

ARTIFICIAL INTELLIGENCE AND HUMAN RIGHTS

Introduction to artificial intelligence

Duration: x

START MODULE 1 →

WHY?

- For legal practitioners to:

Understand

- basics of AI
- rules that governs it
- challenges

Foster ethical practices

Ensure compliance with regulations

Mitigate risks

Address liability

WHAT?

Technical
aspects

Legal
aspects

COURSE OUTLINE

Module 1 Introduction to AI

Module 2 Legal Frameworks and Principles

Module 3 AI and regulation in Europe

Module 4 Thematic aspects

Module 5 Future of AI

M1 _ INTRODUCTION TO THE AI

- _ What is AI?
- _ Basic concepts
- _ Current limits of AI
- _ History of AI
- _ Implications

- Fundamental concepts of AI
- Explanation of creation of AI systems
- Illustration of practical application of AI in daily life

We are also very far from the development of systems that would attain consciousness or pose a threat to humanity by taking over the world and eradicating humans!

BASIC CONCEPTS —

Since the terms **deep learning** and **machine learning** tend to be used interchangeably, it is important to distinguish between the two. Both are sub-fields of artificial intelligence, with deep learning being a subset of machine learning.

M2 _ THE INTERNATIONAL AND EUROPEAN LEGAL FRAMEWORK AND THEIR PRINCIPLES ON AI

- _ Introduction
- _ COE
- _ EU
- _ Other frameworks
- _ Key AI principles

Legal framework

EUROPEAN UNION APPROACH TO AI —

APPROACH TO AI —

COUNCIL OF EUROPE

CONSEIL DE L'EUROPE

Similarities and differences in regulation

23/3

What do you think?

While listening to Thomas Schneider, did you identify some similarities with the EU AI Act's approach, or differences?

One of the similarities we may notice is that both acknowledge the need for a binding regulation, and that it should not hamper innovation.

One difference we may think of is that the Council of Europe's approach on the Convention does not aim at regulating 'products' placed on a given market, but rather at establishing rules for States that will be signatories.

COE approach & instruments

- PACE resolutions and recommendations on AI
- CEPEJ
- CAHAI
- Other COE Bodies
- Impact on all areas of focus within the CoE

CEPEJ	CDBIO	CDMSI
GEC	CDADI	CDENF
CCS	CDPC	CDDG
VC	CDEDU	CDCPP
T-PD	T-CY	CMJ

The background of the slide features a blue field with yellow stars, characteristic of the European Union flag. A hand is shown holding a dark puzzle piece, which is being placed into a larger puzzle. The text 'AI REGULATION' is overlaid on the puzzle piece.

EU APPROACH

- _ EU LEGAL FRAMEWORK
 - AI Alliance
 - High Level expert group on AI
 - White paper on AI

Other frameworks

Principles

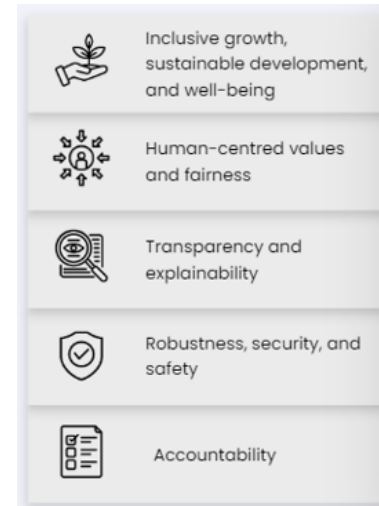

UNESCO

PACE

- transparency, including accessibility and explicability;
- justice and fairness, including non-discrimination;
- human responsibility for decisions, including liability and the availability of remedies;
- safety and security;
- privacy and data protection.

OECD

CEPEJ

AI principles combined

TRANSPARENCY AND
EXPLAINABILITY

SAFETY AND
SECURITY

PRIVACY AND DATA
PROTECTION

HUMAN-CENTRIC
VALUES AND
OVERSIGHT

FAIRNESS AND
JUSTICE

ACCOUNTABILITY
AND RESPONSIBILITY

MODULE 3

AI Regulation in Europe

- ▶ **Introduction** ✓
- ▶ **Introductory remarks**
- ▶ **The EU AI ACT**
- ▶ **The Council of Euro...**
- ▶ **Summary & Knowle...**

How regulate AI?

“AI is continuously “moving target”
with uncertain boundaries for policy
makers & lawyers”

Overarching goal of AI regulation:
« To mitigate risks arising from AI
while ensuring that everyone can
benefit from opportunities it creates »

Additional materials

Should you wish to further explore these aspects, you can watch these optional videos:
(available in English only and not mandatory for the completion of the module)

Examples of AI
Reminder of some of the
various uses of AI you have
seen in Module 1.

What does the future
of international
cooperation on AI
look like?

AI Regulation:
Balancing Risk and
Opportunity.

Additional material
(available in English only
and not mandatory for the
completion of the module):
Council of Europe AI&Law
Webinar on the deep
impact of AI on Human
Rights.

Challenging questions

- What aspects would you regulate, and how would you adapt to the evolving definition of AI?
- Would you consider implementing bans? If so, what would be subject to prohibition and for what reasons?
- How would you address the risks posed by technologies such as ChatGPT versus those presented by autonomous vehicles?
- If tasked with drafting AI legislation, what would be the primary focal points or challenges your legislation must address?

M5 _ FUTURE OF AI

- General advances
- Societal implications
- Emerging technologies

AUTHORS —

THOMAS LAMPERT

- Chair of Data Science and Artificial Intelligence

EMANUELLE LEGRAND

- Seconded magistrate
- Head of Artificial Intelligence, French Ministry Digital Sovereignty
- Expert, Committee on Artificial Intelligence (Co

JIRI NOVAK

- Partner Sokol, Novák, Trojan, Doleček
- President of the Information Technology Law Societies in Europe (CCBE)
