# SIRIUS Video Game – launched Oct. 2020

Created in partnership with CENTRIC

The screenshot displays the SIRIUS video game interface. At the top left, a circular timer shows 20:47:44. Below it, the 'Key Decisions' section lists 'The investigation begins' and 'Trace Phone number'. The main 'Feedback' screen contains the text: 'You make a request to the national ISP linked to the phone number. It appears that the phone was a burner phone, and there is no available information.' A 'Continue' button is centered below the text. At the bottom, an 'Attempts' section shows three starburst icons, with the first one being orange and the others green and white. The SIRIUS logo is visible at the top center of the main screen area.

- Players follow leads and create their own adventure
- They have 24 hours to solve the case (24 minutes in real life)
- 6 mistakes or running out of time triggers another attack

## 'Who Wants To Be A Millionaire' But For Terror Attacks: Game Trains Police To Get Facebook Data Fast

Thomas Brewster Forbes Staff

Cybersecurity

Associate editor at Forbes, covering cybercrime, privacy, security and surveillance.

When a terrorist strikes, getting information fast from a tech giant can make the difference between police catching the suspects, or another attack taking place. That's the premise of a new game created by Europol, the European body responsible for connecting the continent's myriad policing agencies and helping them investigate major crimes.

Right now, police officers are often confused by the process. What data can they request from which provider? Can they retrieve any encrypted content from the likes of Apple or WhatsApp? What legal mechanisms should they be using? What's the best language to use to ensure they get the information they want quickly?

## La Europol quiere entrenar con este videojuego a los policías de toda Europa para que aprendan a reclamar datos de usuarios sospechosos a Google, Facebook o TikTok

Alberto R. Aguilar 14 oct. 2020 19:02h

Reuters/Hannibal Hanschke

- Una división de la Europol ha creado un juego cuestionario con el que ayudan a los policías de toda Europa a reclamar información sobre usuarios sospechosos a las tecnológicas.
- Apple tuvo a España entre los países más 'ignorados' por peticiones de información sobre usuarios rechazadas.
- Una de las personas detrás de la iniciativa es un guardia civil español que lidera el proyecto SIRIUS: quiere ayudar a que todos los cuerpos policiales del continente mejoren sus procesos a la hora de solicitar información a las tecnológicas.

### REQUEST FOR THE PRESERVATION OF ELECTRONIC DATA

Date: 01 September 2021

REQUESTING AUTHORITY: NEW ZEALAND POLICE

**Identification details**

Full name or personal identification number: [Redacted]

Position held: Inspector of Police

**Contact details of authority's representative**

Official e-mail address and phone number: [Redacted] Email: di.nicked@police.nz

Proceedings number: 174/21, New Zealand

Case number: 14/21

**ADDRESSEE (RECIPIENT):** Hoop Software Inc.

Address: Magnificus Software Inc., 3663 Crowley Dr Apt 107 V5R 6H4 Vancouver British Columbia - Canada

This authority is conducting a criminal investigation that involves users from your platform. Electronic data has been deemed relevant in this matter. I am hereby requesting your company to immediately take all necessary actions to preserve and safeguard electronic data in relation to the below mentioned user(s) and/or account(s).

**TYPE OF PRESERVATION REQUEST:**

New preservation request

Request for extension of preservation period. If so, inform:

Reference number of previous request(s) as provided by the company, if available: [Redacted]

Date of submission of previous preservation request: [Redacted]

Date of expiration of previous preservation request: [Redacted]

Reason to request extension of preservation period: [Redacted]

**REQUEST FOR THE PRESERVATION OF ELECTRONIC DATA** 1

This model form is provided by UNODC, UNCTED, Europol, Eurojust and Copol (via the projects SIRIUS, Euromed Justice and Euromed Police). These institutions have not reviewed and are not responsible for the content of this request. You are responsible to comply with the relevant laws and procedure regarding data categorisation and privacy when making and processing any request.

## E-Evidence Package THE PROPOSAL OF THE EUROPEAN COMMISSION FACTSHEET

### 1. BACKGROUND OF THE E-EVIDENCE PACKAGE

More than half of all criminal investigations today rely on electronic evidence (e-evidence) that is not publicly available and is stored across borders<sup>1</sup>. Therefore, law enforcement and judicial authorities often experience difficulties in accessing e-evidence which is increasingly available only on private infrastructures.

With the objective of improving cross-border access to electronic evidence, the EU is currently taking important steps for a more robust common legal framework, providing clarity and legal certainty to users, service providers and competent authorities, while putting in place strong safeguards in relation to personal data protection and fundamental rights.

Accordingly, in April 2018 the European Commission (the Commission) proposed new rules introducing a [Regulation](#) on European Production and Preservation Orders for electronic evidence in criminal matters and a [Directive](#) laying down harmonised rules on the appointment of legal representatives for the purpose of gathering evidence in criminal proceedings.

In December 2018, the Council of the European Union (the Council) agreed its [General Approach](#) on the above-mentioned Regulation, which in March 2019 was followed by the [General Approach](#) on the mentioned Directive.

Within the European Parliament (the EP), the proposal for the Regulation has been assigned to the Civil Liberties, Justice and Home Affairs Committee (LIBE). After receiving recommendations from the LIBE Committee in December 2020, the European Parliament agreed on its final [Position](#) introducing multiple changes, including the integration of the Directive's content into the proposed Regulation, mechanism of mandatory notification, modification of data categories, grounds for non-execution of orders, etc.

On 10 February 2021, the European Commission, the Council of the European Union and the

<sup>2</sup> The SIRIUS project has received funding from the European Commission's Service for Foreign Policy (FPF) under contribution agreement No P1/2020/417-500. This document was produced with the financial assistance of the European Union. The views expressed herein can in no way be taken to reflect the official opinion of the European Union.

European Parliament began the inter-institutional negotiations on the e-evidence legislative package.

The outcome of these negotiations could radically change the way data is requested in the context of criminal investigations in terms of speed and effectiveness, while preserving user privacy.

This factsheet analyses the initial proposal of the Council of the European Union.

Other factsheets, available on the SIRIUS platform, present positions of other EU institutions involved in the inter-institutional negotiations:

- Factsheet on the General Approach of the Council of the European Union
- Factsheet on the Position of the European Parliament

The factsheets capture initial negotiating positions of the EU institutions, which will change/develop over the course of the inter-institutional negotiations.

### 2. THE SCOPE OF THE PROPOSAL

- Legal regime covered

The proposed legal framework departs from location of data storage as the determining factor for jurisdiction. It is based on the principle of mutual recognition of judgements and judicial decisions and aims to establish direct interaction with the service providers to access e-evidence as a binding legal process. The same rules and obligations would be applicable to all service providers, regardless of where the data is stored and where they are based, as long as they offer services on the EU market.

To this purpose, service providers would be obliged to designate a legal representative in the EU for the receipt of, compliance with and enforcement of decisions and orders. In this way, the suggested legislation establishes asymmetrical cooperation,

## E-Evidence Package THE GENERAL APPROACH OF THE COUNCIL OF THE EU FACTSHEET

### 1. BACKGROUND OF THE E-EVIDENCE PACKAGE

More than half of all criminal investigations today rely on electronic evidence (e-evidence) that is not publicly available and is stored across borders<sup>1</sup>. Therefore, law enforcement and judicial authorities often experience difficulties in accessing e-evidence which is increasingly available only on private infrastructures.

With the objective of improving cross-border access to electronic evidence, the EU is currently taking important steps for a more robust common legal framework, providing clarity and legal certainty to users, service providers and competent authorities, while putting in place strong safeguards in relation to personal data protection and fundamental rights.

Accordingly, in April 2018 the European Commission (the Commission) proposed new rules introducing a [Regulation](#) on European Production and Preservation Orders for electronic evidence in criminal matters and a [Directive](#) laying down harmonised rules on the appointment of legal representatives for the purpose of gathering evidence in criminal proceedings.
