ukraine in settlements where persons belonging to national minorities (communities) of Ukraine traditionally live, or where such persons make up a significant part of the population” (hereinafter referred to as the “Methodology”), which is based on the main provisions of the Framework Convention of the Council of Europe on the Protection of National Minorities and the European Charter for Regional or Minority Languages.

The Methodology establishes the terms and conditions and the procedure for the use of languages of national minorities (communities) of Ukraine in localities where people belonging to national minorities (communities) of Ukraine traditionally live, or in which such people constitute a significant part of population. It also establishes the fields of public life where languages of national minorities (communities) of Ukraine may be used by the decision of the local self-government body: provision of topographical information; writing names on plates (signs) of local self-government bodies and communal enterprises; interaction with subjects of authority; provision of public services; provision of medical assistance; distribution of information for public use; election campaigning; provision of social services to senior citizens and persons with disabilities.

At the same time, to ensure the proper rights to use the languages of national minorities (communities) of Ukraine in the settlements where they traditionally live, or where such persons make up a significant part of the population, by Resolution No. 257 dated 4 March 2024, the Cabinet of Ministers of Ukraine approved the Procedure for determination of the list of settlements where people belonging to national minorities (communities) of Ukraine traditionally live, or where such people constitute a significant part of the population.

Also, in accordance with Clause 5 of Part 1 of Article 13 of the Law of Ukraine “On National Minorities (Communities) of Ukraine” the State Service of Ukraine for Ethnopolitics and Freedom of Conscience in cooperation with the relevant bodies of executive power and public organisations of national minorities (communities), taking into account scientifically based proposals of the National Academy of Sciences of Ukraine, as well as the Atlas of Endangered Languages of the World, published in 2010 by the United Nations Educational, Scientific and Cultural Organisation (UNESCO), developed a draft resolution of the Cabinet of Ministers of Ukraine “On Approval of the List of Endangered Languages of National Minorities (communities) of Ukraine.” This document stipulates that the state policy in the field of national minorities (communities) of Ukraine aims to provide state support to the endangered languages of national minorities (communities) of Ukraine. The list of such languages is approved by the Cabinet of Ministers of Ukraine on the basis of international standards.

The issue of the language of education of national minorities (communities) and indigenous peoples is regulated by Article 7 of the Law of Ukraine “On Education,” according to which persons belonging to national minorities of Ukraine are guaranteed the right to study in communal educational institutions for pre-school and primary education, in the language of the relevant national minority along with the state language. This right is realised by creating, in accordance with the legislation, separate classes (groups) with education in the language of the relevant national minority along with the state language and does not extend to classes (groups) with education in the Ukrainian language.

Persons who belong to the indigenous peoples of Ukraine are guaranteed the right to study in communal educational institutions to obtain preschool and general secondary

education in the language of the respective indigenous people along with the state language. This right is realised by creating, in accordance with the legislation, separate classes (groups) with education in the language of the relevant indigenous people of Ukraine along with the state language and does not extend to classes (groups) with education in the Ukrainian language.

Persons belonging to the indigenous peoples and national minorities of Ukraine are guaranteed the right to study the language of the respective indigenous peoples or national minorities in communal institutions of general secondary education or through national cultural societies.

## **1.2. Demographic situation and changes in state policy and legislation**

In Ukraine, as in many countries of the world, data on the ethnic composition and linguistic characteristics of the population are obtained only during the population census. The last population census on the territory of Ukraine was conducted in 2001. In the 2020 round, by decision of the Government of Ukraine, 2020 was determined as the year of conducting the All-Ukrainian population census (hereinafter referred to as the population census). However, due to the COVID-19 pandemic and limited funding for preparatory work, the census was postponed to 2023.

Taking into account the situation that has developed in connection with the military aggression of the Russian Federation against Ukraine in 2022, it has become impossible to conduct a population census.

According to Clause 1 of Section VI of the Law of Ukraine “On the All-Ukrainian Population Census” during the period of martial law in Ukraine and for six months after its termination or cancellation, the population census is not conducted. All terms stipulated in the calendar plan for the preparation and conducting of the population census are extended for the duration of martial law in Ukraine and for six months after its termination or cancellation.

In view of the above, on 20 October 2023, the Cabinet of Ministers of Ukraine issued Order No. 962-p “On recognizing Order No. 1542 of the Cabinet of Ministers of Ukraine dated 9 December 2020, invalid,” which cancelled the census in 2023 and

instructed the State Statistics Service to prepare a proposal for conducting the All-Ukrainian population census after the termination or abolition of martial law in Ukraine.

Given that the All-Ukrainian population census has been postponed to a later date, the data used in the report on the national composition of the population, as well as the number of people who use or recognize this or that language as their native language, are given based on the results of the 2001 All-Ukrainian census.

According to the State Statistics Service of Ukraine, as of 1 January 2022, the permanent population of Ukraine was (estimated) 40.998 million people (excluding the temporarily occupied territory of the Autonomous Republic of Crimea and the city of Sevastopol).

It is also important to note that the military aggression of the Russian Federation, the temporary occupation of a part of the territory of Ukraine, including the Crimean Peninsula, the military actions provoked by the Russian Federation on the territory of Ukraine made it impossible to monitor the status of the implementation of the provisions of the Charter and ensure the implementation of language legislation, the implementation of the appropriate state policy in the temporarily occupied territory of Ukraine.

### **1.3. State funding for the implementation of measures related to the European Charter for Regional or Minority Languages**

According to Article 14 of the Law of Ukraine “On National Minorities (Communities) of Ukraine,” expenditures necessary to ensure the implementation of measures for the exercise of the rights and freedoms of national minorities (communities) are carried out at the expense of the State Budget of Ukraine under a separate budget program, funds of local budgets, as well as other sources not prohibited by law.

Also, public associations of national minorities (communities) may be provided with competitive financial support for the implementation of programs (projects, events) at the expense of the State Budget of Ukraine, funds of local budgets in the manner established by the Cabinet of Ministers of Ukraine.

In the period of 2019–2022, the financing of cultural and artistic activities of public organisations of national minorities was carried out at the expense of the funds provided for in the Law of Ukraine on the State Budget of Ukraine for the relevant year under the program KPKVK 1801170 (program classification code of expenditures and crediting) “Nationwide activities in the spheres of culture and arts, protection of cultural heritage, export, import and return of cultural values, state language policy, international relations, religion and protection of the rights of national minorities.”

In December 2019, the All-Ukrainian Festival of National Cultures of Ukraine was held in the city of Uzhhorod on the topic: “Multi-ethnic and multi-religious Ukraine: the example of Transcarpathia,” which emphasizes the state’s attention and respect for the cultures of representatives of national minorities living in Ukraine, encouraged inter-ethnic unity and tolerance; through the promotion of national cultures, represented the cultural diversity of Ukraine and the potential of its culture as a whole.

In 2024, measures to implement the rights and freedoms of national minorities (communities) and indigenous peoples of Ukraine will be carried out in accordance with budget program 0413020 “Implementation of the rights and freedoms of national minorities (communities) and indigenous peoples of Ukraine.”

Also, according to the budget program “Financial support of creative unions in the field of media, press”, expenses for financial support of the media, in particular, media that purposefully contribute to the development of the languages and cultures of the national minorities of Ukraine, were foreseen for the period from 2019 to 2022, however, financial support under this direction was not used.

For the years 2023 and 2024, according to the above-mentioned budget program, expenses for financial support of the media, in particular, media that purposefully contribute to the development of the languages and cultures of the national minorities of Ukraine, were not foreseen.

At the same time, the state institution Ukrainian Cultural Fund provided grants on a competitive basis, in particular to support projects of ethnic communities, national minorities and indigenous peoples.

**General financing of cultural and artistic programs of the Ukrainian  
Cultural Fund**

<b>Year</b>	<b>The planned amount of grant support (UAH mln)</b>	<b>Allocated amount of grant support (UAH mln)</b>
2021	516.97	504.00
2022	590.80	4.40
2023	153.31	148.67
2024	154.06	-

It should be noted that due to the quarantine restrictions caused by the COVID-19 pandemic, a number of events planned for 2020–2021 did not take place.

Also, due to the full-scale invasion of the Russian Federation on the territory of Ukraine on 24 February 2022 and the introduction of martial law, the available financial resources of the state are primarily directed to the implementation of tasks related to repelling armed aggression, the smooth functioning of the budget sphere and the vital needs of residents of territorial communities, the implementation of measures of territorial defence and protection of public safety.

## **PART II**

### **Application of the provisions of Part II of the Charter**

The provisions of Part II of the Charter (Article 7) apply to all regional or minority languages used within the territory of Ukraine, which correspond to the definitions given in Article 1 and the Law of Ukraine “On the Ratification of the European Charter for Regional or Minority Languages.”

#### **Article 7**

##### **Objectives and principles**

*1. In respect of regional or minority languages, within the territories in which such languages are used and according to the situation of each language, the Parties shall base their policies, legislation and practice on the following objectives and principles:*

*a)*

When implementing the state language policy, Ukraine takes into account the principle of recognition of all languages of national minorities, which are traditionally used within the borders of the state or its specific territory, as an integral part of the country’s cultural landscape. This is determined by a number of legislative acts that guarantee the right to use, develop and protect the languages of each national minority in accordance with international standards and obligations of Ukraine to the international community. The list of current national legislation is specified in section 1.1. of part I of the report.

The norms of national legislation and the practice of regulating ethno-national processes correspond to international standards and recommendations specified in the Universal Declaration of Human Rights, the Framework Convention on the Protection of National Minorities, the European Charter for Regional Languages or Minority Languages, the Hague Recommendations of the OSCE High Commissioner on the Rights of National Minorities in the Field of Education and other international documents.

Ukraine ensures the realisation of the right of persons belonging to national minorities and indigenous peoples to preschool education in communal educational

institutions and general secondary education in state, communal and corporate institutions of general secondary education in the languages of such national minorities and indigenous peoples (along with the state language).

Thus, in accordance with Article 7 of the Law of Ukraine “On Education,” persons belonging to national minorities and indigenous peoples of Ukraine have the right to receive preschool education in communal educational institutions and general secondary education in state, communal and corporate institutions of general secondary education in the language of such national minorities and indigenous peoples (along with the state language), as well as to study the language of such national minorities and indigenous peoples. A similar provision is contained in Article 5 of the Law of Ukraine “On Comprehensive General Secondary Education.” This right is implemented at the expense of the state budget and local budgets of territorial communities.

*b)*

In recent years (2015–2020), administrative reform was carried out in Ukraine, which consisted in granting greater powers to local self-government bodies (decentralization) and changing the administrative-territorial division.

On 5 February 2015, the Verkhovna Rada of Ukraine adopted the Law of Ukraine “On Voluntary Amalgamation of Territorial Communities.” According to this law, neighbouring city, town, settlement, and village councils can unite into one community, which will have one joint local self-government body.

In June 2020, in accordance with the Law of Ukraine “On Amendments to Certain Laws of Ukraine Regarding the Determination of Territories and Administrative Centres of Territorial Communities,” the Cabinet of Ministers of Ukraine determined the administrative centres and territories of territorial communities.

Instead of more than 11,000 local councils, 1,469 capable territorial communities were formed, and instead of 490 districts, 136 new districts were formed.

Currently, the system of administrative and territorial organisation of Ukraine consists of regions (oblasts), districts, cities and towns, settlements and villages. Ukraine is composed of: Autonomous Republic of Crimea and the city of Sevastopol (temporarily

occupied by the Russian Federation since February 2014), Vinnytsia, Volyn, Dnipropetrovsk, Donetsk (most part temporarily occupied by the Russian Federation), Zhytomyr, Zakarpattia, Zaporizhzhia (most part temporarily occupied by the Russian Federation), Ivano-Frankivsk, Kyiv, Kirovohrad, Luhansk (most part temporarily occupied by the Russian Federation), Lviv, Mykolaiv (part temporarily occupied by the Russian Federation), Odesa, Poltava, Rivne, Sumy (part of the territory included in the list of territories of possible hostilities and active hostilities), Ternopil, Kharkiv (part temporarily occupied by the Russian Federation), Kherson (most part temporarily occupied by the Russian Federation), Khmelnytskyi, Cherkasy, Chernivtsi, and Chernihiv regions, and the city of Kyiv.

Article 132 of the Constitution of Ukraine defines that the territorial system of Ukraine is based on the principles of unity and integrity of the state territory, a combination of centralization and decentralization in the exercise of state power, balance and socio-economic development of regions, taking into account their historical, economic, ecological, geographical, and demographic features, ethnic and cultural traditions.

Also, in accordance with Clause 4 of Part 1 of Article 4 of the Law of Ukraine “On the Voluntary Amalgamation of Territorial Communities” when making decisions on the voluntary unification of territorial communities, historical, natural, ethnic, cultural and other factors affecting the socio-economic development of the united territorial community

Voluntary amalgamation of territorial communities does not lead to a change in the status of settlements in both rural and urban areas.

As a result of the reform of the administrative-territorial system and local self-government, there have been certain changes in the ethnic ratio of the local population, in particular in districts and amalgamated territorial communities. The implementation of the mentioned reform gave communities, in particular in the multi-ethnic regions of Ukraine, more opportunities for their development and expanded the possibilities of effective participation, in particular of representatives of national minorities, in solving

issues that concern them. Since the majority of power and financial resources were transferred to the level of capable communities, this created the necessary conditions for ensuring the active participation of national minorities in the cultural and social life of communities and expanded their influence on improving the quality of public services provided locally.

c)

Article 53 of the Constitution of Ukraine guarantees citizens who belong to national minorities the right to education in their native language or to study their native language in state and communal educational institutions or through national cultural societies.

The legislation of Ukraine stipulates that persons belonging to the indigenous peoples and national minorities of Ukraine are guaranteed the right to study the language of the respective indigenous peoples or national minorities of Ukraine in communal institutions of general secondary education or through national cultural societies.

The possibility of using the languages of national minorities (communities) in the field of advertising, during public, cultural, artistic, entertainment events and shows, emergency assistance provision, in service sector, etc. is also ensured.

The state guarantees free provision of textbooks (including electronic ones) manuals to students of general secondary education belonging to national minorities (communities) and teaching staff in accordance with the procedure established by the Cabinet of Ministers of Ukraine (*Article 11 of the Law of Ukraine “On National Minorities (Communities) of Ukraine”*).

d)

Part 1 of Article 10 of the Law of Ukraine “On National Minorities (Communities) of Ukraine” defines that a person belonging to a national minority (community) has the right to free and unhindered use of the language of their national minority (community) privately and publicly, in oral and in written forms within the limits that do not contradict the law.

To meet the informational, cultural and educational needs of national minorities living on the territory of Ukraine, the National Public Television and Radio Company of

Ukraine Joint-Stock Company (hereinafter referred to as “NSTU JSC” or “Public Broadcasting”) operates, which constantly creates projects in the languages of national minorities (communities) for them, and in the Ukrainian language about them. In its activities, NSTU JSC is guided by the Law of Ukraine “On Public Media of Ukraine,” according to which NSTU JSC promotes the development of languages and cultures of national minorities, and by the Concept of broadcasting on the subject of national minorities of NSTU JSC (hereinafter referred to as the “Concept”), which determines the main directions and principles of NSTU JSC work regarding the fullest possible satisfaction of the informational, cultural and educational needs of national minorities who live compactly and dispersedly on the territory of Ukraine. The concept aims to ensure the rights of national minorities regarding the use of minority languages on all Public Broadcasting platforms; promoting the development of cultural and linguistic diversity and preserving the identity of national minorities; dissemination of information that contributes to the deepening of intercultural dialogue and harmony in Ukrainian society; informing on all platforms of Public Broadcasting about the multinational composition of the population of Ukraine, the life and culture of national minorities, their contribution to the development of Ukrainian society; dissemination of information that contributes to the prevention of discrimination on the basis of ethnicity; debunking negative stereotypes associated with certain national minorities.

The implementation of the Concept takes into account the content of the European Charter for Regional Languages or Minority Languages, the Constitution of Ukraine, laws of Ukraine “On Ratification of the European Charter for Regional Languages or Minority Languages,” “On Public Media of Ukraine,” “On Media,” “On National Minorities (Communities) of Ukraine,” “On the indigenous peoples of Ukraine,” “On ensuring the functioning of the Ukrainian language as a state language,” as well as other legal acts that regulate relations in this area.

At the same time, since the end of 2019, the Coordinating Centre for the Broadcasting of National Minorities (hereinafter referred to as the “Coordinating Centre”) has been operating at NSTU JSC. Its purpose is to ensure informational rights and to support intercultural understanding and social integration of all members of

society, regardless of ethnic origin, religion, sexual orientation, physical capabilities, gender identity, and social background.

The coordination centre has four editorial offices (the city of Kyiv, Zakarpattia, Odesa, and Chernivtsi regions). The editorial office in Kyiv produces national projects of various formats and genres on the topics of diversity (including national communities and indigenous peoples), equality and inclusion in the Ukrainian language with adaptation for various platforms of Public Broadcasting, i.e. YouTube, Facebook, Instagram, and TikTok.

Regional content editorial offices on the subject of national minorities in Uzhhorod, Chernivtsi, and Odesa create local social-educational and cultural-artistic programs in the languages of the national communities (Hungarian, Romanian, Slovak, German, Roma, Bulgarian, and Gagauz), which are broadcast on the following platforms: television — local TV channels (all-Ukrainian broadcast); radio — Ukrainian Radio; YouTube, Instagram and Facebook — Suspilne Uzhhorod, Suspilne Chernivtsi, Suspilne Odesa.

The extensive library network also meets the information, research, educational, cultural and other needs of users from national minorities (communities) in Ukraine. In many public libraries, during the formation of their library funds, an orderly collection of documents is carried out, including publications in the languages of national minorities.

*e)*

Article 11 of the Constitution of Ukraine specifies that the state promotes the consolidation and development of the Ukrainian nation, its historical consciousness, traditions and culture, as well as the development of the ethnic, cultural, linguistic and religious identity of all indigenous peoples and national minorities of Ukraine.

The Methodology for the use of languages of national minorities (communities) of Ukraine in localities where people belonging to national minorities (communities) of Ukraine traditionally live, or in which such people constitute a significant part of

population, ensures the possibility of using the language of national minorities (communities) in such areas social life:

- provision of topographic information;
- writing official names on signs (plates) of the local self-government bodies and utility enterprises;
- communication with the public authorities;
- provision of public services;
- medical aid;
- dissemination of information for public use;
- provision of social services to the elderly and persons with disabilities.

*f)*

The Constitution of Ukraine guarantees citizens who belong to national minorities the right to education in their native language or to study their native language in state and communal educational institutions or through national cultural societies (Article 53).

The Government of Ukraine is carrying out reforms aimed at achieving European standards in all spheres of social life. Reforming the education system is one of the main elements of this process. Among the key tasks of the educational reform is the provision of equal opportunities to all citizens of Ukraine in the implementation of the constitutional right to quality education.

The Law of Ukraine “On Education” laid the legislative foundations for ensuring qualitatively new conditions for obtaining an education in Ukraine, in particular through the improvement of approaches to the use of state and other languages in the educational process in institutions of general secondary education.

Article 7 of this Law defined different approaches to different national minorities and indigenous peoples of Ukraine regarding their right to study in their native language OR study their native language at different levels of education:

a) indigenous peoples of Ukraine were granted “the right to study in communal educational institutions to obtain preschool and general secondary education in the language of the respective indigenous people along with the state language.” Such

maximum assistance is based on the fact that indigenous peoples, unlike national minorities, do not have another country that would preserve and support the development of their native language and culture. Therefore, countries where indigenous peoples live undertake international obligations to preserve and support the development of their languages and cultures;

b) all national minorities of Ukraine were granted “the right to study in communal educational institutions to obtain preschool and general secondary education in the language of the respective indigenous people along with the state language.” That is, in kindergartens and in grades 1–4 of communal schools, children from any national minority can study in their native language, while learning the state language;

c) all persons belonging to the indigenous peoples and national minorities of Ukraine are guaranteed the right to study the language of the respective indigenous peoples or national minorities in communal institutions of general secondary education or through national cultural societies;

d) in educational institutions, in accordance with the educational program, one or more disciplines may be taught in two or more languages, i.e. the state language, English, other official languages of the European Union.

In Ukraine, according to the current legislation (in particular, the Law “On Education”), everyone has the right to quality and affordable education. The right to education includes the right to receive education throughout life, the right to access to education, the right to free education in the cases and procedure determined by the Constitution and laws of Ukraine

The Law “On Comprehensive General Secondary Education” pays particular attention to the issue of accessibility to comprehensive secondary education, including the availability of a sufficient number of educational institutions that provide free comprehensive secondary education, providing students with support in the educational process at the expense of state and local budgets in the most accessible and closest to their place of residence educational institution.

Ukraine ensures the realisation of the right of persons belonging to national minorities and indigenous peoples to preschool education in communal educational institutions and general secondary education in state, communal and corporate

institutions of general secondary education in the languages of such national minorities and indigenous peoples (along with the state language).

Thus, in accordance with Article 7 of the Law of Ukraine “On Education,” persons belonging to national minorities and indigenous peoples of Ukraine have the right to receive preschool education in communal educational institutions and general secondary education in state, communal and corporate institutions of general secondary education in the language of such national minorities and indigenous peoples (along with the state language), as well as to study the language of such national minorities and indigenous peoples. A similar provision is contained in Article 5 of the Law of Ukraine “On Comprehensive General Secondary Education.” This right is implemented at the expense of the state budget and local budgets of territorial communities.

The state guarantees free provision of textbooks (including electronic ones) manuals to students of general secondary education belonging to national minorities (communities) and teaching staff in accordance with the procedure established by the Cabinet of Ministers of Ukraine (*Article 11 of the Law of Ukraine “On National Minorities (Communities) of Ukraine”*).

Currently, the following institutions of higher education continue their activities on the territory of our state: Ferenc Rakocza II Transcarpathian Hungarian College of Higher Education, Beit Khana International Humanitarian and Pedagogical Institute

g)

The educational system of Ukraine provides that persons who do not speak a certain language of national minorities and live in an area where it is used, can study it at their own will. In accordance with Article 11 of the Law of Ukraine “On Comprehensive General Secondary Education,” an educational institution develops and uses in its educational activities one educational program at each level (cycle) of comprehensive general secondary education or an end-to-end educational program developed for several levels of education.

Educational programs may be developed on the basis of a corresponding standard educational program or educational programs developed by subjects of educational activity, scientific institutions, individuals or legal entities and approved by the central

executive body for ensuring the quality of education in accordance with the requirements of this Law.

The decision on the educational institution's use of an educational program developed on the basis of a typical educational program or another educational program is made by the pedagogical council of the educational institution.

According to the information of the education management bodies of the regional state (military) administrations, *in 2023* there were 205 institutions of general secondary education (municipal and private) (hereinafter referred to as IGSE) with classes teaching in the languages of national minorities alongside the state language, in which **35,776 students** studied in the languages of national minorities.

Clause 9 of Part 1 of Article 15 of the Law of Ukraine “On National Minorities (Communities) of Ukraine” defines that the central body of executive power, which ensures the formation and implementation of state policy in the field of national minorities (communities) (*the State Service of Ukraine for Ethnopolitics and Freedom of Conscience*) organises conducting scientific research in the field of national minorities (communities), and also interacts with domestic and foreign research institutions and educational institutions for the purpose of exchanging experience in conducting such research. In particular, they talked about the challenges faced by representatives of the Crimean Tatar, Jewish, Roma, Karaite, Krymchak and Greek ethnic communities. Small ethnic communities that represent unique cultures in the world and that may eventually disappear as a result of Russian aggression. **The Ukrainian-language content editorial office in Kyiv** provides broadcasting in Ukrainian exclusively on the topics of diversity, equality and inclusion. Ensuring broadcasting in the Ukrainian language about national and ethnic diversity, about the life and challenges of different communities in Ukraine is an important step in the direction of cultural and social development of Ukraine, and also contributes to building a fair, tolerant and inclusive society. An important component of the editorial work is the reflection of a wide range of cultural, social and historical aspects of the life of all national communities in Ukraine (more than 100 national communities according to the

latest population census) because this is a key element of creating an inclusive environment for all Ukrainians and helps to reduce stereotypes and build a peaceful coexistence based on mutual respect.

The editorial office in Kyiv cooperates with regional editorial offices in creating special projects or materials for important dates for national communities (for example, International Tolerance Day, International Roma Day, International Mother Language Day, Khydirlez, etc.).

At the end of 2023, the Coordination Centre and the editorial office of regional content on the subject of national minorities of the Chernivtsi region included the editorial office of the worldwide radio broadcasting service of Ukraine (Radio Ukraine

International), which speaks Romanian on the radio platform. With the help of transmitters and online broadcasting of “Ukrainian Radio,” the team creates a number of multi-genre projects that can be heard by residents of Romania and Moldova, as well as other Romanian-speaking people in the world. The editorial team is very professional and has an excellent understanding of the cultural and socio-political life of Ukraine, its region and the Romanian national community.

The team works in full force and creates the following projects:

- daily news releases with a timing of 8 minutes. Number of releases in 2023 — 252. Total timing of all releases — 37 hours. Planned number of releases in 2024 — 366.

The team offers the listener reliable information from a proven source, i.e. the website “Social News,” where you can also learn about the progress of the war, life in the frontline regions of Ukraine because we tell the truth and debunk fakes.

Russia’s war in Ukraine is a security issue not only for Ukrainians but also for every inhabitant of the world, so people should receive reliable information without propaganda in order to assess the true essence of what is happening in Ukraine; — the project “We are from Ukraine and we are on the defence of European values.”

The frequency of broadcast is daily during working week. The duration of one release is 20 minutes.

Planned number of releases in 2024 — 262.

Together with competent experts, as well as officials, the project provides answers to current, acute questions that concern listeners: the security of Ukraine, the situation at the front, European and Euro-Atlantic integration of Ukraine, cross-border cooperation, etc.;

- the project “We are from Ukraine and we are on the defence of European values — results of the week.” The frequency of broadcast is every Saturday. The duration of one release is 20 minutes;

- the “Ukrainian Society” project. The release frequency is the second and fourth Sundays of the month. The duration of one release is 20 minutes. Planned number of releases in 2024 — 24;

- the “Different We” project. The release frequency is the third and fifth Sundays of the month. The duration of one release is 20 minutes. Planned number of releases in 2024 — 16. In the project, you can listen to educational materials about the national and cultural life of the national communities of Ukraine and the Ukrainian community of Romania; coverage of events of the cultural life of national minorities, which are aimed at the revival of the native language, national culture, traditions and customs. This is a kind of encyclopaedia of Ukrainian folklore and ethnography of various ethnic groups living in Ukraine. Talking about folk customs and traditions, religious holidays, the authors cite numerous sayings and proverbs, drawing attention to inter-ethnic tolerance (how to live in peace and harmony with the surrounding world);

- the project “Cultural compass during the war.” The release frequency is the first Sunday of the month. The duration of one release is 20 minutes. Planned number of releases in 2024 — 12. Despite the fact that the Russian aggressor is trying to destroy not only the vital infrastructure of Ukraine but also the historical and cultural values of the Ukrainian people, social life in our country continues, and culture continues to develop. You can hear about this in interviews and reports of the project. Besides, writers, artists, singers, actors, journalists are actively involved in volunteer activities and help the Armed Forces defeat the enemy, and some artists took up arms and defend the country at the front;

- the editor of regional content on the subject of national minorities of the Odesa region speaks Bulgarian and Gagauz languages. In particular, this is the television and digital project “Voice of Bulgarian” and news in the Gagauz language on the radio. Besides, the team produces reports in Ukrainian about all the communities of the region, in particular about the Moldavian and Romanian communities living in the villages of the Odesa region.

**The editors of regional content on the subject of national minorities of the Odesa region** speak Romanian for national communities and for an international audience. These are TV and radio projects with adaptation for social networks.

All-Ukrainian broadcasting of projects (with Ukrainian subtitles) takes place on local channels. You can listen to radio programs or news on “Ukrainian Radio” and in the “Public Radio” application.

All projects are adapted for social networks. Projects of regional content editorial on the subject of national minorities of the Odesa region, which were produced in 2023 and continued broadcasting in 2024:

**in Bulgarian:**

- reports in the project “Voice of Bulgarians”: number of releases in 2023 — 11;
- news on the radio (local): number of releases in 2023 — 252; total timing in 2023 — 8 hours 40 minutes;
- news on the radio (international): number of releases in 2023 — 252; total timing in 2023 — 37 hours;

**in Gagauz language:**

- news on the radio (local): number of releases in 2023 — 252; total timing in 2023 — 8 hours 40 minutes.

It is important to note that to avoid the cultural reservation of national communities, the so-called ghetto, projects about national communities in Ukrainian can be found on all platforms of Public Broadcasting: on YouTube, Facebook, Instagram and TikTok. Besides, representatives of various national communities are participants (speakers, heroes) of stories, reports, projects and live broadcasts in the Ukrainian language: in the morning show, news, all-Ukrainian daily information project “Suspilne. Studio” and the national marathon “The only news #UArazom.”

In general, the team of the Coordination Centre in 2022–2023 strengthened informational and socio-political broadcasting, which is especially important in view of informational threats, and is constantly searching for specialists fluent in the language of the national community and Ukrainian.

With the support of donors and partners, Public Broadcaster conducted a number of studies on the peculiarities of media consumption by representatives of national communities, in particular, the Hungarian community in Uzhhorod. The data of these studies show that viewers (target audience of the project in Hungarian) watch regional TV channels usually two to three times a week or less to obtain information about the region, social problems and the activities of local authorities.

At the same time, regional radio is used to listen to news or music, and social networks are given the highest priority in content consumption.

Taking into account the dynamics of television viewing and the data of the weekly analytical reports of the research directorate of NSTU JSC, it is planned to focus on digital platforms to ensure uninterrupted production of current content in the languages of national communities.

In the period from 2024 to 2025, it is planned to develop and implement the Concept of Diversity, Equality and Inclusion of Public Broadcasting. This will strengthen the understanding of diversity and its importance both in the company and in the content. On the territory of Ukraine, the freedom of direct reception of radio and television broadcasts from neighbouring countries, which were broadcast in the languages of national minorities, is guaranteed, and there are no obstacles to the retransmission of radio and television broadcasts from neighbouring countries, which are broadcast in these languages. No restrictions were imposed on the freedom of expression of opinions and the free dissemination of information in print media in the languages of national minorities.
